

DEKLARACJA WŁAŚCIWOŚCI UŻYTKOWYCH

DoP 0305

dla kotwa wbijana Upat USA (Kotwy metalowe do stosowania w betonie)

PL

1. Niepowtarzalny kod identyfikacyjny typu wyrobu: DoP 0305
2. Zamierzone zastosowanie: Mocowanie w betonie niezarysowanym, zobacz załącznik, w szczególności aneksy B1-B3.
3. Producent: Upat Vertriebs GmbH, Bebelstraße 11, 79108 Freiburg im Breisgau, Niemcy
4. Upoważniony przedstawiciel: -
5. System(-y) oceny i weryfikacji stałości właściwości użytkowych: 1
6. Europejski dokument oceny: EAD 330232-01-0601, Edition 05/2021
Europejska ocena techniczna: ETA-10/0172; 2022-05-11
Jednostka ds. oceny technicznej: DIBt- Deutsches Institut für Bautechnik
Jednostka lub jednostki notyfikowane: 2873 TU Darmstadt
7. Deklarowane właściwości użytkowe:
Wytrzymałość mechaniczna i stabilność osadzenia (BWR 1)
Nośność charakterystyczna na wrywanie (nośności statyczne i quasi-statyczne) Metoda A:
Nośność do uszkodzenia stali: Aneksy C1
Nośność na wrywanie: Aneksy C1
Nośność do wyrwania stożka betonu: Aneksy C1
Solidność: Aneksy C1,C2
Minimalne odstępki osiowe i krawędziowe: Aneksy B2
Odległość od krawędzi zapobiegająca pękaniu pod obciążeniem: Aneksy C1

Nośność charakterystyczna na ścinanie (nośności statyczne i quasi-statyczne), metoda A:
Nośność do uszkodzenia stali (obciążenie ścinające): Aneksy C2
Nośność do uszkodzenia wyważenia: Aneksy C2

Charakterystyczna wytrzymałość dla uproszczonego projektu:
Metoda B: NPD
Metoda C: NPD

Przesunięcia:
Przemieszczenia przy obciążeniu statycznym i quasi-statycznym: Aneksy C3

Nośność charakterystyczna i przemieszczenia w warunkach sejsmicznych dla kategorii C1 i C2:
Nośność na wrywanie, kategoria C1: NPD
Nośność na wrywanie, kategoria C2: NPD
Nośność na ścinanie, kategoria C1: NPD
Nośność na ścinanie, kategoria C2: NPD
Współczynnik szczeliny pierścieniowej: NPD
- Ochrona przeciwpożarowa (BWR 2)**
Reakcja na ogień: Klasy (A1)

Odporność na działanie ognia:
Odporność ogniowa do zniszczenia stali (obciążenie rozciągające): NPD
Odporność ogniowa na wrywanie (obciążenie rozciągające): NPD
Odporność ogniowa na zniszczenie stali (obciążenie ścinające): NPD
- Trwałość:**
Trwałość: Aneksy A3, B1
8. Odpowiednia dokumentacja techniczna lub specjalna dokumentacja techniczna: -

Einfach. Sicher.

Właściwości użytkowe określonego powyżej wyrobu są zgodne z zestawem deklarowanych właściwości użytkowych. Niniejsza deklaracja właściwości użytkowych wydana zostaje zgodnie z rozporządzeniem (UE) nr 305/2011 na wyłączną odpowiedzialność producenta określonego powyżej.

W imieniu producenta podpisał(-a):

Dr.-Ing. Oliver Geibig, Dyrektor Zarządzający ds. Jednostek Biznesowych i Inżynierii
Tumlingen, 2022-06-21

Jürgen Grün, Dyrektor Zarządzający ds. Chemii i Jakości

Niniejsza Deklaracja Właściwości Użytkowych została przygotowana w różnych językach. W razie wątpliwości w interpretacji, wersja angielska jest zawsze miarodajna.

Załącznik zawiera dobrowolne i uzupełniające informacje w języku angielskim (neutralne językowo), a wykraczające poza wymagania prawne.

Specific Part

1 Technical description of the product

The Upat drop-in anchor USA is an anchor made of galvanized or stainless steel which is placed into a drilled hole and anchored by deformation-controlled expansion.

The fixture shall be anchored with a fastening screw or threaded rod.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Characteristic resistance to tension load (static and quasi static action) Method A	See Annex B2 and C1
Characteristic resistance to shear load (static and quasi static action)	See Annex C2
Displacements	See Annex C3
Characteristic resistance and displacements for seismic performance categories C1 and C2	No performance assessed

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Class A1
Resistance to fire	No performance assessed

