DÉCLARATION DES PERFORMANCES

DoP 0265

pour cheville à frapper fischer Upat USA (fixation mécanique pour utilisation dans le béton) FR

1.	Code d'identification unique du type de produit:	**DoP 0265**
2.	Usage(s) prévu(s):	**Fixation dans le béton pour les systèmes redondants non structurels, voir annexes, en particulier les annexes B1 - B3.**
3.	Fabricant:	**Upat Vertriebs GmbH, Bebelstraße 11, 79108 Freiburg im Breisgau, Allemagne**
4.	Mandataire:	**–**
5.	Système(s) d'évaluation et de vérification de la constance des performances:	**2+**
6.	Document d'évaluation européen:	**ETAG 001, Part 6, January 2011, utilisé en tant que DEE**
	Evaluation Technique Européenne:	**ETA-10/0168; 2017-05-11**
	Organisme d'évaluation technique:	**DIBt- Deutsches Institut für Bautechnik**
	Organisme(s) notifié(s):	**2873 TU Darmstadt**

7. Performance(s) déclarée(s):

Sécurité d'utilisation (BWR 4)

Résistance caractéristique à la charge de traction (charge statique et quasi-statique):

Résistance à la rupture de l'acier:	NPD	
Résistance à l'extraction glissement:	NPD	
Résistance à la rupture du cône béton:	NPD	
Robustesse:	Annexe C1	
Distance au bord et entraxe mini:	Annexes B2, B3	
Distance au bord pour éviter la rupture par fendage sous charge:	NPD	

Résistance caractéristique à la charge de cisaillement (charge statique et quasi-statique):

Résistance à la rupture de l'acier (charge de cisaillement):	Annexes C1, C2	$V_{Rk,s}$=NPD; k_7=NPD
Résistance à la rupture par effet de levier :	NPD	
Résistance à la rupture du béton en bord de dalle:	NPD	

Résistance caractéristique pour toutes les directions de charges et modes de ruine pour dimensionnement simplifié:

Résistance caractéristique:	Annexes C1, C2

Durabilité:

Durabilité:	Annexes A3, B1

Sécurité en cas d'incendie (BWR 2)

Réaction au feu:	Classe (A1)

Résistance au feu:

Résistance en cas d'incendie, rupture de l'acier (charge de traction) :	NPD
Résistance en cas d'incendie, extraction glissement (charge de traction) :	NPD
Résistance en cas d'incendie, rupture de l'acier (charge de cisaillement) :	NPD
Résistance en cas d'incendie pour toutes les directions de charges et modes	Annexe C3

8. Documentation technique appropriée et/ou documentation technique spécifique: **–**

Les performances du produit identifié ci-dessus sont conformes aux performances déclarées. Conformément au règlement (UE) no 305/2011, la présente déclaration des performances est établie sous la seule responsabilité du fabricant mentionné ci-dessus.

Signé pour le fabricant et en son nom par:

Dr.-Ing. Oliver Geibig, Directeur Général Business Units & Ingénierie

Jürgen Grün, Directeur Général Chimie & Qualité

Tumlingen, 2021-01-12

Cette DoP a été préparée en plusieurs langues. En cas de différend relatif à l'interprétation, la version anglaise prévaudra.

L'annexe comprend des informations volontaires et complémentaires en langue anglaise dépassant les exigences légales (spécifiées de manière neutre).

Specific Part

1 Technical description of the product

The Upat Drop-in Anchor USA is an anchor made of galvanized or stainless steel which is placed into a drilled hole and anchored by deformation-controlled expansion.

The fixture shall be anchored with a fastening screw or threaded rod.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

The essential characteristics regarding Mechanical resistance and stability are included under the Basic Works Requirement Safety in use.

