DÉCLARATION DES PERFORMANCES

DoP: 0105

pour Upat Sleeve Anchor UHS, UHS-I (Cheville métallique pour utilisation dans le béton (charges lourdes)) – FR

1. Code d'identification unique du produit type: **DoP: 0105**
2. Usage(s) prévu(s): **Cheville de fixation dans du béton fissuré ou non fissuré, voir annexe, en particulier annexes B 1 - B 6**
3. Fabricant: **Upat Vertriebs GmbH, Bebelstraße 11, 79108 Freiburg im Breisgau, Allemagne**
4. Mandataire: --
5. Système(s) d'évaluation et de vérification de la constance des performances: **1**
6. Document d'évaluation européen: **EAD 330232-00-0601**

Évaluation technique européenne: **ETA-17/0288; 2017-08-22**

Organisme d'évaluation technique: **DIBt**

Organisme(s) notifié(s): **1343 – MPA Darmstadt**

7. Performance(s) déclarée(s):

Résistance mécanique et stabilité (BWR 1)

- **Résistance caractéristique pour l'action statique et quasi-statique: Voir annexe, en particulier annexes C 1 - C 4**
- **Résistance caractéristique pour la catégorie de performance sismique C1: Voir annexe, en particulier annexe C 7**
- **Déplacements sous charges de traction et cisaillement: Voir annexe, en particulier annexes C 7 - C 8**

Protection contre le feu (BWR 2)

- **Réaction au feu: La cheville remplit les exigences de la classe A 1**
- **Résistance au feu: Voir annexe, en particulier annexes C 5 - C 6**

8. Documentation technique appropriée et/ou documentation technique spécifique: ---

Les performances du produit identifié ci-dessus sont conformes aux performances déclarées. Conformément au règlement (UE) no 305/2011, la présente déclaration des performances est établie sous la seule responsabilité du fabricant mentionné ci-dessus.

Signé pour le fabricant et en son nom par:

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

Tumlingen, 2017-08-29

- Cette déclaration des performances a été émise en différentes langues. En cas de divergences d'interprétation, la version anglaise prévaut toujours.
- L'annexe contient des informations volontaires et complémentaires en langue anglaise dépassant les exigences légales (spécifiées en langage neutre).

Specific Part**1 Technical description of the product**

The Upat Sleeve Anchor UHS, UHS-I is an anchor made of galvanised steel (sizes with external diameter 10, 12, 15, 18, 24, 28 and 32, sizes with internal thread 12/M6 I, 12/M8 I, 15/M10 I and 15/M12 I) or stainless steel (sizes with external diameter 10, 12, 15, 18 and 24, sizes with internal thread 12/M6 I, 12/M8 I, 15/M10 I and 15/M12 I) which is placed into a drilled hole and anchored by torque-controlled expansion.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment**3.1 Mechanical resistance and stability (BWR 1)**

Essential characteristic	Performance
Characteristic resistance for static and quasi static	See Annex C 1 to C 4
Characteristic resistance for seismic performance categories C1	See Annex C 7
Displacements under tension and shear loads	See Annex C 7 and C 8

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorage satisfy requirements for Class A1
Resistance to fire	See Annex C 5 and C 6

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with European Assessment Documents EAD No. 330232-00-0601 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

Type hexagon screw **S**
 UHS 10 - 32 S
 UHS 10 - 24 S A4

Marking: Identifying mark of the producer, anchor identity
 nominal drill hole diameter / max. thickness of fixture
 e. g. UHS 15/25 A4

Type countersunk screw **SK**
 UHS 10 - 18 SK
 UHS 10 - 18 SK A4

Type hexagon nut **B**
 UHS 10 - 32 B
 UHS 10 - 24 B A4

Type cap nut **H**
 UHS 10 - 24 H
 UHS 10 - 24 H A4

- 1 Hexagon screw
- 2 Countersunk screw
- 3 Cap nut
- 4 Hexagon nut

- 5 Threaded rod
- 6 Cone nut
- 7 Distance sleeve
- 8 Expansion sleeve

- 9 Plastic sleeve
- 10 Washer
- 11 Conical washer

h_{ef} = Effective anchorage depth
 t_{fix} = Thickness of fixture
 h_1 = Drill hole depth
 h_{min} = Minimal member thickness
 T_{inst} = Installation torque

