

SUORITUSTASOILMOITUS

DoP 0294

fischer betoniruuville ULTRACUT FBS II A4 (mekaaninen kiinnike käytettäväksi betonissa)

FI

1. Tuotetyypin yksilöllinen tunniste: DoP 0294
2. Aiottu käyttötarkoitus (aiotut käyttötarkoitukset): Jälkikäteen tehtäviin kiinnityksiin halkeilevassa tai halkeilemattomassa betonissa, katso lisäys, erityisesti liitteet B1 - B4.
3. Valmistaja: fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Saksa
4. Valtuutettu edustaja: -
5. Suoritusasteen pysyvyyden arvioinnissa ja varmentamisessa käytetty järjestelmä/käytetyt järjestelmät: 1
6. Eurooppalainen arviointiasiakirja: EAD 330232-00-0601
Eurooppalainen tekninen arviointi: ETA-17/0740; 2018-10-23
Teknisestä arvioinnista vastaava laitos: ETA-Danmark A/S
Ilmoitettu laitos/ilmoitetut laitokset: 2873 TU Darmstadt

7. Ilmoitettu suoritusaste/ilmoitetut suoritusasteet:

Mekaaninen kestävyys ja vakaus (BWR 1)

Tyypillinen kestävyys kuormitukselle (staattinen ja lähes staattinen kuormitus):

Teräksen murtokuorma: Liite C1

Ulosvetoarvon murtokuorma: Liite C1

Betonimassan murtokuorma: Liite C1

Kestävyys: Liite C1

Pienin reuna- ja keskinäis etäisyys: Liite B3

Reunaetäisyys halkeamien estämiseksi kuormituksessa: Liite C1

$E_s = 210\,000\text{ MPa}$

Tyypillinen kestävyys leikkauskuormalle (staattinen ja näennäisstaattinen kuormitus):

Teräksen murtokuorma (leikkauskuorma): Liite C1

Taivutusvoiman murtokuorma: Liite C1

Betonireunan murtokuorma: Liite C1

Siirtymät staattisella ja lähes staattisella kuormituksella: Liite C4

Kestävyys: Liitteet A2, B1

Ominainen kestävyys ja siirtymät seismisille suoritusluokille C1 ja C2:

Teräksen murtokuorma: Liite C2

Ulosvetoarvon murtokuorma: Liite C2

Murtovenymä: NPD

Rengasmaisen aukon kerroin: NPD

Siirtymät: Liite C4

Turvallisuus tulipalon sattuessa (BWR 2)

Reaktio paloon: Class A

Tulenkestävyys:

Teräksen murtokuorma tulipalossa (vetokuorma): Liite C3

Ulosvedon murtokuorma tulipalossa (vetokuorma): Liite C3

Teräksen murtokuorma tulipalossa (leikkauskuorma): Liite C3

8. Asiamukainen tekninen asiakirja ja/tai tekninen erityisasiakirja: -

Edellä yksilöidyn tuotteen suoritusaste on ilmoitettujen suoritusasteiden joukon mukainen. Tämä suoritusasteilmoitus on asetuksen (EU) N:o 305/2011 mukaisesti annettu edellä ilmoitetun valmistajan yksinomaisella vastuulla.

Valmistajan puolesta allekirjoittanut:

Dr.-Ing. Oliver Geibig, Toimitusjohtaja Liiketoimintayksikkö & Suunnittelu
Tumlingen, 2022-01-10

Jürgen Grün, Toimitusjohtaja Kemia & Laatu

Tämä suoritusasteilmoitus on laadittu useilla kielillä. Jos tulkinnasta syntyy erimielisyyttä, englanninkielinen versio on aina katsottava ensisijaiseksi.

Lisäys sisältää vapaaehtoisesti ilmoitettua ja täydentävää englanninkielistä tietoa, joka ylittää (kielestä riippumatta määritellyt) lakisääteiset vaatimukset.

II SPECIFIC PART OF THE EUROPEAN TECHNICAL ASSESSMENT

1 Technical description of product and intended use

Technical description of the product

fischer concrete screw ULTRACUT FBS II A4 is a concrete screw made of stainless steel. The anchor is installed in a drilled hole and anchored by mechanical interlock.

An illustration of the product is given in Annex A.

The characteristic material values, dimensions and tolerances of the anchors not indicated in Annexes shall correspond to the respective values laid down in the technical documentation of this European Technical Assessment.

The anchors are intended to be used with embedment depth given in Annex B, Table B2.1. The intended use specifications of the product are detailed in the Annex B1.

2 Specification of the intended use in accordance with the applicable EAD

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The provisions made in this European Technical Assessment are based on an assumed intended working life of the anchor of 50 years.

