## PRESTANDADEKLARATION

### DoP 0264

för Upat Drop-in Anchor USA (Metallankare för användning i betong)

SV

1. Produktytrens unika identifikationskod: **DoP 0264**

2. Avsedd användning/avsedda användningar: **Infästning i efterhand i osprucken betong, se bilaga, särskilt bilagor B1 - B4.**

3. Tillverkare: **Upat Vertriebs GmbH, Bebelstraße 11, 79108 Freiburg im Breisgau, Tyskland**

4. Tillverkarens representant: **-**

5. System för bedömning och fortlöpande kontroll av prestanda: **1**

6. Europeiskt bedömningsdokument: **EAD 330232-00-0601**

Europeisk teknisk bedömninng: **ETA-10/0172; 2017-04-25**

Tekniskt bedömningsorgan: **DIBt- Deutsches Institut für Bautechnik**

Anmält/anmällda organ: **2873 TU Darmstadt**

7. Angiven prestanda:

#### Mekanisk hållfasthet och stabilitet (BWR 1)

##### Karakteristisk bär förmåga för spänning (för statisk och kvasi-statisk belastning):

Stålets motståndskraft: Bilagor C1

$E_s = 210\ 000 \text{ MPa}$

Motstånd mot att skruven dras ut: Bilagor C1

Motstånd i betongkronen: Bilagor C1

Kraftighet: Bilagor C1

Minsta kant- och axelavstånd: Bilagor B2

Kantavstånd för att slippa sprickor under last: Bilagor C1

$N_{Rk,sp}^0 = NPD$

##### Karakteristisk bär förmåga för skjutning (för statisk och kvasi-statisk belastning):

Motstånd i stålet (tvärlast): Bilagor C2

Motstånd mot fläckning: Bilagor C3

Motstånd mot skador i betong: Bilagor C3

Förskjutningar under statisk och kvasistatisk belastning: Bilagor C4

Hållbarhet: Bilagor A3, B1

##### Karakteristiskt motstånd och Förskjutningar för seismiska prestandakategorier C1 och C2:

Motstånd i stålet: NPD

Motstånd mot utdrag: NPD

Brottjötning: NPD

Faktor cirkulärt hål: NPD

Förskjutningar: NPD

#### Säkerhet vid brand (BWR 2)

Reaktion vid brand: Klass (A1)

##### Motståndskraft mot eld:

Brandmotstånd i stålet (tvärlast): NPD

Brandmotstånd mot utdrag (draglast): NPD

Brandmotstånd i stålet (tvärlast): NPD

8. Lämplig teknisk dokumentation och/eller särskild teknisk dokumentation: **-**

Prestandan för ovanstående produkt överensstämmer med den angivna prestandan. Denna prestandadeklaration har utfärdats i enlighet med förordning (EU) nr 305/2011 på eget ansvar av den tillverkare som anges ovan.

Undertecknad på tillverkarens vägnar av:

Dr.-Ing. Oliver Geibig, Verkställande direktör affärsheter och teknik  
Tumlingen, 2021-01-12

Jürgen Grün, Verkställande direktör kemi och kvalitet

Denna DoP har förberets på olika språk. I händelse av tvist om tolkningen ska den engelska versionen alltid råda.

Bilagan innehåller frivilliga och kompletterande information på engelska som överskrider (det specifika språkets) lagkrav.

## **Specific Part**

### **1 Technical description of the product**

The Upat Drop-in Anchor USA is an anchor made of galvanized or stainless steel which is placed into a drilled hole and anchored by deformation-controlled expansion.

The fixture shall be anchored with a fastening screw or threaded rod.

The product description is given in Annex A.

### **2 Specification of the intended use in accordance with the applicable European Assessment Document**

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

### **3 Performance of the product and references to the methods used for its assessment**

#### **3.1 Mechanical resistance and stability (BWR 1)**

<b>Essential characteristic</b>	<b>Performance</b>
Characteristic resistance for static and quasi-static loading, displacements	See Annex C 1 to C 4

#### **3.2 Safety in case of fire (BWR 2)**

<b>Essential characteristic</b>	<b>Performance</b>
Reaction to fire	Anchorages satisfy requirements for Class A1
Resistance to fire	No performance assessed

### **4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base**

In accordance with European Assessment Documents EAD No. 330232-00-0601 the applicable European legal act is: [96/582/EC].