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorages satisfy requirements for Class A1
Resistance to fire	See Annex C 3

3.3 Safety in use (BWR 4)

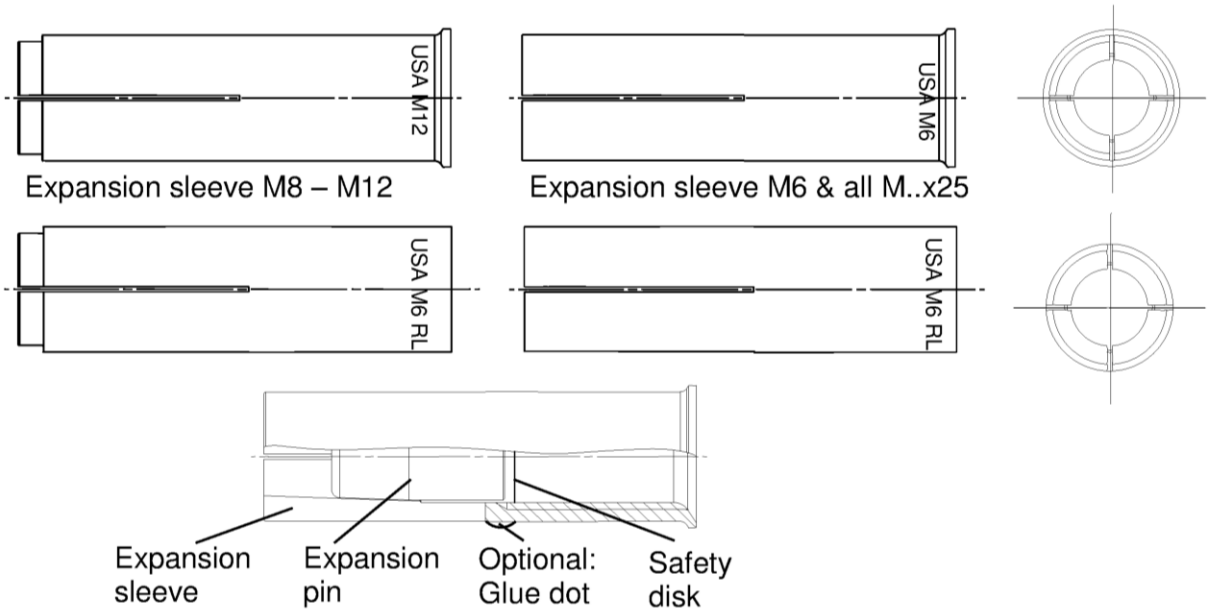
Essential characteristic	Performance
Characteristic resistance for static and quasi-static loading, displacements	See Annex C 1 to C 2

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

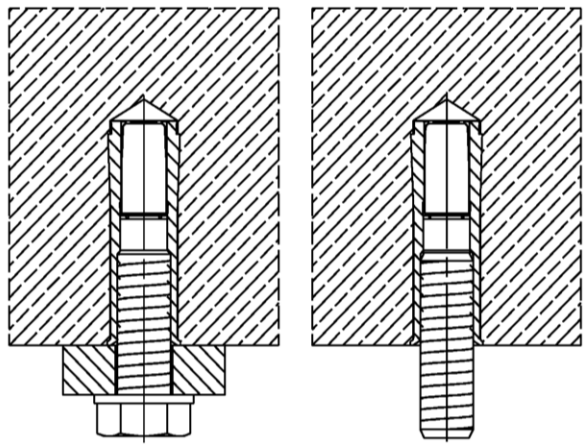
In accordance with guideline for European technical approval ETAG 001, January 2011 used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011 the applicable European legal act is: [97/161/EC].

The system to be applied is: 2+

Multiple use for non-structural applications only



Intended use in concrete



Intended use in precast pre-stressed hollow concrete slabs (w/e ≤ 4,2) with a flange thickness ≥ 35 (or 30 mm → see Annex C2) and only for h_{ef} = 25 mm

Table A1: Materials

	Material	
Designation	galvanised steel (≥ 5 µm)	stainless steel
Expansion sleeve	EN 10277:2008 or EN 10084:2008 or EN 10111:2008 or EN 10263:2001 or EN 10087:1998 or ASTM A29/A29M	EN 10088:2005
Expansion pin		
Fastening screw or threaded rod	steel, property class 4.6, 5.6, 5.8 or 8.8 according to EN ISO 898-1:2012	property class 50, 70 or 80 according EN ISO 3506:2009

