

DECLARACIÓN DE PRESTACIONES

DoP 0422

para el sistema de inyección de fischer FIS VB (Anclaje químico para uso en hormigón)

ES

1. Código de identificación única del producto tipo:

DoP 0422
2. Usos previstos:

Fijación a posteriori en hormigón fisurado y no fisurado, véase el apéndice, especialmente los anexos B1 - B11.
3. Fabricante:

fischerwerke GmbH & Co. KG, Otto-Hahn-Straße 15, 79211 Denzlingen, Alemania
4. Representante autorizado:

—
5. Sistemas de evaluación y verificación de la constancia de las prestaciones (EVCP):

1
6. Documento de evaluación europeo:

EAD 330499-02-0601; 2022-09 (Decision (EU) 2024/1944 )

Evaluación técnica europea:

ETA-24/0274; 2026-08-19

Organismo de evaluación técnica:

1020, TZUS - TECHNICKY A ZKUSEBNI USTAV STAVEBNI PRAHA s.p.

Organismos notificados:

2873, Technische Universität Darmstadt, Institut für Stahlbau und Werkstoffmechanik
7. Prestaciones declaradas:

Resistencia mecánica y estabilidad (BWR 1)

Resistencia característica a tracción (carga estática y cuasi-estática):

1) Resistencia de rotura del acero: véase el apéndice, especialmente los anexos C1, C2

2) Resistencia para la combinación de rotura por cono de hormigón y extracción: véase el apéndice, especialmente anexo C4

3) Resistencia de rotura por cono de hormigón: véase el apéndice, especialmente anexo C3

4) Distancia al borde para evitar la rotura del acero sometido a carga: véase el apéndice, especialmente anexo C3

5) Robustez: véase el apéndice, especialmente los anexos C3, C4

6) Par máximo de montaje: véase el apéndice, especialmente los anexos B3, B4

7) Distancia mínima entre el borde y el centro, Espesor de la base de anclaje: véase el apéndice, especialmente los anexos B3 - B5

Resistencia característica a cortante (carga estática y cuasi-estática):

8) Resistencia de rotura del acero: véase el apéndice, especialmente los anexos C1, C2

9) Resistencia falla por arrancamiento lateral: véase el apéndice, especialmente anexo C3

10) Resistencia de rotura del hormigón al borde: véase el apéndice, especialmente anexo C3

Desplazamientos bajo carga a corto y largo plazo:

11) Desplazamientos bajo carga a corto y largo plazo: véase el apéndice, especialmente anexo C5

12) Resistencia del hormigón reforzado con fibras de acero: NPD

Resistencia y desplazamientos característicos para las categorías sísmicas C1 y C2:

13) Resistencia a carga de tracción, categoría C1: NPD

14) Resistencia a carga de tracción, categoría C2: NPD

15) Resistencia a esfuerzo cortante, categoría C1: NPD

16) Resistencia a esfuerzo cortante, categoría C2: NPD

Seguridad en caso de incendio (BWR 2)

17) Reacción al fuego: Clase (A1)

Resistencia al fuego:

18) Resistencia al fuego, rotura del acero (carga de tracción): NPD

19) Resistencia de la adherencia en condiciones de incendio: NPD

20) Resistencia al fuego, rotura del acero (esfuerzo cortante): NPD

Higiene, salud y medio ambiente (BWR 3)

21) Contenido, emisión y/o desprendimiento de sustancias peligrosas: NPD

8. Documentación técnica adecuada o documentación técnica específica:

—
- Las prestaciones del producto identificado anteriormente son conformes con el conjunto de prestaciones declaradas. La presente declaración de prestaciones se emite, de conformidad con el Reglamento (UE) no 305/2011, bajo la sola responsabilidad del fabricante arriba identificado.
- Firmado por y en nombre del fabricante por:
- i.v.
- Dr. Christian Weber, Director de Desarrollo
- 
- Dieter Pfaff, Jefe de la Federación Internacional de Producción y Gestión de Calidad
- Tumlingen, 2026-10-01
- Esta DdR se ha preparado en distintos idiomas. En caso de que haya alguna controversia sobre la interpretación prevalecerá siempre la versión inglesa. El Apéndice incluye información voluntaria y complementaria en idioma inglés que excede los requisitos legales (de idioma neutral).
- Fischer DATA DOP\_EC\_s\_V114.xlsm
- 1 / 1

## Specific parts

### 1. Technical description of the product

The fischer injection system FIS VB for uncracked concrete is a bonded anchor consisting of a cartridge with injection mortar and a steel element. The steel element is galvanized or stainless steel threaded rod.

