DoP 0298

fischer TermoZ CS II 8 / fischer TermoZ CS II 8 DT 110 V eristeikiinnike (Muoviankkurit käytettäväksi betonissa ja muuratuissa rakenteissa)

FI

- Tuotetyypin yksilöllinen tunniste: DoP 0298
- Aiottu käyttötarkoitus (aiotut käyttötarkoitukset): Ruuvattava nailonankkuri ulkoisten lämmöneristyskomposiittijärjestelmien (ETICS) kiinnittämiseen betoniin ja muurattuun rakenteeseen, katso lisäys, erityisesti liitteet B1-B3.
- Valmistaja: fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Saksa
- Valtuutettu edustaja: -
- Suoritustason pysyvyyden arvioinnissa ja varmentamisessa käytetty järjestelmä/käytetyt järjestelmät: 2+
- Eurooppalainen arviointiasiakirja: EAD 330196-01-0604
Eurooppalainen tekninen arviointi: ETA-14/0372; 2022-05-08
Teknisestä arvioinnista vastaava laitos: ETA-Danmark A/S
Ilmoitettu laitos/ilmoitetut laitokset: 2873 TU Darmstadt
- Ilmoitettu suoritustaso/ilmoitetut suoritustasot:
Käyttöturvallisuus (BWR 4)
Tyypillinen kantavuus: Tyypillinen vastus vetokuormituksessa: Liitteet C1-C2
Pienin reunaetäisyys: Liite B2
Pienin keskinäinen etäisyys: Liite B2
Siirtymät: Vetokuorma osittaisella kertoimella: Liite C4
Siirtymät: Liite C4
Levyn jäykkyys: Ankkurilevyn halkaisija: 0 0 0
Ankkurilevyn kuormituskestävyys: Liite C3
Levyn jäykkyys: Liite C3
Energiataloudellisuus ja lämmönkesto (BWR 6)
Lämmönläpäisykyky: Pistekohtainen lämmönläpäisykerroin: Liite C3
ETICS:n eristyskerroksen paksuus: Liite C3
- Asianmukainen tekninen asiakirja ja/tai tekninen erityisasiakirja: 0

Edellä yksilöidyn tuotteen suoritustaso on ilmoitettujen suoritustasojen joukon mukainen. Tämä suoritustasoilmoitus on asetuksen (EU) N:o 305/2011 mukaisesti annettu edellä ilmoitetun valmistajan yksinomaisella vastuulla.

Valmistajan puolesta allekirjoittanut:

Dr.-Ing. Oliver Geibig, Toimitusjohtaja Liiketoimintayksikkö & Suunnittelu
Tumlingen, 2022-05-16

Jürgen Grün, Toimitusjohtaja Kemia & Laatu

Tämä suoritustasoilmoitus on laadittu useilla kielillä. Jos tulkinnasta syntyy erimielisyyttä, englanninkielinen versio on aina katsottava ensisijaiseksi.

Lisäys sisältää vapaaehtoisesti ilmoitettua ja täydentävää englanninkielistä tietoa, joka ylittää (kielestä riippumatta määritellyt) lakisääteiset vaatimukset.

II SPECIFIC PART OF THE EUROPEAN TECHNICAL ASSESSMENT

1 Technical description of product

The screwed-in anchors fischer TermoZ CS II 8 and fischer TermoZ CS II 8 DT 110 V are used for fixing of external thermal insulation composite systems (ETICS). The fischer TermoZ CS II 8 consists of an anchor sleeve made of polypropylene with a diameter of 8 mm and an insulation plate made of glass-fiber reinforced polyamide with a diameter of 60 mm. The fischer TermoZ CS II 8 DT 110 V consists of an anchor sleeve made of polypropylene with a diameter of 8 mm and an insulation plate made of glass-fiber reinforced polyamide with a diameter of 110 mm. The color of the anchor sleeve is grey. The special compound screw is made of galvanised steel and glass-fiber reinforced polyamide. The anchor is expanded by screwing the screw into the sleeve. It is possible to install the anchor flush or countersunk mounted to the surface of the insulation.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document (hereinafter EAD)

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B1 to B3.

The provisions made in this European Technical Assessment are based on an assumed intended working life of the anchor of 25 years.

