

## DECLARACIÓN DE PRESTACIONES

### DoP 0328

para el anclaje de impacto fischer Zykon FZEA II (anclaje mecánico para uso en hormigón)

ES

1. <u>Código de identificación única del producto tipo:</u>	DoP 0328
2. <u>Usos previstos:</u>	Fijación a posteriori en hormigón fisurado y no fisurado, véase el apéndice, especialmente los anexos B1 - B3.
3. <u>Fabricante:</u>	fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Alemania
4. <u>Representante autorizado:</u>	-
5. <u>Sistemas de evaluación y verificación de la constancia de las prestaciones (EVCP):</u>	1
6. <u>Documento de evaluación europeo:</u>	EAD 330232-01-0601, Edition 05/2021 Evaluación técnica europea: ETA-06/0271; 2023-03-23 Organismo de evaluación técnica: DIBt- Deutsches Institut für Bautechnik Organismos notificados: 2873 TU Darmstadt

#### 7. Prestaciones declaradas:

##### **Resistencia mecánica y estabilidad (BWR 1)**

###### **Resistencia característica a tracción (carga estática y quasi-estática) Método A:**

Resistencia de rotura del acero: Anexo C1  
Résistance à la rupture par extraction glissement: Anexo C1  
Resistencia de rotura por cono de hormigón: Anexo C1  
Robustez: Anexos C1, C2  
Distancia mínima entre el borde y el centro: Anexos B2, C1  
Distancia al borde para evitar la rotura del acero sometido a carga: Anexo C1

###### **Resistencia característica a cortante (carga estática y quasi-estática), Method A:**

Resistencia de rotura del acero (esfuerzo cortante): Anexo C2  
Resistencia falla por arrancamiento lateral: Anexo C2

###### **Resistencia característica para diseño simplificado:**

Método B: NPD  
Método C: NPD

###### **Desplazamientos:**

Desplazamiento por carga estática y quasi-estática: Anexo C4

###### **Resistencia y desplazamientos característicos para las categorías sísmicas C1 y C2:**

Resistencia a carga de tracción, desplazamientos, categoría C1: NPD  
Resistencia a carga de tracción, desplazamientos, categoría C2: NPD  
Resistencia a esfuerzo cortante, desplazamientos, categoría C1: NPD  
Resistencia a esfuerzo cortante, desplazamientos, categoría C2: NPD  
Factor espacio anular: NPD

##### **Seguridad en caso de incendio (BWR 2)**

Reacción al fuego: Clase (A1)

###### **Resistencia al fuego:**

Resistencia al fuego, rotura del acero (carga de tracción): Anexo C3  
Resistencia al fuego, a la extracción (carga de tracción): Anexo C3  
Resistencia al fuego, rotura del acero (esfuerzo cortante): Anexo C3

###### **Durabilidad:**

Durabilidad: Anexos A2, B1

8. Documentación técnica adecuada o documentación técnica específica:	-
---	---

Las prestaciones del producto identificado anteriormente son conformes con el conjunto de prestaciones declaradas. La presente declaración de prestaciones se emite, de conformidad con el Reglamento (UE) no 305/2011, bajo la sola responsabilidad del fabricante arriba identificado.

Firmado por y en nombre del fabricante por:

Dr.-Ing. Oliver Geibig, Director General Unidades de Negocio e Ingeniería  
Tumlingen, 2023-03-31

Jürgen Grün, Director General de Química y Calidad

Esta DdR se ha preparado en distintos idiomas. En caso de que haya alguna controversia sobre la interpretación prevalecerá siempre la versión inglesa.

El Apéndice incluye información voluntaria y complementaria en idioma inglés que excede los requisitos legales (de idioma neutral).

## **Specific Part**

### **1 Technical description of the product**

The fischer Zykron-Hammerset anchor FZEA II is an anchor made of galvanised or stainless or high corrosion resistant steel which is placed in an undercut hole and anchored by mechanical interlock with displacement-controlled installation.