The steel element is placed into a drilled hole filled with injection mortar and is anchored via the bond between metal part, injection mortar and concrete.

The illustration and the description of the product are given in Annex A.

### 2. Specification of the intended use in accordance with the applicable European Assessment Document (hereinafter EAD)

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The provisions made in this European Technical Assessment are based on an assumed working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the products in relation to the expected economically reasonable working life of the works.

### 3. Performance of the product and references to the methods used for its assessment

#### 3.1 Mechanical resistance and stability (BWR 1)

| Essential characteristic                                                                 | Performance             |
|------------------------------------------------------------------------------------------|-------------------------|
| Characteristic resistance to tension load (static and quasi-static loading)              | Annex C1 to C4          |
| Characteristic resistance to shear load (static and quasi-static loading)                | Annex C1 to C3          |
| Displacements under short term and long term loading                                     | Annex C5                |
| Characteristic resistance and displacements for seismic performance categories C1 and C2 | No performance assessed |

#### 3.2 Safety in case of fire (BWR 2)

| Essential characteristic | Performance                                       |
|--------------------------|---------------------------------------------------|
| Reaction to fire         | Satisfy the requirements for performance class A1 |
| Resistance to fire       | No performance assessed                           |

#### 3.3 Hygiene, health and environment (BWR 3)

No performance assessed.

### 4. Assessment and verification of constancy of performance (hereinafter AVCP) system applied, with reference to its legal base

According to the Decision 96/582/EC of the European Commission the system of assessment verification of constancy of performance (see Annex IX to Regulation (EU) 2024/3110) is system 1.

## Installation conditions part 1

fischer Anchor rod FIS A / RG (Anchor rod) and  
commercial standard Threaded rod (Threaded rod)

### Pre-positioned installation

### Push-through installation (annular gap filled with mortar)

### Pre-positioned or push-through installation with subsequently injected fischer filling disc (annular gap filled with mortar)

Figures not to scale

$h_0$  = drill hole depth

$h_{ef}$  = effective embedment depth

$t_{fix}$  = thickness of fixture

fischer injection system FIS VB

## Overview system components part 1

### Injection cartridge (shuttle cartridge) with sealing cap; Sizes: 360 ml, 825 ml

### Injection cartridge (coaxial cartridge) with sealing cap; Sizes: 100 ml, 150 ml, 300 ml, 380 ml, 410 ml Injection cartridge (foilbag cartridge) with sealing cap; Sizes: 100 ml, 150 ml, 300 ml

### Static mixer FIS MR Plus for injection cartridges up to 825 ml

### Static mixer FIS JMR for injection cartridges of 825 ml

### Injection adapter and extension tube Ø 9 for static mixer FIS MR Plus; Injection adapter and extension tube Ø 9 or Ø 15 for static mixer FIS JMR

### Cleaning brush BS

### Blow-out pump AB G

### Compressed-air cleaning tool ABP

Figures not to scale

fischer injection system FIS VB

#### Product description

Overview system components part 1;  
cartridges / static mixer / cleaning tools / injection adapter

**Annex A3**

Appendix 4 / 22

## Overview system components part 2

### Anchor rod / Threaded rod

Size: M8, M10, M12, M16, M20

### fischer FIS IG

Size: M5, M6, M8, M10, M12

### Screw / Anchor rod / Threaded rod / washer / hexagon nut

### fischer filling disc with injection adapter

### fischer centering clip DD-S / DD-E

Figures not to scale

### fischer injection system FIS VB

#### Product description

Overview system components part 2; metal parts, fischer centering clip, injection adapter

#### Annex A4

Appendix 5 / 22

**Table A5.1: Materials**

| Part                                    | Designation                                                               | Material                                                                                                                                                                                                      |                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                     |

## Specifications of intended use part 2

### Base materials:

- Compacted reinforced or unreinforced normal weight concrete without fibres of strength classes C20/25 to C50/60 according to EN 206.