Specifications of intended use

Anchorages subject to:

- Static and quasi-static loads
- Only to be used for multiple use for non-structural application
- Fire exposure: only in concrete C12/15 to C50/60, not prestressed hollow concrete slabs

Base materials:

- Reinforced or unreinforced normal weight concrete according to EN 206-1:2000
- Strength classes C12/15 to C50/60 according to EN 206-1:2000
- Precast prestressed hollow concrete slabs with w/e ≤ 4,2 and strength classes C30/37 to C50/60: M6x25, M8x25, M10x25 and M12x25
- Cracked concrete and non-cracked concrete: all sizes

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions
  (zinc coated steel or stainless steel)
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist
  (stainless steel)

  Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used)

Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e. g. position of the anchor relative to reinforcement or to supports, etc.)
- Anchorages under static or quasi-static actions are to be designed in accordance with:
  - ETAG 001, Annex C, design method B and C, Edition August 2010 or
  - CEN/TS 1992-4:2009, design method B
- Fasteners are only to be used for multiple use for non-structural application, according to:
  ETAG 001 Part 6, Edition August 2010
- Anchorages under fire exposure are designed in accordance with:
  - EOTA Technical Report TR 020, Edition May 2004
  - CEN/TS 1992-4:2009
  - It must be ensured that local spalling of the concrete cover does not occur

Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Create drill hole with hammer drill or with hollow drill and vacuum cleaner
- The anchor may only be used once
- Anchor expansion by impact using the setting tools given in Annex B 4. The anchor is property set if the stop of the setting tool reaches the expansion sleeve. The manual setting tool with installation control leaves a visible mark on the sleeve, as illustrated in Annex B4 and B 5

Table B1: Installation parameters for concrete C12/15 to C50/60

Anchor size			M6		M8			M10			M12		M12D
Nominal drill hole diameter	d_0	[mm]	8		10			12			15		16

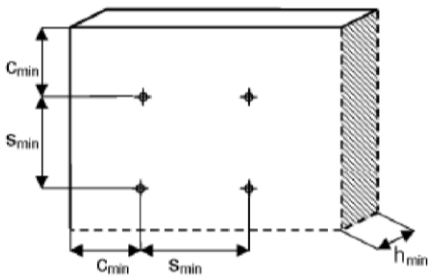
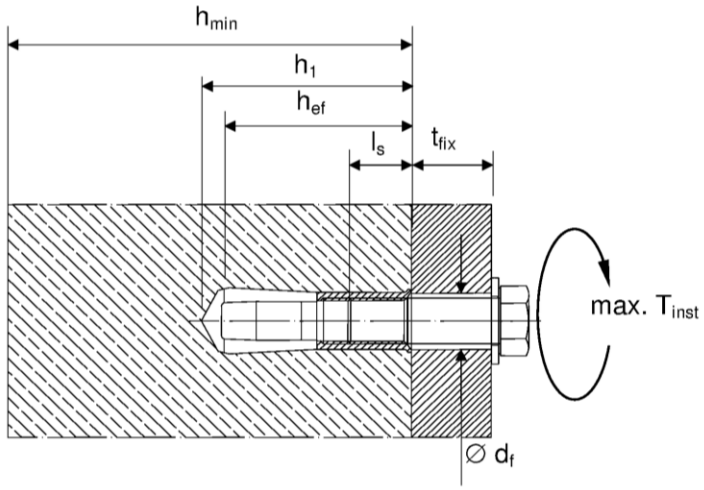
Maximum installation torque	max. T_{inst}	[Nm]	4		8			15			35		
Minimum drill hole depth	h_1	[mm]	27	32	27	33	43	27	33	43	27	54	54
Minimum screw-in depth	$l_{s,min}$	[mm]	6		8			10			12		
Maximum screw-in depth	$l_{s,max}$	[mm]	14		14			14		17	14	22	
Clearance hole diameter	$\varnothing d_f \leq$	[mm]	7		9			12			14		
h_{min} = 80 mm													
Minimum spacing	s_{min}	[mm]	30	70	70	110	200	80	200		100	-	-
Minimum edge distance	c_{min}	[mm]	60	150	100	150		120	150		130	-	-
h_{min} = 100 mm													
Minimum spacing	s_{min}	[mm]	30	65	50	70		60	90	150	100	200	
Minimum edge distance	c_{min}	[mm]	60	115	100	115		100	160	180	110		
h_{min} = 120 mm													
Minimum spacing	s_{min}	[mm]	30	65	50	70		60	85	95	100	145	
Minimum edge distance	c_{min}	[mm]	60	115	100	115		100	140	150	110	200	



