

## DICHIARAZIONE DI PRESTAZIONE

n. 0012 – IT

1. Codice di identificazione unico del prodotto-tipo: **fischer Sistema a iniezione FIS EM**

2. Usi previsti:

Prodotto	Uso/i previsto/i
Ancoranti metallici per l'utilizzo in calcestruzzo (tipo pesante)	Per il fissaggio e/o supporto su calcestruzzo di elementi strutturali o unità pesanti come rivestimenti o controsoffitti sospesi, vedere l'appendice, specialmente gli Annessi B 1 a B 10

3. Fabbricante: **fischerwerke GmbH & Co. KG, Otto-Hahn-Straße 15, 79211 Denzlingen, Germania**

4. Mandatario: --

5. Sistemi di VVCP: **1**

6a. Norma armonizzata: ---

Organismi notificati: ---

6b. Documento per la valutazione europea: **ETAG 001; 2013-04**

Valutazione tecnica europea: **ETA-10/0012; 2015-03-19**

Organismo di valutazione tecnica: **DIBt**

Organismi notificati: **1343 – MPA Darmstadt**

7. Prestazioni dichiarate:

### Resistenza meccanica e stabilità (BWR 1)

Caratteristiche essenziali	Prestazione
Valori caratteristici sotto azioni statiche e quasi statiche per la progettazione secondo TR 029 o CEN/TS 1992-4:2009, Spostamenti	Vedere appendice, specialmente Annessi C 1 a C 14
Resistenza caratteristica per le categorie di prestazione sismica C1 e C2 per la progettazione secondo il Rapporto Tecnico TR 045, Spostamenti	Vedere appendice, specialmente Annessi C 15 a C 18

### Sicurezza in caso di incendio (BWR 2)

Caratteristiche essenziali	Prestazione
Reazione al fuoco	Gli ancoraggi soddisfano i requisiti per la Classe A1
Resistenza al fuoco	Nessuna prestazione determinata (NPD)

8. Documentazione tecnica appropriata e/o documentazione tecnica specifica: ---

La prestazione del prodotto sopra identificato è conforme all'insieme delle prestazioni dichiarate. La presente dichiarazione di responsabilità viene emessa, in conformità al regolamento (UE) n. 305/2011, sotto la sola responsabilità del fabbricante sopra identificato.

Firmato a nome e per conto del fabbricante da:

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

Tumlingen, 2015-03-12

- Questa Dichiarazione di Prestazione (DoP) è stata preparata in diverse lingue. In caso di divergenza d'interpretazione avrà sempre prevalenza la versione inglese.

- L'appendice include informazioni volontarie e complementari in lingua inglese (lingua specificata neutrale) eccetto i requisiti di legge

## Specific Part

### 1 Technical description of the product

The fischer injection system FIS EM is a bonded anchor consisting of a cartridge with injection mortar fischer FIS EM and a steel element. The steel element consist of

- a commercial threaded rod with washer and hexagon nut of sizes M8 to M30 or
- a fischer internal threaded anchor RG MI of sizes M8 to M20 or
- a deformed reinforcing bar of sizes  $\phi = 8$  to 40 mm or
- a fischer rebar anchor FRA of sizes M12 to M24

The steel element is placed into a drilled hole filled with injection mortar and is anchored via the bond between metal part, injection mortar and concrete.

The product description is given in Annex A.

### 2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

### 3 Performance of the product and references to the methods used for its assessment

#### 3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Characteristic values under static and quasi-static action for design according to TR 029 or CEN/TS 1992-4:2009, Displacements	See Annex C 1 to C 14
Characteristic values for seismic performance categories C1 and C2 for design according to Technical Report TR 045, Displacements	See Annex C 15 to C 18

#### 3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorage satisfy requirements for Class A1
Resistance to fire	No performance determined (NPD)

**3.3 Hygiene, health and the environment (BWR 3)**

Regarding dangerous substances there may be requirements (e.g. transposed European legislation and national laws, regulations and administrative provisions) applicable to the products falling within the scope of this European Technical Assessment. In order to meet the provisions of Regulation (EU) No 305/2011, these requirements need also to be complied with, when and where they apply.

**3.4 Safety in use (BWR 4)**

The essential characteristics regarding Safety in use are included under the Basic Works Requirement Mechanical resistance and stability.

**3.5 Protection against noise (BWR 5)**

Not applicable.

**3.6 Energy economy and heat retention (BWR 6)**

Not applicable.

**3.7 Sustainable use of natural resources (BWR 7)**

The sustainable use of natural resources was not investigated.

**3.8 General aspects**

The verification of durability is part of testing the essential characteristics. Durability is only ensured if the specifications of intended use according to Annex B are taken into account.

