

EKSPLOATĀCIJAS ĪPAŠĪBU DEKLARĀCIJA

DoP: 0058

par termoz SV II ecotwist (Plastmasas dībeļi izmantošanai betonā un mūrī) – LV

1. Unikāls izstrādājuma tipa identifikācijas numurs: **DoP: 0058**
2. Paredzētais izmantojums: **Izmantošanai kompleksajās ārējās siltumizolācijas sistēmās (ETICS) ar apmetumu vēja sūces slodžu pārņemšanai, skatīt pielikumus, jo īpaši pielikumus B 1 - B 3**
3. Ražotājs: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Straße 1, 72178 Waldachtal, Germany**
4. Pilnvarotais pārstāvis: --
5. Eksploataācijas īpašību noturības novērtējuma un pārbaudes (AVCP) sistēma(-as): **2+**
6. Eiropas novērtējuma dokuments: **EAD 330196-01-0604**
Eiropas tehniskais novērtējums: **ETA-12/0208; 2017-05-26**
Tehniskā novērtējuma iestāde: **DIBt**
Paziņotā(-ās) iestāde(-es): **1343 – MPA Darmstadt**
7. Deklarētā(-ās) eksploataācijas īpašība(-as):

Mehāniskā izturība un stabilitāte (BWR 1), Drošība un pieejamība (BWR 4)

- **Raksturīgā izturība:** Skatīt pielikumus, jo īpaši pielikumu C 1
- **Attālumi līdz malām un intervāli:** Skatīt pielikumus, jo īpaši pielikumu B 2
- **Nobīde:** Skatīt pielikumus, jo īpaši pielikumu C 2

Enerģijas ekonomija un siltuma saglabāšana (BWR 6)

- **Siltumpretestības punkts:** Skatīt pielikumus, jo īpaši pielikumu C 2

8. Atbilstīgā tehniskā dokumentācija un/vai īpašā tehniskā dokumentācija: ---

Iepriekš norādītā izstrādājuma eksploataācijas īpašības atbilst deklarēto eksploataācijas īpašību kopumam. Šī eksploataācijas īpašību deklarācija izdota saskaņā ar Regulu (ES) Nr. 305/2011, un par - ir atbildīgs vienīgi iepriekš norādītais ražotājs..

Parakstīts ražotāja vārdā:

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

Tumlingen, 2017-06-02

- Šī deklarācija par tehniskajiem raksturojumiem ir sagatavota dažādās valodās. Gadījumos, ja rodas strīdi attiecībā uz skaidrojumu, prioritāte vienmēr ir angļu versijai.
- Pielikums satur brīvprātīgi sniegtu papildu informāciju angļu valodā, kas pārsniedz (norādīts neatkarīgi no valodas) likumā noteiktās prasības.

Specific part

1 Technical description of the product

The fischer termoz SV II ecotwist screwed-in anchor consist of an anchor sleeve and a screw plate in different colours, both made of polyamide and an accompanying specific screw of galvanised steel.

An illustration and the description of the product are given in Annex 1.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 25 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

Requirements with respect to the mechanical resistance and stability of non- load bearing parts of the works are not included in this Essential requirement but are under the Essential Requirement safety in use.

3.2 Safety and accessibility in use (BWR 4)

Essential characteristic	Performance
Characteristic resistance	See Annex C 1
Edge distances and spacing	See Annex B 2
Displacements	See Annex C 2

3.3 Energy economy and heat retention (BWR 6)

Essential characteristic	Performance
Point thermal transmittance	See Annex C 2

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with EAD No. 330196-01-0604, the applicable European legal act is: [97/463/EC].

The system to be applied is: 2+

Installed anchor : termoz SV II ecotwist

Intended use

Fixing of external thermal insulation composite systems (ETICS) in concrete and masonry

Legend

- h_{nom} = Overall plastic anchor embedment depth in the base material with non-load bearing coating (t_{tol})
- h_1 = Depth of drilled hole to deepest point in the base material
- h = Thickness of base material (wall)
- h_D = Thickness of insulation material
- t_{tol} = Thickness of equalizing layer and / or non-load bearing coating
- h_E = Embedment depth
- h_b = Total bore hole depth
- h_{ef} = Effective anchor embedment depth in the base material

Figures not to scale.

Product description

Anchor types, marking on the anchor plate/sleeve, dimensions and material

Annex A3

Specifications of intended use

Anchorage subject to:

- The anchor may only be used for transmission of wind suction loads and shall not be used for the transmission of dead loads of the external thermal insulation composite system (ETICS).

Base materials:

- Normal weight concrete (use category A), according to Annex C1
- Solid masonry (use category B), according to Annex C1
- Hollow or perforated masonry (use category C), according to Annex C1
- Lightweight aggregate concrete (use category D), according to Annex C1
- Autoclaved aerated concrete (use category E), according to Annex C1
- For other base materials of the use categories A, B, C, D and E the characteristic resistance of the anchor may be determined by job site tests acc. to EOTA Technical Report TR 051 Edition December 2016.

Temperature Range:

- 0°C to +40°C (max. short term temperature +40°C and max. long term temperature +24°C)

Design:

- The anchorages are designed under the responsibility of an engineer experienced in anchorages and masonry work with the partial safety factors $\gamma_M = 2,0$ and $\gamma_F = 1,5$ in absence of other national regulations.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchors is indicated on the design drawings.
- Fasteners are only to be used for multiple fixings of ETICS.

Installation:

- Drillmethod according to Annex C1
- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters on the site
- Installation temperature from 0°C to +40°C
- Exposure to UV due to solar radiation of the anchor not protected by rendering ≤ 6 weeks

Annex B2

Installation instructions

1. Measure insulation thickness h_D
(example: 18 cm = 180 mm).

2. Adjust the setting tool ring corresponding to the insulation material thickness h_D in mm.
Number is legible.
Additionally to the setting tool ring a thin plastic plate (maximum 1 mm thickness) can be used as a stop unit for easier mounting.

3. Drill bore hole.
Total drill hole depth must be at
 $t_{\text{tol}} 0-10 \text{ mm} \rightarrow h_D + 55 \text{ mm}$
 $t_{\text{tol}} 0-30 \text{ mm} \rightarrow h_D + 75 \text{ mm}$
 $t_{\text{tol}} 30-60 \text{ mm} \rightarrow h_D + 105 \text{ mm}$.
Note: Hlz, AAC only with rotary drilling

4. Press the anchor with the screw plate tight against the surface of the insulation material, then start screwing-in the anchor. Setting is finished when the surface of the ring is flush with the surface of the insulation material.

5. When step 4 is completed, press the adjustment tool tight against the installed anchor.
If there is no axial movement of the anchor, remove the setting tool.
In case of axial movement, a new anchor has to be set in a new drill hole.

5. The hole in the insulation material must be filled with a suitable foam (illustrated in Annex A1) or must be closed with an appropriate insulation cylinder.