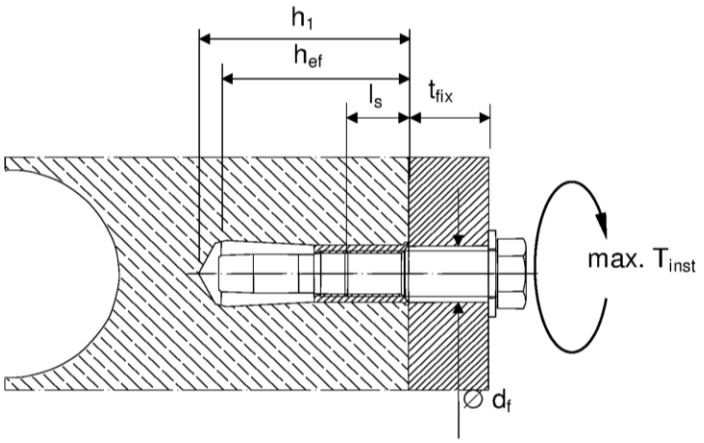


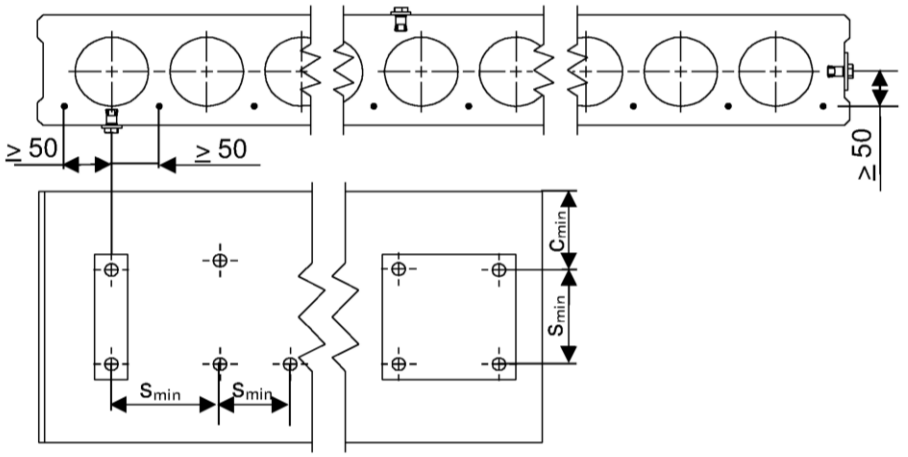
Fastening screw or threaded rod:

- Minimum property class and materials according to table A1
- The length of the fastening screw or threaded rod shall be determined depending on thickness of fixture t_{fix}, admissible tolerances and maximum screw length $l_{s,max}$ as well as minimum screw-in depth $l_{s,min}$.

Table B2: Installation parameters for precast pre-stressed hollow concrete slabs

Anchor size			M6	M8	M10	M12
Nominal drill hole diameter	d_0	[mm]	8	10	12	15
Effective anchorage depth	h_{ef}	[mm]	25			
Maximum installation torque	max. T_{inst}	[Nm]	4	8	15	35
Minimum drill hole depth	h_1	[mm]	27			
Minimum screw-in depth	$l_{s,min}$	[mm]	6	8	10	12
Maximum screw-in depth	$l_{s,max}$	[mm]	14			
Clearance hole diameter	$\varnothing d_f$	[mm]	7	9	12	14
Minimum spacing	$s_{min} = s_{cr}$	[mm]	200			
Minimum edge distance	$c_{min} = c_{cr}$	[mm]	150			





Fastening screw or threaded rod:

- Minimum property class and materials according to table A1
- The length of the fastening screw or threaded rod shall be determined depending on thickness of fixture t_{fix}, admissible tolerances and maximum screw length $l_{s,max}$ as well as minimum screw-in depth $l_{s,min}$.

