

DECLARACIÓN DE PRESTACIONES

DoP 0370

para el tornillo para hormigón fischer ULTRACUT FBS II R (anclaje mecánico para uso en hormigón)

ES

1. Código de identificación única del producto tipo: **DoP 0370**
2. Usos previstos: **Fijación a posteriori en hormigón fisurado y no fisurado, véase el apéndice, especialmente los anexos B1 - B5.**
3. Fabricante: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Alemania**
4. Representante autorizado: **-**
5. Sistemas de evaluación y verificación de la constancia de las prestaciones (EVCP): **1**
6. Documento de evaluación europeo: **EAD 330232-01-0601**
Evaluación técnica europea: **ETA-17/0740; 2025-01-08**
Organismo de evaluación técnica: **ETA-Danmark A/S**
Organismos notificados: **2873 TU Darmstadt**

7. Prestaciones declaradas:

Resistencia mecánica y estabilidad (BWR 1)

Resistencia característica a tracción (carga estática y quasi-estática) Método A:

Resistencia de rotura del acero: Anexo C1
Résistance à la rupture par extraction glissement: Anexo C1
Resistencia de rotura por cono de hormigón: Anexo C1
Robustez: Anexo C1
Distancia mínima entre el borde y el centro: Anexo C4
Distancia al borde para evitar la rotura del acero sometido a carga: Anexo C1

Resistencia característica a cortante (carga estática y quasi-estática):

Resistencia de rotura del acero (esfuerzo cortante): Anexo C1
Resistencia falla por arrancamiento lateral: Anexo C1

Resistencia característica para diseño simplificado:

Método B: NPD
Método C: NPD

Desplazamientos:

Desplazamiento por carga estática y quasi-estática: Anexo C4

Resistencia y desplazamientos característicos para las categorías sísmicas C1 y C2:

Resistencia a carga de tracción, desplazamientos, categoría C1: Anexo C2
Resistencia a carga de tracción, desplazamientos, categoría C2: Anexo C2
Resistencia a esfuerzo cortante, desplazamientos, categoría C1: Anexo C2
Resistencia a esfuerzo cortante, desplazamientos, categoría C2: Anexo C2
Factor espacio anular: Anexo C2

Seguridad en caso de incendio (BWR 2)

Reacción al fuego: Clase (A1)

Resistencia al fuego:

Resistencia al fuego, rotura del acero (carga de tracción): Anexo C3
Resistencia al fuego, a la extracción (carga de tracción): Anexo C3
Resistencia al fuego, rotura del acero (esfuerzo cortante): Anexo C3

Durabilidad:

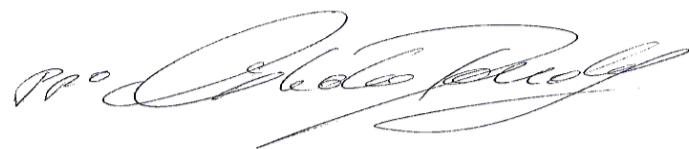

Durabilidad: Anexos B1

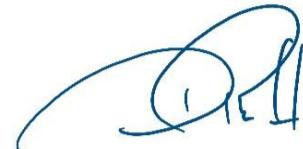

8. Documentación técnica adecuada o documentación técnica específica: -

Las prestaciones del producto identificado anteriormente son conformes con el conjunto de prestaciones declaradas. La presente declaración de prestaciones se emite, de conformidad con el Reglamento (UE) no 305/2011, bajo la sola responsabilidad del fabricante arriba identificado.

Firmado por y en nombre del fabricante por:

Dr. Ronald Mihala, Jefe de Desarrollo y Gestión de la Producción
Tumlingen, 2025-02-03

Dieter Pfaff, Jefe de la Federación Internacional de Producción y Gestión de Calidad

Esta DdR se ha preparado en distintos idiomas. En caso de que haya alguna controversia sobre la interpretación prevalecerá siempre la versión inglesa.

El Apéndice incluye información voluntaria y complementaria en idioma inglés que excede los requisitos legales (de idioma neutral).

II SPECIFIC PART OF THE EUROPEAN TECHNICAL ASSESSMENT

1 Technical description of product and intended use

Technical description of the product

fischer concrete screw UltraCut FBS II R is a concrete screw made of stainless steel. The anchor is installed in a drilled hole and anchored by mechanical interlock.

An illustration of the product is given in Annex A.

The characteristic material values, dimensions and tolerances of the anchors not indicated in Annexes shall correspond to the respective values laid down in the technical documentation of this European Technical Assessment.

The anchors are intended to be used with embedment depth given in Annex B, Table B2.1. The intended use specifications of the product are detailed in the Annex B1.

2 Specification of the intended use in accordance with the applicable European Assessment Document (hereinafter EAD)

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The provisions made in this European Technical Assessment are based on an assumed intended working life of the anchor of 50 years.

The indications given on the working life cannot be interpreted as a guarantee given by the producer or Assessment Body, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Characteristics of product

Mechanical resistance and stability (BWR 1):

The essential characteristics are detailed in the Annex C1, C2 and C4.

