

PRESTATIEVERKLARING

Nr. 0010 – NL

1. Unieke identificatiecode van het producttype: **fischer FIF-CS-8**

2. Beoogd(e) gebruik(en):

Product	Beoogd gebruik
Kunststof verbindingen voor gebruik in beton en metselwerk	Ter bevestiging van externe gevelisolatie met stucwerk, zie bijlage, in het bijzonder bijlages B 1 tot en met B 3.

3. Fabrikant: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Straße 1, 72178 Waldachtal, Duitsland**

4. Gemachtigde: --

5. Het systeem of de systemen voor de beoordeling en verificatie van de prestatiebestendigheid: **2+**

6a. Geharmoniseerde norm: ---

Aangemelde instantie(s): ---

6b. Europees beoordelingsdocument: **ETAG 014; 2011-02**

Europese technische beoordeling: **ETA-15/0006; 2015-03-25**

Technische beoordelingsinstantie: **ETA-Danmark A/S**

Aangemelde instantie(s): **1343 – MPA Darmstadt**

7. Aangegeven prestatie(s):

Veiligheid in gebruik (BWR 4)

Essentiële kenmerken	Zie bijlage, in het bijzonder bijlages C 1 tot en met C 3
----------------------	---

8. Geëigende technische documentatie en/of specifieke technische documentatie: ---

De prestaties van het hierboven omschreven product zijn conform de aangegeven prestaties. Deze prestatieverklaring wordt in overeenstemming met Verordening (EU) nr. 305/2011 onder de exclusieve verantwoordelijkheid van de hierboven vermelde fabrikant verstrekt.

Ondertekend voor en namens de fabrikant door:

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

i.V. W. Hengesbach

Tumlingen, 2015-04-09

- Deze prestatieverklaring is opgesteld in verschillende talen. Bij een geschil over de interpretatie prevaleert de engelse versie.

- De bijlage bevat vrijwillige en aanvullende informatie in de Engelse taal boven op de (taal-neutraal gespecificeerde) wettelijke voorschriften.

II SPECIFIC PART OF THE EUROPEAN TECHNICAL ASSESSMENT

1 Technical description of product and intended use

Technical description of the product

The screwed-in anchor fischer FIF - CS 8 for fixing of external thermal insulation composite systems (ETICS) consists of an anchor sleeve made of polypropylene with a diameter of 8 mm and an insulation plate made of glass-fiber reinforced polyamide with a diameter of 60 mm. The color of the anchor sleeve is grey. The special compound screw is made of galvanized steel and glass-fiber reinforced polyamide. The anchor is expanded by screwing the screw into the sleeve. It is possible to install the anchor flush to the surface of the insulation.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable EAD

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B1 to B3

The provisions made in this European Technical Assessment are based on an assumed intended working life of the anchor of 25 years.

The indications given on the working life cannot be interpreted as a guarantee given by the producer or Assessment Body, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Characteristics of product

Mechanical resistance and stability (BWR 1):

The essential characteristics regarding mechanical resistance and stability are included under the Basic Works Requirement Safety in use.

Safety in case of fire (BWR 2):

No Performance determined

Hygiene, health and the environment (BWR3):

The product does not contain/release dangerous substances specified in TR 034, dated March 2012.

Regarding the dangerous substances contained in this European Technical Assessment, there may be other requirements applicable to the products falling within its scope (e.g. transposed European legislation and national laws, regulations and administrative provisions). In order to meet the provisions of the Construction Products Regulation, these requirements need also to be complied with, when and where they apply.

Safety in use (BWR4):

The essential characteristics are detailed in the Annex from C1 to C3.

Sustainable use of natural resources (BWR7)

No performance determined

Other Basic Requirements are not relevant.

General aspects

The verification of durability is part of testing of the essential characteristics. Durability is only ensured if the specifications of intended use according to Annex B are taken into account.

3.2 Methods of assessment

The assessment of fitness of the anchor for the intended use in relation to the requirements for mechanical resistance and stability and safety in use in the sense of the Basic Requirements 4 has been made in accordance with the Guideline for European Technical Assessment of "Plastic anchors for fixing of external thermal insulation composite systems with rendering", ETAG 014, Edition February 2011.

In addition to the specific clauses relating to dangerous substances contained in this European technical Assessment, there may be other requirements applicable

to the products falling within its scope (e.g. transposed European legislation and national laws, regulations and administrative provisions). In order to meet the provisions of the Construction Products Regulation, these requirements need also to be complied with, when and where they apply.

4 Assessment and verification of constancy of performance (AVCP)

4.1 AVCP system

According to the decision 97/463/EC of the European Commission, the system(s) of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No 305/2011) is 2+.

FIF-CS 8 / 60-180

FIF-CS 8 / 200-340

Legend

- h_{nom} = Overall plastic anchor embedment depth in the base material
- h_1 = Depth of drilled hole to deepest point
- h = Thickness of member (wall)
- h_D = Thickness of insulation material
- t_{tol} = Thickness of equalizing layer or non-load bearing coating

fischer FIF-CS-8

Annex A1

Product description - Installed anchor

Anchor sleeve / Specific screw for FIF-CS 8 60-180

*) FIF-CS 8 / 60-180:
 $110 \leq L_a \leq 230$

Thickness of insulation
material: $h_D = L_a - h_{nom} - t_{tol}$

Shaft / Anchor sleeve / Specific screw for FIF-CS 8 200-340

*) FIF-CS 8 / 200-340:
 $250 \leq L_a \leq 390$

Thickness of insulation material:
 $h_D = (L_{a1} + L_{a2}) - h_{nom} - t_{tol}$

**Optional: plain
surface setting**
Setting tool with
long bit adapter
or hexagonal
adapter
available

Product description – Slip-on plates combined with FIF-CS-8

Specifications of intended use

Anchorage subject to:

- The anchor may only be used for transmission of wind suction loads and shall not be used for the transmission of dead loads of the thermal insulation composite system.

Base materials:

- Normal weight concrete (use category A) according to Annex C1.
- Solid masonry (use category B), according to Annex C1.
- Hollow or perforated masonry (use category C), according to Annex C1.
- For other base materials of the use categories A, B and C the characteristic resistance of the anchor may be determined by job site tests according to ETAG 014 Edition February 2011, Annex D.

Temperature Range:

- 0°C to +40°C (max. short term temperature +40°C and max. long term temperature +24°C).

Design:

- The anchorages are designed in accordance with ETAG 014 Edition February 2011 under the responsibility of an engineer experienced in anchorages and masonry work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchors is indicated on the design drawings.
- Fasteners are only to be used for multiple fixings for non-structural applications, according to ETAG 014 Edition February 2011.

Installation:

- Drilling method according to Annex C1.
- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters on the site.
- Installation temperature from 0°C to +40°C
- Exposure to UV due to solar radiation of the anchor not protected by rendering ≤ 6 weeks.

fischer FIF-CS-8

Annex B2

Installation parameters for use categories

Installation instructions

Standard setting of anchor (plain surface)

1. Drill hole by corresponding drilling method
2. Insert anchor manually
3. Set anchor by machine
4. Correctly installed anchor

Optional:

Setting of anchor by setting tool

1. Drill hole by corresponding drilling method
2. Insert anchor manually
3. Set anchor by setting tool with the machine
4. Correctly installed anchor