The indications given on the working life cannot be interpreted as a guarantee given by the producer or Assessment Body, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Characteristics of product

Safety in case of fire (BWR 2):

No Performance Assessed.

Safety in use (BWR4):

The essential characteristics are detailed in Annex B2 and Annex C1 to C4.

Energy economy and heat retention (BWR6):

The essential characteristics are detailed in the Annex C3.

Other Basic Requirements are not relevant.

General aspects

The verification of durability is part of testing of the essential characteristics. Durability is only ensured if the specifications of intended use according to Annex B are taken into account.

3.2 Methods of assessment

The assessment of fitness of the anchor for the intended use in relation to the requirements for mechanical resistance and stability and safety in use in the sense of the Basic Requirements 4 has been made in accordance with the EAD 330196-01-0604 Plastic anchors made of virgin or non-virgin material for fixing of external thermal insulation composite systems with rendering.

4 Assessment and verification of constancy of performance (AVCP)

4.1 AVCP system

According to the decision 97/463/EC of the European Commission, the system(s) of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No 305/2011) is 2+.

TermoZ CS II 8 DT 110 V

Legend

- h_{nom} = Overall plastic anchor embedment depth in the base material
- h_{ef} = Effective anchorage depth in the base material
- h_1 = Depth of drilled hole to deepest point
- h = Thickness of member (wall)
- h_D = Thickness of insulation material
- t_{tol} = Thickness of equalising layer and / or non-load-bearing coating

Annex A7

Specifications of intended use

Anchorage subject to:

- The anchor may only be used for transmission of wind suction loads and shall not be used for the transmission of dead loads of the thermal insulation composite system.

Base materials:

- Normal weight concrete without fibres \geq C12/15 (base material group "A") as per EN 206:2013+A1:2016, see Annex C1.
- Solid masonry (base material group "B"), as per EN 771-1:2011+A1:2015, EN 771-2:2011+A1:2015, EN 771-3:2011+A1:2015, see Annex C1.
- Hollow or perforated masonry (base material group "C"), as per EN 771-1:2011+A1:2015, EN 771-2:2011+A1:2015 or EN 771-3:2011+A1:2015, see Annex C1 and C2.
- Lightweight aggregate concrete (base material group "D"), as per EN 1520:2011 / EN 771-3:2011+A1:2015, see Annex C2.
- Autoclaved aerated concrete (base material group "E"), as per EN 771-4:2011+A1:2015, see Annex C2.
- For other comparable materials of the base material groups "A", "B", "C", "D" and "E" the characteristic resistance of the anchor may be determined by job site tests according to EOTA Technical Report TR 051 Edition April 2018.

Temperature Range:

- 0 °C to + 40 °C (max. short term temperature + 40 °C and max. long term temperature + 24 °C) of the base material.

Design:

- The anchorages are designed under the responsibility of an engineer experienced in anchorages and masonry work with the partial safety factors $\gamma_M = 2,0$ und $\gamma_F = 1,5$ if there are no other national regulations.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchors is indicated on the design drawings.
- Fasteners are only to be used for multiple fixings of thermal insulation composite systems.

Installation:

- Drilling method see Annex C1 and C2.
- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters on the site.
- Installation temperature of the anchor from 0 °C to + 40 °C.
- Exposure to UV due to solar radiation of the anchor not protected by rendering \leq 6 weeks.

Installation instruction

Standard setting of TermoZ CS II 8 (plain surface setting) without setting tool

1. Drill hole by corresponding drilling method

2. Insert anchor manually

3. Set anchor by machine

4. Correctly installed anchor

Setting of TermoZ CS II 8 (plain surface setting) by setting tool

1. Drill hole by corresponding drilling method

2. Insert anchor manually

3. Set anchor by setting tool with the machine

4. Correctly installed anchor

Setting of TermoZ CS II 8 (countersunk setting) by setting tool

1. Drill hole by corresponding drilling method

2. Insert anchor manually

3. Put on setting tool

4. Set anchor by setting tool with the machine

5. Put on cap

6. Correctly installed anchor

Setting of TermoZ CS II 8 DT 110 V by setting tool

1. Drill hole by corresponding drilling method

2. Insert anchor manually