Safety in case of fire (BWR 2):

The essential characteristics are detailed in the Annex C3.

Durability:

See annex B1.

Other Basic Requirements are not relevant.

3.2 Methods of assessment

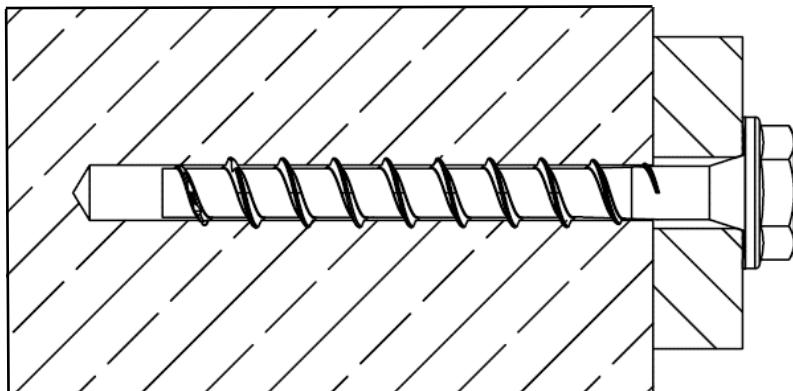

The assessment of fitness of the anchor for the intended use in relation to the requirements for mechanical resistance and stability and safety in use in the sense of the Basic Works Requirement 1 has been made in accordance with EAD 330232-01-0601; Mechanical fasteners for use in concrete.

4 Assessment and verification of constancy of performance (hereinafter AVCP) system applied, with reference to its legal base.

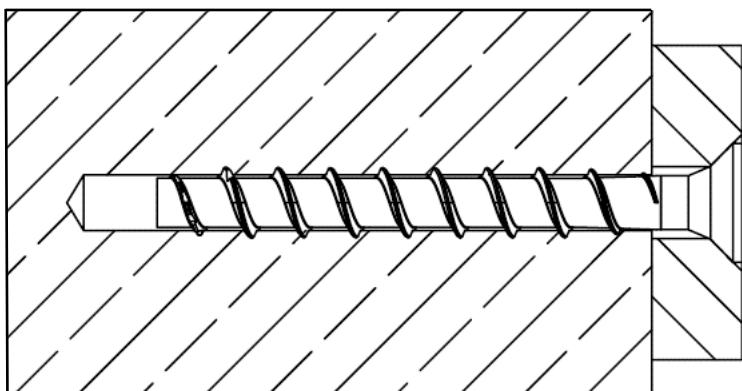

4.1 AVCP system

According to the decision 1996/582/EC of the European Commission, the system(s) of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No. 305/2011) is 1.

Seismic performance category C2	- 1)								

¹⁾ No performance assessed

Base materials:

- Compacted reinforced or unreinforced normal weight concrete without fibres (cracked or uncracked) according to EN 206:2013+A2:2021
- Strength classes C20/25 to C50/60 according to EN 206:2013+A2:2021

Use conditions (Environmental conditions):

- Structures subjected to dry internal conditions (FBS II R)
- For all other conditions according to EN 1993-1-4:2006 + A1:2015, corresponding to corrosion resistance class
- CRC III: for FBS II R

Design:

- The structural design according to EN 1992-4:2018 are conducted under responsibility of a designer experienced in the field of anchorages and concrete works.
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the fastener is indicated on the design drawings (e.g. position of the screw relative to reinforcement or to supports, etc.).
- Design of fastenings according to EN 1992-4:2018 and EOTA Technical Report TR 055:2018

Intended use
Installation parameters

Annex B 2

Appendix 7 / 14

Installation instruction part 1 FBS II 8/10/12 R

	<p>Step 1: Drilling of the hole:</p> <p>Drill the hole using hammer drill, hollow drill or diamond core drill</p> <p>Drill hole diameter d_0 and drill hole depth h_1 according to table B2.1</p>
	<p>Step 2: Cleaning of the drill hole - horizontal:</p> <p>Clean the drill hole. This step can be omitted in the preparation of the hole by using a hollow drill bit or diamond core drill. (recommendation: use the fischer FHD hollow drill bit)</p>
	<p>Step 2: Cleaning of the drill hole - vertical:</p> <p>Cleaning of the drill hole can be omitted, if drilling vertically upwards or if drilling vertically downwards and the hole depth has been increased. It is recommended to increase the drill hole depth by an additional $3 \times$ drilling \varnothing when drilling vertically downwards.</p>
	<p>Step 3: Installation:</p> <p>Turn in until the head is in contact with the fixture.</p> <p>Installation with any torque impact screw driver up to the maximum mentioned torque moment ($T_{imp,max}$ according to table B2.1).</p> <p>Alternatively, all other tools without an indicated torque moment are allowed (e.g. ratchet spanner). The indicated torque moments $T_{imp,max}$ for impact screw driver are not decisive for manual installation.</p>
	<p>Step 4: Checking of the correct installation:</p> <p>After installation a further turning of the screw must not be possible. The head of the screw must be in contact with the fixture and is not damaged</p>

Intended use
Installation Instructions

Annex B 3

Appendix 8 / 14

Installation instruction part 2 FBS II 8/10/12 R

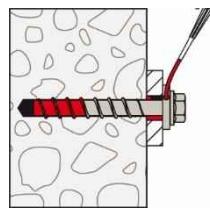

Adjustment

Optional:

It is permissible to adjust the screw twice. Therefore, the screw may be untightened to a maximum of $L_{adj} = 20$ mm off the surface of the initial fixture. The total permissible thickness of shims added during the adjustment process is $t_{adj} = 10$ mm.

