

DÉCLARATION DES PERFORMANCES

DoP 0254

pour fischer FIF-CS-8 (Cheville plastique pour l'utilisation dans le béton et la maçonnerie)

FR

1. <u>Code d'identification unique du type de produit:</u>	DoP 0254
2. <u>Usage(s) prévu(s):</u>	Cheville à visser en plastique pour la fixation de systèmes composites d'isolation thermique par l'extérieur (ETICS) sous enduit dans le béton et la maçonnerie, voir annexes, en particulier les annexes B1 - B3.
3. <u>Fabricant:</u>	fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Allemagne
4. <u>Mandataire:</u>	-
5. <u>Système(s) d'évaluation et de vérification de la constance des performances:</u>	2+
6. <u>Document d'évaluation européen:</u> Evaluation Technique Européenne: Organisme d'évaluation technique: Organisme(s) notifié(s):	EAD 330196-01-0604 ETA-15/0006; 2018-05-31 ETA-Danmark A/S 2873 TU Darmstadt
7. <u>Performance(s) déclarée(s):</u> Sécurité d'utilisation (BWR 4) Résistance caractéristique:	Résistance caractéristique sous charge de traction: Annexe C1 Distance au bord mini.: Annexe B2 Entraxe mini.: Annexe B2
Déplacements:	Charge de traction avec coefficient partiel de sécurité: Annexe C2 Déplacements: Annexe C2
Rigidité de la rosace:	Diamètre de la rosace: Annexe C2 Résistance à la charge de la rosace: Annexe C2 Rigidité de la rosace: Annexe C2
Économie d'énergie et isolation thermique (BWR 6) Transmission thermique:	Transmission thermique ponctuelle de la cheville: Annexe C2 Épaisseur de la couche d'isolant ETICS: Annexe C2
8. <u>Documentation technique appropriée et/ou documentation technique spécifique:</u>	-

Les performances du produit identifié ci-dessus sont conformes aux performances déclarées. Conformément au règlement (UE) no 305/2011, la présente déclaration des performances est établie sous la seule responsabilité du fabricant mentionné ci-dessus.

Cette DoP a été préparée en plusieurs langues. En cas de différend relatif à l'interprétation, la version anglaise prévaudra.

L'annexe comprend des informations volontaires et complémentaires en langue anglaise dépassant les exigences légales (spécifiées de manière neutre).

1 Technical description of product and intended use

Technical description of the product

The screwed-in anchor fischer FIF - CS 8 for fixing of external thermal insulation composite systems (ETICS) consists of an anchor sleeve made of polypropylene with a diameter of 8 mm and an insulation plate made of glass-fiber reinforced polyamide with a diameter of 60 mm. The color of the anchor sleeve is grey. The special compound screw is made of galvanized steel and glass-fiber reinforced polyamide. The anchor is expanded by screwing the screw into the sleeve. It is possible to install the anchor flush to the surface of the insulation.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable EAD

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B1 to B3

The provisions made in this European Technical Assessment are based on an assumed intended working life of the anchor of 25 years.

The indications given on the working life cannot be interpreted as a guarantee given by the producer or Assessment Body, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Characteristics of product

Mechanical resistance and stability (BWR 1):

The essential characteristics regarding mechanical resistance and stability are included under the Basic Works Requirement Safety in use.

Safety in case of fire (BWR 2):

No Performance determined

Safety in use (BWR4):

The essential characteristics are detailed in the Annex from C1 to C3.

Sustainable use of natural resources (BWR7)

No performance determined

Other Basic Requirements are not relevant.

General aspects

The verification of durability is part of testing of the essential characteristics. Durability is only ensured if the specifications of intended use according to Annex B are taken into account.

3.2 Methods of assessment

The assessment of fitness of the anchor for the intended use in relation to the requirements for mechanical resistance and stability and safety in use in the sense of the Basic Requirements 4 has been made in accordance with the EAD 330196-01-0604 Plastic anchors made of virgin or non-virgin material for fixing of external thermal insulation composite systems with rendering.

4 Assessment and verification of constancy of performance (AVCP)

4.1 AVCP system

According to the decision 97/463/EC of the European Commission, the system(s) of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No 305/2011) is 2+.

FIF-CS 8 / 60-180

FIF-CS 8 / 200-340

Legend

- h_{nom} = Overall plastic anchor embedment depth in the base material
- h_1 = Depth of drilled hole to deepest point
- h = Thickness of member (wall)
- h_D = Thickness of insulation material
- t_{tol} = Thickness of equalizing layer or non-load bearing coating

fischer FIF-CS-8

Annex A1

Product description - Installed anchor

Appendix 4 / 12

Anchor sleeve / Specific screw for FIF-CS 8 / 60-180

*) FIF-CS 8 / 60-180:
 $110 \leq L_a \leq 230$

Thickness of insulation material:
 $h_D = L_a - h_{nom} - t_{tol}$

Shaft / Anchor sleeve / Specific screw for FIF-CS 8 / 200-340

*) FIF-CS 8 / 200-340:
 $250 \leq L_a \leq 390$

Thickness of insulation material: $h_D = (L_{a1} + L_{a2}) - h_{nom} - t_{tol}$

Optional: plain surface setting
 Setting tool with long bit adapter or hexagonal adapter available

fischer FIF-CS-8

Specifications of intended use

Anchorage subject to:

- The anchor may only be used for transmission of wind suction loads and shall not be used for the transmission of dead loads of the thermal insulation composite system.

Base materials:

- Normal weight concrete (use category A) according to Annex C1.
- Solid masonry (use category B), according to Annex C1.
- Hollow or perforated masonry (use category C), according to Annex C1.
- Hollow or perforated masonry (use category D), according to Annex C1.
- Hollow or perforated masonry (use category E), according to Annex C1.
- For other base materials of the use categories A, B, C, D or E the characteristic resistance of the anchor may be determined by job site tests according to EOTA Technical Report TR 051.

Temperature Range:

- 0°C to +40°C (max. short term temperature +40°C and max. long term temperature +24°C).

Design:

- The anchorages are designed under the responsibility of an engineer experienced in anchorages and masonry work with the partial safety factors $\gamma_M = 2,0$ and $\gamma_F = 1,5$, if there are no other national regulations.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchors is indicated on the design drawings.
- Fasteners are only to be used for multiple fixings of ETICS.

Installation:

- Drilling method according to Annex C1.
- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters on the site.
- Installation temperature from 0°C to +40°C
- Exposure to UV due to solar radiation of the anchor not protected by rendering ≤ 6 weeks

fischer FIF-CS-8

Intended use - Specifications

Installation parameters for use categories

Appendix 9 / 12

Installation instructions

Standard setting of anchor (plain surface)

1. Drill hole by corresponding drilling method

2. Insert anchor manually

3. Set anchor by machine

4. Correctly installed anchor

Optional:

Setting of anchor by setting tool

1. Drill hole by corresponding drilling method

2. Insert anchor manually

3. Set anchor by setting tool with the machine

4. Correctly installed anchor