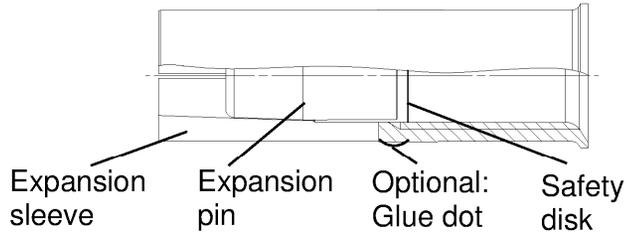

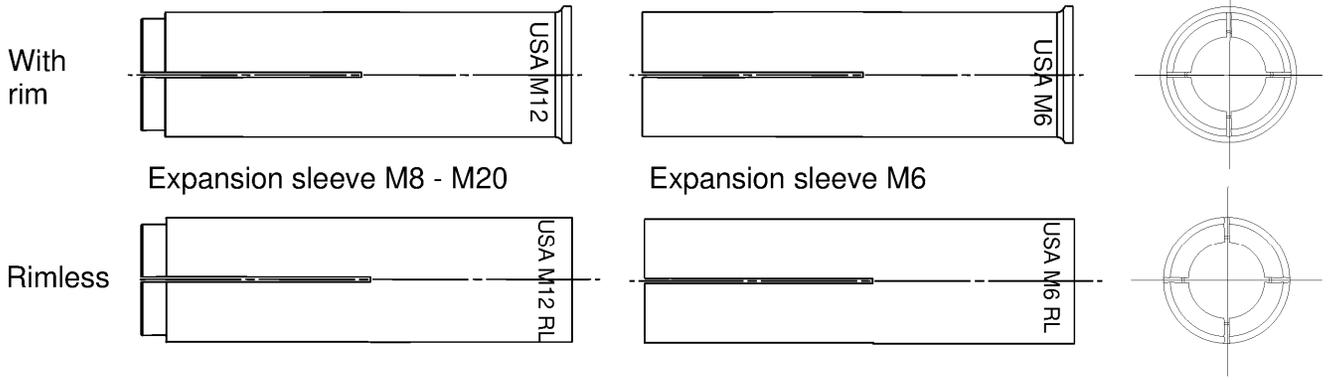

3.3 Aspects of durability linked with the Basic Works Requirements

Essential characteristic	Performance
Durability	See Annex B1

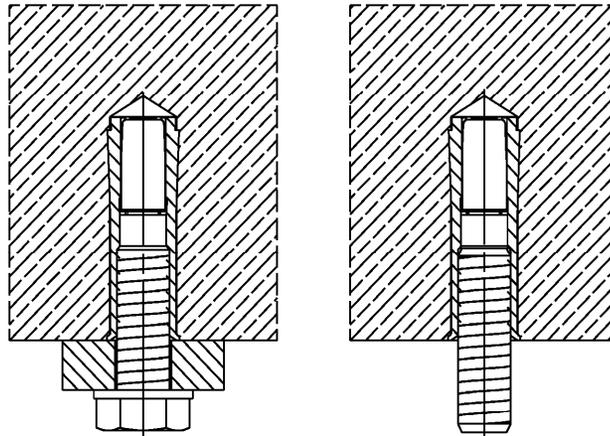

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with the European Assessment Document EAD 330232-01-0601 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

Intended use in concrete

Specifications of intended use

Anchorage subject to:

Upat drop-in anchor USA (all versions)		M6	M8	M10	M12	M16	M20
Hammer drilling with standard drill bit		All types					
Hammer drilling with hollow drill bit with automatic cleaning							
Material	Steel	Zinc plated	✓				
	Stainless	R	✓				
Static and quasi-static loads		✓					
Uncracked concrete		✓					

Base materials:

- Reinforced or unreinforced normal concrete without fibres of strength classes C20/25 to C50/60 according to EN 206:2013+A1:2016

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions: **USA, USA R**
- For all other conditions according to EN 1993-1-4:2006 + A1:2015 corresponding to corrosion resistance class CRC III **USA R**
Anchor types M6x30 R, M8x30 R and M10x30 R only for dry internal exposure

Design:

- Anchorage are to be designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Design of fastenings according to EN 1992-4:2018 and Technical Report TR 055, Edition February 2018
- Anchor sizes M6x30, M8x30 and M10x30 for statically indeterminate structural components only, when in case of failure, the load can be distributed to other fasteners.

Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Create drill hole with hammer drill or with hollow drill and vacuum cleaner
- The anchor may only be used once
- In case of aborted hole: New hole must be drilled at a minimum distance of twice the depth of the aborted hole or closer, if the hole is filled with a high strength mortar (e.g. UPM 66, UPM 55 or UPM 44) and only if the hole is not in the direction of the oblique tensile or shear load
- Anchor expansion by impact using the setting tools given in Annex A 4. The anchor is properly set if the stop of the setting tool reaches the expansion sleeve. The manual setting tool with installation control leaves a visible mark on the sleeve, as illustrated in Annex A 4 and B 3

1) No performance assessed

Fastening screw or threaded rod:

- Minimum property class and materials according to table A3.1
- The length of the fastening screw or threaded rod shall be determined depending on thickness of fixture t_{fix} , admissible tolerances and maximum screw-in depth $l_{s,max}$ as well as minimum screw-in depth $l_{s,min}$