The product description is given in Annex A.

### **2 Specification of the intended use in accordance with the applicable European Assessment Document**

The performances given in Section 3 are only valid if the fastener is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the fastener of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

### **3 Performance of the product and references to the methods used for its assessment**

#### **3.1 Mechanical resistance and stability (BWR 1)**

<b>Essential characteristic</b>	<b>Performance</b>
Characteristic resistance to tension load (static and quasi static loading) Method A	See Annex B2 and C1
Characteristic resistance to shear load (static and quasi static loading)	See Annex C2
Displacements	See Annex C4
Characteristic resistance and displacements for seismic performance categories C1 and C2	No performance assessed

#### **3.2 Safety in case of fire (BWR 2)**

<b>Essential characteristic</b>	<b>Performance</b>
Reaction to fire	Class A1
Resistance to fire	See Annex C3

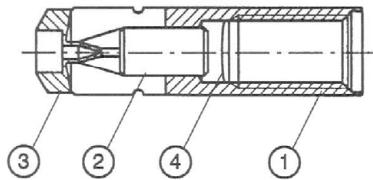

#### **3.3 Aspects of durability**

<b>Essential characteristic</b>	<b>Performance</b>
Durability	See Annex B1

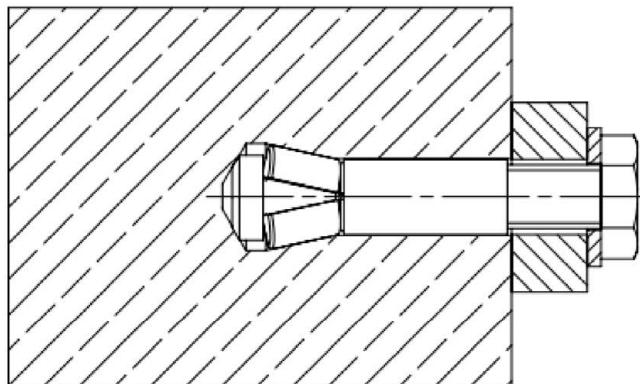

**4      Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base**

In accordance with the European Assessment Document EAD 330232-01-0601 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

- ① Expansion sleeve
- ② Expansion pin
- ③ Plastic cap
- ④ Safety disk

## fischer Zyon-Hammerset anchor FZEA II

**Product description**  
Anchor types and dimensions  
Materials

## Annex A 2

## Specifications of intended use

### Anchorage subject to:

- Static and quasi-static loads
- Fire exposure

### Base materials:

- Compacted reinforced or unreinforced normal weight concrete without fibres (cracked and uncracked) of strength classes C20/25 to C50/60 according to EN 206:2013+A2:2021

### Use conditions (Environmental conditions):

- Structures subject to dry internal conditions: **FZEA II**
- For all other conditions according to EN 1993-1-4:2006+A1:2015 corresponding to corrosion resistance class:
  - CRC III            FZEA II R
  - CRC V            FZEA II HCR

### Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Design of fastenings according to EN 1992-4:2018 and EOTA Technical Report TR 055, Edition February 2018

### Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Correct installation is ensured when front face of sleeve is approximately 1 mm below the concrete surface and the control mark on the sleeve is visible as illustrated in Annex B2

## Installation instructions

No.	Description
1	Drill a hole perpendicular ( $+/- 5^\circ$ ) to the surface of the anchor base with a hammer drill, using the corresponding Zykron universal drill bit FZUB. The required drill depth is reached once the FZUB depth stop meets the concrete.
2	Once the FZUB depth stop meets the concrete, create the drill hole undercut by making circular swiveling movements with the hammer drill while the hammer mechanism is engaged. Press the hammer drill firmly against the anchor base: 2-3 swiveling movements are sufficient
3	Clean bore hole
4	Drive in the pin with the setting tool FZED
5	Check if the sleeve is under the concrete surface ( $U \approx 1\text{mm}$ )
6	Check of the setting notch for correct installation
7	Apply $T_{inst}$