**4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base**

According to Decision of the Commission of 24 June 1996 (96/582/EC) (OJ L 254 of 08.10.96 p. 62-65), the system of assessment and verification of constancy of performance (see Annex V and Article 65 Paragraph 2 to Regulation (EU) No 305/2011) given in the following table applies.

<b>Product</b>	<b>Intended use</b>	<b>Level or class</b>	<b>System</b>
Metal anchors for use in concrete (heavy-duty type)	For fixing and/or supporting concrete structural elements or heavy units such as cladding and suspended ceilings	—	1

**Installation conditions**

	C2	M12, M16, M20, M24	Table C19	-----		-----	-----	-----	
Use category	Dry or wet concrete	all sizes							
	Flooded hole	all sizes							
Installation temperature		+5°C to +40°C							
service temperature	Temperature range I	-40°C to +60°C		(max. long term temperature +35°C and max. short term temperature +60°C)					
	Temperature range II	-40°C to +72°C		(max. long term temperature +50°C and max. short term temperature +72°C)					

**Base materials:**

- Reinforced or unreinforced normal weight concrete according to EN 206:2013
- Strength classes C20/25 to C50/60 according to EN 206:2013

**Use conditions (Environmental conditions):**

- Structures subject to dry internal conditions (zinc coated steel, stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure including industrial and marine environment, if no particular aggressive conditions exist (stainless steel or high corrosion resistant steel)
- Structures subject to permanently damp internal condition or in other particular aggressive conditions (high corrosion resistant steel)

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used)

fischer injection system FIS EM

**Intended Use**  
Specifications (part 1)

**Annex B 1**

Specifications of intended use (part 2)

**Design:**

- Anchorages have to be designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e. g. position of the anchor relative to reinforcement or to supports, etc.)
- Anchorages under static or quasi-static actions are designed in accordance with TR 029 or CEN/TS 1992-4:2009
- Anchorages under seismic actions have to be designed in accordance with TR 045

**Installation:**

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site.
- In case of aborted hole: The hole shall be filled with mortar
- Marking and keeping the effective anchorage depth

**Commercial standard threaded rods, washers and hexagon nuts may also be used if the following requirements are fulfilled:**

- Materials, dimensions and mechanical properties according to Annex A 3, Table A1
- Inspection certificate 3.1 according to EN 10204:2004, the documents should be stored
- Marking of embedment depth

**Preparing the cartridge**

5		<p>Twist off the sealing cap</p> <p>Twist on the static mixer (the spiral in the static mixer must be clearly visible).</p>
6		 <p>Place the cartridge into the dispenser.</p>
7		 <p>Press approx. 10 cm of material out until the resin is evenly grey in colour. Don't use mortar that is not uniformly grey.</p>

**Injection of the mortar**

8	 <p>Fill approx. 2/3 of the drill hole with mortar. Always begin from the bottom of the hole and avoid bubbles.</p>	 <p>For drill hole depth <math>\geq 150</math> mm use an extension tube.</p>	 <p>For overhead installation, deep holes <math>h_0 &gt; 250</math> mm or drill hole diameter <math>d_0 \geq 40</math> mm use an injection-adapter.</p>
---	---	--	---

**Installation threaded rods or fischer internal threaded anchors RG MI**

9			<p>Only use clean and oil-free anchor elements. Mark the setting depth of the anchor. Press the threaded rod or internal threaded anchor down to the bottom of the hole, turning it slightly while doing so. After inserting the anchor element, excess mortar must emerge around the anchor element.</p>
	 <p>For overhead installations support the threaded rod with wedges.</p>	 <p>For push through installation fill the annular clearance with mortar.</p>	
10	 <p>Wait for the specified curing time, <math>t_{cure}</math> see Table B7.</p>		<p>Mounting the fixture <math>T_{inst,max}</math> see Tables B2, B3.</p>

fischer injection system FIS EM

**Intended use**  
Installation instructions part 2

**Annex B 9**

**Installation instructions part 3**

**Installation reinforcing bars and fischer FRA**

<p><b>9</b></p>		<p>Only use clean and oil-free reinforcing bars. Mark the setting depth of the reinforcing bar. Using a turning movement, push the reinforcement bar or the FRA vigorously into the filled hole up to the insertion depth marking.</p>
		<p>When reaching the setting depth mark, excess mortar must emerge from the mouth of the drill hole.</p>
<p><b>10</b></p>	 <p>Wait for the specified curing time  <math>t_{cure}</math> see <b>Table B7.</b></p>	 <p>Mounting the fixture  <math>T_{inst,max}</math> see <b>Table B5.</b></p>