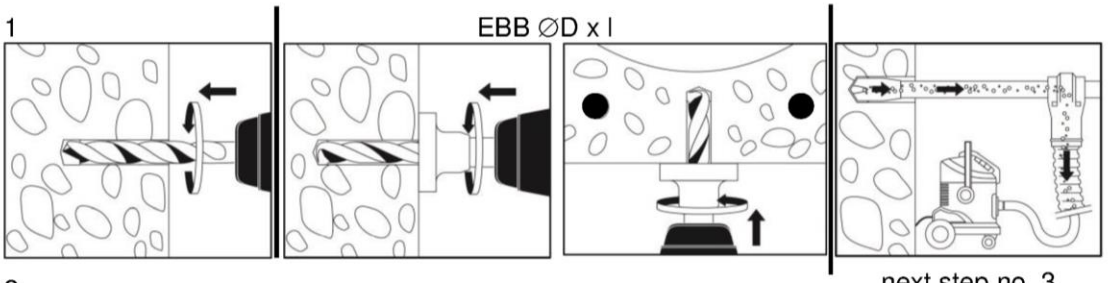
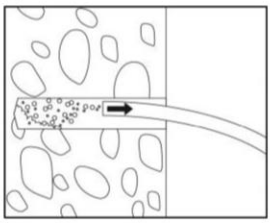
Installation instructions

1



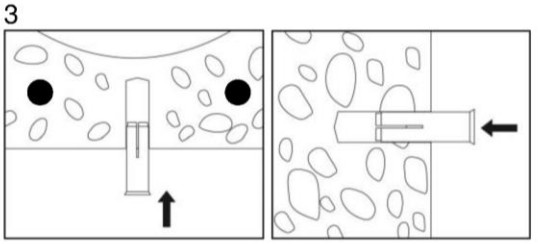
next step no. 3

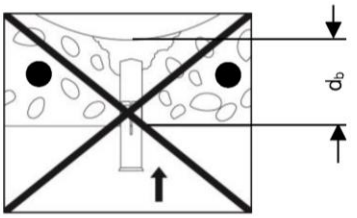
2



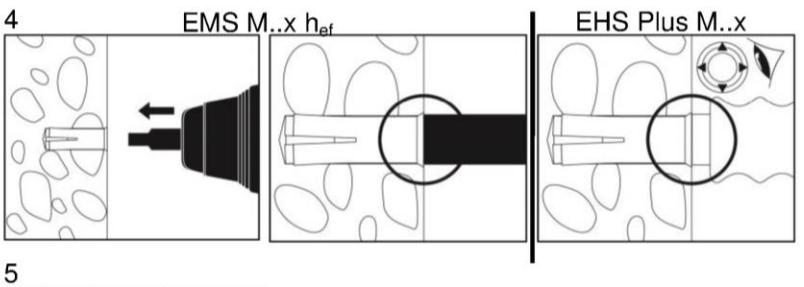
Fixing is not allowed for h_{ef} = 25 mm and d_b < 35 mm when a cavity is cut!

3

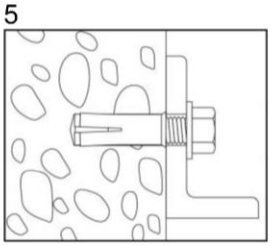




4



5



No.	Description
1	Create drill hole with hammer drill or with hollow drill and vacuum cleaner
2	Clean from drill-dust
3	Set anchor till anchor is flush with surface of concrete
4	Expand the sleeve by driving the pin into the sleeve and control the correct setting
5	Fixation of fixture. Maximum installation torque max. T_{inst} must not be crossed

Table C1: Characteristic values due to design method B according to ETAG 001, Annex C or design method B according to CEN/TS 1992-4: 2009

Anchor size		Property class screw / rod	**M6**		**M8**			**M10**			**M12/ M12D**