The indications given on the working life cannot be interpreted as a guarantee given by the producer or Assessment Body, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Characteristics of product

Mechanical resistance and stability (BWR 1):

The essential characteristics are detailed in the Annex C1, C2 and C4.

Safety in case of fire (BWR 2):

The essential characteristics are detailed in the Annex C3.

Other Basic Requirements are not relevant.

3.2 Methods of assessment

The assessment of fitness of the anchor for the intended use in relation to the requirements for mechanical resistance and stability and safety in use in the sense of the Basic Works Requirement 1 has been made in accordance with EAD 330232-00-0601; Mechanical fasteners for use in concrete.

4 Assessment and verification of constancy of performance (AVCP)

4.1 AVCP system

According to the decision 1996/582/EC of the European Commission, the system(s) of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No. 305/2011) is 1.

fischer concrete screw ULTRACUT FBS II A4	Annex A2 of European Technical Assessment ETA-17/0740
Product description Geometry and material	

Specification of intended use:

Size	FBS II A4							
	8		10			12		
Nominal embedment depth [mm]	50	65	55	65	85	60	75	100
Static and quasi-static loads	✓							
Cracked and uncracked concrete								
Fire exposure								
Seismic performance category C1 and C2		✓			✓			✓

Base materials:

- Compacted reinforced or unreinforced normal weight concrete without fibres according to EN 206:2013
- Strength classes C20/25 to C50/60 according to EN 206:2013
- Uncracked or cracked concrete

Use conditions (Environmental conditions):

- Structures subjected to dry internal conditions
- Structures subjected to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist.

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere or indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where deicing materials are used).

Design:

- Anchorages are to be designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the screw is indicated on the design drawings (e.g. position of the screw relative to reinforcement or to supports, etc.).
- Design of fastenings according to FprEN 1992-4: 2016 and EOTA Technical Report TR 055
- Seismic design according to EOTA Technical Report TR 049

Installation:

- Hammer drilling or diamond drilling or hollow drilling according to Annex B4
- Screw installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters on site.
- In case of aborted hole: New hole must be drilled at a minimum distance of twice the depth of the aborted hole or closer, if the hole is filled with a high strength mortar and only if the hole is not in the direction of the oblique tensile or shear load.
- Adjustability according to Annex B3
- Cleaning of drill hole is not necessary when using a hollow drill or:
 - If drilling vertically upwards
 - If drilling vertical downwards and the drill hole depth has been increased. It is recommended to increase the drill depth with additional 3 d₀.
- After correct installation further turning of the screw head should not be possible.
- The head of the screw must be fully engaged on the fixture and show no signs of damage.
- For seismic performance category C2 applications: The gap between screw shaft and fixture must be filled with mortar; mortar compressive strength $\geq 50 \text{ N/mm}^2$. (e.g. FIS V, FIS HB, FIS SB or FIS EM Plus)

Installation parameters

Annex B2
of European
Technical Assessment
ETA-17/0740

Adjustment

It is permissible to untighten the screw up to two times for adjustment purposes.
Therefore the screw may be untightened to a maximum of $L_{adj} = 20$ mm to the surface of the initial fixture.
The total permissible thickness of shims added during the adjustment process is $t_{adj} = 10$ mm.

Table B3.1: Minimum thickness of concrete members, minimum spacing and edge distance

Technical Assessment
ETA-17/0740

Installation instruction

Installation of fischer concrete screw ULTRACUT FBS II A4

Drill the hole using hammer drill, hollow drill or diamond core drill.

Drill hole diameter d_0 and drill hole depth h_1 according to table B2.1

a)

Option a) Clean the drill hole

b)

Option b) Cleaning of drill hole is not necessary when using a hollow drill or:

- If drilling vertically upwards or
- If drilling vertically downwards and the drill hole depth has been increased. It is recommended to increase the drill hole depth additional 3 times d_0 .

Installation with any torque impact screw driver up to the maximum mentioned torque moment ($T_{imp,max}$). Alternatively, all other tools without an indicated torque moment are allowed (e.g. ratchet spanner). The indicated torque moments for impact screw driver are therefore not decisive.

After installation a further turning of the screw must not be possible. The head of the screw must be in contact with the fixture and is not damaged.

1.

2.

OPTIONAL:

It is permissible to adjust the screw two times. Therefore, the screw may be untightened to a maximum of $L_{adj} = 20$ mm off the surface of the initial fixture. The total permissible thickness of shims added during the adjustment process is $t_{adj} = 10$ mm. If screw is adjusted, only permissible impact screw driver according to table B2.1 is allowed.

3.

For seismic performance category C2 applications:
The gap between screw shaft and fixture must be filled with mortar;
mortar compressive strength ≥ 50 N/mm² (e.g. FIS V, FIS HB, FIS SB or FIS EM Plus)