Upat Sleeve Anchor UHS, UHS-I

Product description
 Installed condition and Anchor types UHS, UHS A4

Annex A 1

UHS 12 M6 I (A4)
 UHS 12 M8 I (A4)
 UHS 15 M10 I (A4)
 UHS 15 M12 I (A4)

- 6 Cone nut
- 8 Expansion sleeve
- 9 Plastic sleeve
- 12 Internal thread bolt

Marking: Identifying mark of the producer, anchor identity nominal drill hole diameter / size of internal thread e. g. UHS 15/M12 I A4

Example of possible Applications UHS-I and UHS-I A4

Annex A 4

Specifications of intended use

Anchorage subject to:

Upat Sleeve Anchor UHS, UHS A4	10	12	15	18	24	28	32
Upat Sleeve Anchor UHS-I, UHS-I A4	-	12	15				
Standard anchorage depth				✓			
Static and quasi-static action load				✓			
Cracked and uncracked concrete				✓			
Fire exposure				✓			
Seismic action for Performance Category C1	-	S, B, H, SK	S, B, H, SK	S, B, H, SK	S, B, H	S, B	S, B

Base materials:

- Reinforced and unreinforced normal weight concrete (cracked and uncracked) according to EN 206-1:2000
- Strength classes C20/25 to C50/60 according to EN 206-1:2000

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions (UHS, UHS A4, UHS-I, UHS-I A4)
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist (UHS A4, UHS-I A4)

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used)

Design:

- Anchorages are to be designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Design of fastenings according to FprEN 1992-4: 2016 and EOTA Technical Report TR 055

Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Hammer or hollow drilling according to Annex B5 and B6
- Drill hole create perpendicular +/- 5° to concrete surface, positioning without damaging the reinforcement

Minimum spacing and minimum edge distances of anchors under fire exposure

Annex B 4

Installation instruction for the Upat Sleeve Anchor
UHS 10 - UHS 32 and UHS 10 A4 - UHS 24 A4

Hollow drilling						Continue with step 3, 4 and 5
						Installation instruction UHS 10 - 32 S and UHS 10-24 S A4
Hammer drilling						Installation instruction UHS 10 - 18 SK and UHS 10-18 SK A4
						Installation instruction UHS 10 - 32 B and UHS 10-24 B A4
						Installation instruction UHS 10 - 24 H and UHS 10-24 H A4
	Step	1	2	3	4	5

Step	Description	
1	Create drill hole with hammer drill	Create drill hole with hollow drill and vacuum cleaner
2	Clean bore hole	-
3	Set anchor	
4	Expand anchor with prescribed installation torque T_{inst}	
5	Finished installation	

Types of drills	
Hammer drill	
Hollow drill	

Upat Sleeve Anchor UHS, UHS-I

Intended Use
 Installation instructions UHS, UHS A4

Annex B 5

Installation instruction for the Upat Sleeve Anchor internal thread
UHS-I and UHS-I A4

Step	Description
1	Create drill hole with hammer drill Clean drill hole Create drill hole with hollow drill and vacuum cleaner
2	Hammering in the anchor flushed with the surface of the concrete
3	Tightening the anchor. Tightening with the included hexagon in the package is preferred. Other tightening methods are allowed. Tighten the anchor into the concrete until the gap U is 3-5 mm or the installation torque is reached. Only one requirement has to be fulfilled.
4	Connecting the fixing and the anchor with a fitting fastener. The length of the fastener should be determined depending on the thickness of fixture t_{fix} , admissible tolerances, and available thread length $l_{s,max}$ and $l_{s,min}$ including the gap U. Tightening the screw with the torque $\leq T_{max}$.

Types of drills	
Hammer drill	
Hollow drill