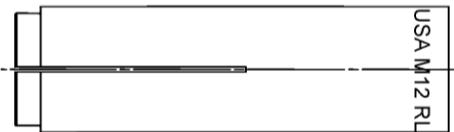

The system to be applied is: 1

**Annex A 3**

Appendix 4 / 12

## Specifications of Intended use

### Anchorage subject to:

- Static and quasi-static loads

### Base materials:

- Reinforced or unreinforced normal weight concrete according to EN 206-1:2000
- Strength classes C20/25 to C50/60 according to EN 206-1:2000
- Non-cracked concrete: all sizes

### Use conditions (Environmental conditions):

- Structures subject to dry internal conditions (zinc coated steel or stainless steel)
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel)

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used)

### Design:

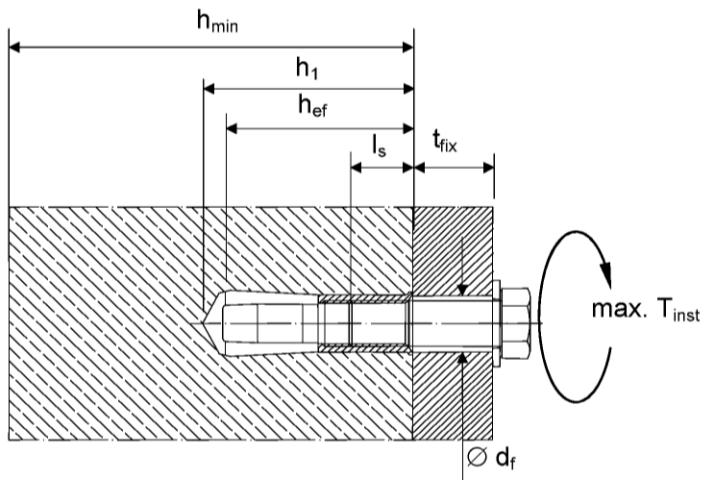

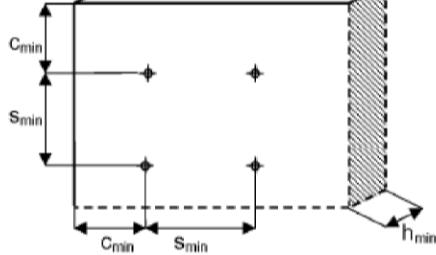

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are prepared taking into account the loads to be anchored. The position of the anchor is indicated on the design drawings (e. g. position of the anchor relative to reinforcement or to supports, etc.)
- Design of fastenings in accordance to FprEN 1992-4:2016 and EOTA Technical Report TR 055.
- Fasteners can be used as a single fixing for use in structural application.

### Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Create drill hole with hammer drill or with hollow drill and vacuum cleaner
- The anchor may only be used once
- In case of aborted hole: New hole must be drilled at a minimum distance of twice the depth of the aborted hole or closer, if the hole is filled with a high strength mortar and only if the hole is not in the direction of the oblique tensile or shear load
- Anchor expansion by impact using the setting tools given in Annex B 3. The anchor is properly set if the stop of the setting tool reaches the expansion sleeve. The manual setting tool with installation control leaves a visible mark on the sleeve, as illustrated in Annex B 3 and B 4

**Table B2: Installation parameters for concrete C20/25 to C50/60**

Minimum edge distance	$c_{min}$	[mm]	115	115	140	150	200		240	280	

Fastening screw or threaded rod:

- Minimum property class and materials according to table A1
- The length of the fastening screw or threaded rod shall be determined depending on thickness of fixture  $t_{fix}$ , admissible tolerances and maximum screw length  $l_{s,max}$  as well as minimum screw-in depth  $l_{s,min}$

## Installation instructions

### No. Description

- 1 Create drill hole with hammer drill or with hollow drill and vacuum cleaner
- 2 Clean from drill-dust
- 3 Set anchor till anchor is flush with surface of concrete
- 4 Expand the sleeve by driving the pin into the sleeve and control the correct setting
- 5 Fixation of fixture. Maximum installation torque max.  $T_{inst}$  must not be crossed
