

DECLARAÇÃO DE DESEMPENHO

N.o 0016 – PT

1. Código de identificação único do produto-tipo: **Parafuso de betão Fischer FBS 5 e FBS 6.**

2. Utilização(ões) prevista(s):

Produto	Utilização/ões pretendida/s
Âncoras metálicas para utilização em betão (tipo leve)	Para utilização em sistemas redundantes de fixação e/ou suporte de elementos de betão, tais como tetos falsos leves, assim como instalações, Ver anexo, especialmente anexos B 1 - B 4

3. Fabricante: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Straße 1, 72178 Waldachtal, Alemanha**

4. Mandatário: --

5. Sistema(s) de avaliação e verificação da regularidade do desempenho (AVCP): **2+**

6a. Norma harmonizada: ---

Organismo(s) notificado(s): ---

6b. Documento de Avaliação Europeu **ETAG 001; 2010-08**

Avaliação Técnica Europeia **ETA-11/0093; 2015-08-28**

Organismo de Avaliação Técnica: **DIBt**

Organismo(s) notificado(s): **1343 – MPA Darmstadt**

7. Desempenho(s) declarado(s):

Segurança em caso de incêndio (BWR 2)

Característica essencial	Desempenho
Reacção ao fogo	As fixações satisfazem os requisitos da Classe A 1
Resistência ao fogo	Ver anexo, especialmente Anexo C 2

Segurança na utilização (BWR 4)

Característica essencial	Desempenho
Resistência característica para cargas de tensão e cisalhamento, assim como momentos de flexão em betão	Ver anexo, especialmente Anexos C 1 e C 2
Distâncias de borda e espaçamento	Ver anexo, especialmente Anexo C 1

8. Documentação Técnica Adequada e/ou Documentação Técnica Específica: ---

O desempenho do produto identificado acima está em conformidade com o conjunto de desempenhos declarados. A presente declaração de desempenho é emitida, em conformidade com o Regulamento (UE) n.o 305/2011, sob a exclusiva responsabilidade do fabricante identificado acima.

Assinado por e em nome do fabricante por:

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

Tumlingen, 2015-09-04

- Este DoP foi preparado em diferentes línguas. Em caso de litígio sobre a interpretação, a versão em inglês prevalecerá sempre.

- O Anexo inclui informações voluntárias e complementares em inglês que excedem os requisitos legais (linguisticamente especificados).

Specific Part

1 Technical description of the product

The fischer concrete screw FBS in size of 5 and 6 is an anchor made of zinc-plated steel respectively steel with zinc flake coating (FBS) or made of stainless steel (FBS A4, FBS C). The anchor is screwed into a predrilled cylindrical drill hole. The special thread of the anchor cuts an internal thread into the member while setting. The anchorage is characterised by mechanical interlock in the special thread.

Product and product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

The essential characteristics regarding mechanical resistance and stability are included under the Basic Works Requirement Safety in use.

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorage satisfy requirements for Class A1
Resistance to fire	See Annex C 2

3.3 Safety in use (BWR 4)

Essential characteristic	Performance
Characteristic resistance for tension and shear loads as well as bending moments in concrete	See Annex C 1 and C 2
Edge distances and spacing	See Annex C 1

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with guideline for European technical approval ETAG 001, April 2013 used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011 the applicable European legal act is: [97/161/EC].

The system to be applied is: 2+

Dimensions and markings

Annex A 4

Intended use

Anchorage subject to:

- static and quasi static loads
- Used only for multiple use for non-structural application according to ETAG 001, Part 6
- Used for anchorages in prestressed hollow core slabs
- Used for anchorages with requirements related to resistance of fire (not for using in prestressed hollow core slabs)

Base materials:

- reinforced and unreinforced concrete according to EN 206-1:2000
- strength classes C20/25 to C50/60 according to EN 206-1:2000
- cracked and non-cracked concrete

Use conditions (Environmental conditions):

- The anchor may only be used in dry internal conditions: All screw types
- Structural subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition no particular aggressive conditions exists: screw types made of stainless steel with marking A4 or BS
- Structural subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition if particular aggressive conditions exists: screw types made of stainless steel with marking C or BSH

Note: Such particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used)

Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.).
- Anchorages under static or quasi-static actions are designed for design method A in accordance with:
 - ETAG 001, Annex C, Edition August 2010 or
 - CEN/TS 1992-4:2009.
- Anchorages under fire exposure are designed in accordance with:
 - EOTA Technical Report TR 020, Edition May 2004 or
 - CEN/TS 1992-4:2009, Annex D (It must be ensured that local spalling of the concrete cover does not occur).

Installation:

- Hammer drilling only.
- Anchor installation carried out by appropriately qualified personal and under the supervision of the person responsible for technical matters of the site.
- After installation further turning of the anchor is not possible. The head of the anchor is supported on the fixture and is not damaged.