### Use conditions (Environmental conditions):

- Fastener intended for use in structures subject to dry, internal conditions (all materials).
- For all other conditions according to EN 1993-1-4 corresponding to corrosion resistance classes to **Annex A5 Table A5.1**.

### Design:

- Fastenings are designed in accordance with EN 1992-4.
- The structural design is conducted under responsibility of a designer experienced in the field of anchorages and concrete works.
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the fastener is indicated on the design drawings (e.g. position of the fastener relative to reinforcement or to supports, etc.).

### Installation:

- Fastener installation is to be carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site.
- Fastening depth should be marked and adhered to installation.
- Overhead installation is allowed (necessary equipment see installation instruction).

| Steel zinc plated PC <sup>1)</sup> 8.8                 | • or + | Steel hot-dip PC <sup>1)</sup> 8.8                     | • |
| High corrosion resistant steel HCR PC <sup>1)</sup> 50 | •      | High corrosion resistant steel HCR PC <sup>1)</sup> 70 | - |
| High corrosion resistant steel HCR PC <sup>1)</sup> 80 | (      | Stainless steel R property class 50                    | ~ |
| Stainless steel R property class 80                    | *      |                                                        |   |

Alternatively: Colour coding according to DIN 976-1

<sup>1)</sup> PC = property class

#### Installation conditions:

#### Threaded rods, washers and hexagon nuts may also be used if the following requirements are fulfilled:

- Materials, dimensions and mechanical properties according to **Annex A5, Table A5.1**.
  - Inspection certificate 3.1 according to EN 10204:2004, the documents have to be stored.
  - Setting depth is marked.
  - Hot-dip galvanized steel
- Steel load-bearing capacities for hot-dip galvanised parts are only valid if the threaded rod and nut are correctly paired. The strength class of the nut must be one strength class higher than that of the threaded rod ( $\geq M12$  in combination with tolerance class 6AX in accordance with EN ISO 10684 two strength classes higher). The pairing of undersized threaded rods (additional designation U according to EN ISO 10684) with oversized nuts (additional designation Z or X according to EN ISO 10684) is not permitted under any circumstances.

**Splitting failure** for minimum edge distance and spacing in dependence of the effective embedment depth  $h_{ef}$ .

For the calculation of minimum spacing and minimum edge distance of anchors in combination with different embedment depths and thicknesses of concrete members the following equation shall be fulfilled:

$$A_{sp,req} < A_{sp,t}$$

$A_{sp,req}$  = required projecting area

$A_{sp,t}$  = projecting area (according to **Annex B6**)

fischer injection system FIS VB

| fischer centering clip DD-S / DD-E   |            |      | M12                               | M16  | M20              |
| fischer centering clip DD-S          | $h_{DD-S}$ | [mm] | 6,5                               | 8,0  | 9,0              |
| fischer centering clip DD-E          | $h_{DD-E}$ | [mm] | 12,0                              | 13,5 | 18,0             |
| Drill hole depth                     | $h_0$      | [mm] | $h_0 \geq h_{nom} + 3 \text{ mm}$ |      |                  |
| Overall fastener embedment depth     | $h_{nom}$  | [mm] | $h_{nom} \leq h_{ef,max}$         |      |                  |
| Minimum thickness of concrete member | $h_{min}$  | [mm] | $h_{nom} + 30 (\geq 100)$         |      | $h_{nom} + 2d_0$ |

The uppermost DD-S clip should be positioned approx. 5 - 10 mm below the concrete surface.  
The effective embedment depth  $h_{ef}$  is calculated as follows when using the DD-S / DD-E clips.

$$h_{ef} = h_{nom} - h_{DD-E} - n \cdot h_{DD-S} \quad n = \text{number of DD-S clips used}$$