The required nominal anchoring depth h_{nom} must be kept after the adjustment process. (see also annex B 3)

Filling of the annular gap

For seismic performance category C2 applications:

The gap between screw shaft and fixture must be filled with mortar; mortar compressive strength ≥ 50 N/mm² (e. g. FIS V Plus, FIS HB, FIS SB or FIS EM Plus). As an aid for filling the gap, the filling disc FFD is recommended.

fischer concrete screw UltraCut FBS II R

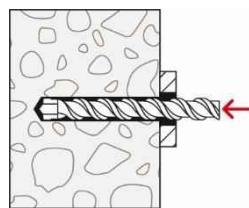

Intended use

Installation Instructions

Annex B 4

Appendix 9 / 14

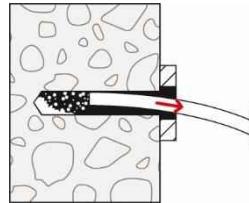

Installation instruction FBS II 6 R

Step 1: Drilling of the hole:

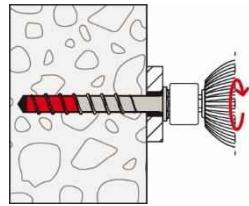

Drill the hole using hammer drill

Drill hole diameter d_0 and
drill hole depth h_1 according to table B2.1

Step 2: Cleaning of the drill hole:

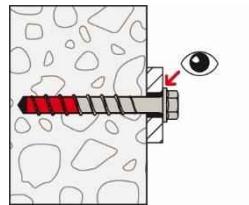

Clean the drill hole.

Step 3: Installation:

Turn in until the head is in contact with the fixture.

Installation with any torque impact screw driver up to the maximum mentioned torque moment ($T_{imp,max}$ according to table B2.1).

Step 4: Checking of the correct installation:

After installation a further turning of the screw must not be possible. The head of the screw must be in contact with the fixture and is not damaged

Tension load in cracked concrete	N	[kN]	2,8	3,5	4,5	4,2	7,0	8,1	5,0	6,0	12,0
Displacement in cracked concrete	δ_{N0} $\delta_{N\infty}$	[mm]	0,1 0,5	0,6 1,5	0,4 1,1	0,4 1,0	0,6 1,8	0,7 1,8	0,9 1,4	0,9 1,7	1,4

Table C4.2: Displacements due to shear loads (static and quasi-static)

FBS II R			6	8	10			12			
Nominal embedment depth	h_{nom}	[mm]	60	50	65	55	65	85	60	75	100
Shear load in cracked and uncracked concrete	V	[kN]	7,8	11,0	15,9	10,4	11,9	20,9	12,7	24,9	26,2
Displacement (the gap between fastener and fixture is subtracted)	δ_{v0} $\delta_{v\infty}$	[mm]	2,2 3,4	4,1 6,2	2,7 4,1	1,2 1,8	1,2 1,8	3,5 5,3	1,1 1,7	2,5 3,8	2,9 4,4

Table C4.3: Displacements due to tension loads (Seismic Performance Category C2)

FBS II R			6	8	10			12		
Nominal embedment depth	h_{nom}				65		85		100	
Displacement DLS	$\delta_{N,C2}(\text{DLS})$	[mm]	- 1)		0,9		0,9		1,1	
Displacement ULS	$\delta_{N,C2}(\text{ULS})$				2,5		2,7		3,2	

Table C4.4: Displacements due to shear loads (Seismic Performance Category C2)

FBS II R			6	8	10			12		
Nominal embedment depth	h_{nom}				65		85		100	
Displacement DLS	$\delta_{v,C2}(\text{DLS})$	[mm]	- 1)		1,6		1,7		2,6	
Displacement ULS	$\delta_{v,C2}(\text{ULS})$				5,0		3,8		6,6	

1) No performance assessed

Table C4.5: Minimum thickness of concrete members, minimum spacing and edge distance

FBS II R			6	8	10			12			
Nominal embedment depth	h_{nom}		60	50	65	55	65	85	60	75	100
Minimum thickness of concrete member	h_{\min}	[mm]	100	100	120	100	120	140	110	130	150
Minimum spacing	s_{\min}				35		40		50		
Minimum edge distance	c_{\min}				35		40		50		

fischer concrete screw UltraCut FBS II R

Performances

Displacements due to tension and shear loads;
Minimum thickness of concrete members, minimum spacing and edge distance

Annex C 4
