

PRESTATIEVERKLARING

DoP 0328

voor fischer Zykon FZEA II (mechanisch anker voor gebruik in beton)

NL

1. Unieke identificatiecode van het producttype: **DoP 0328**
2. Beoogd(e) gebruik(en): **Bevestigingen in gescheurd of ongescheurd beton, zie bijlage, met name de bijlagen B1 - B3.**
3. Fabrikant: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Duitsland**
4. Gemachtigde: **-**
5. Het systeem of de systemen voor de beoordeling en verificatie van de prestatiebestendigheid: **1**
6. Europees beoordelingsdocument: **EAD 330232-01-0601, Edition 05/2021**
Europese technische beoordeling: **ETA-06/0271; 2023-03-23**
Technische beoordelingsinstantie: **DIBt- Deutsches Institut für Bautechnik**
Aangemelde instantie(s): **2873 TU Darmstadt**

7. Aangegeven prestatie(s):

Mechanische weerstand en stabiliteit (BWR 1)

Kenmerkende weerstand tegen spanningsbelasting (statische en quasi-statische belasting) Methode A:

Weerstand tegen staalbreuk: Bijlage C1
Weerstand tegen uittrekken: Bijlage C1
Weerstand tegen betonnen kegelbreuk: Bijlage C1
Robuustheid Bijlages C1, C2
Minimale rand- en hartafstand: Bijlages B2, C1
Randafstand om spleetbreuk onder belasting te voorkomen: Bijlage C1

Kenmerkende weerstand tegen schuifbelasting (statische en quasi-statische belasting), methode A:

Weerstand tegen staalbreuk (afschuifbelasting): Bijlage C2
Weerstand tegen uitbreken (pryout): Bijlage C2

Kenmerkende weerstand voor een vereenvoudigd ontwerp:

Methode B: NPD
Methode C: NPD

Verplaatsingen:

Verplaatsingen onder statische en quasi-statische belasting: Bijlage C4

Kenmerkende weerstand en verplaatsingen voor de seismische prestatiecategorieën C1 en C2:

Trekkrachtweerstand, verplaatsingen categorie C1: NPD
Trekkrachtweerstand, verplaatsingen categorie C2: NPD
Weerstand afschuifbelasting, verplaatsingen categorie C1: NPD
Weerstand afschuifbelasting, verplaatsingen categorie C2: NPD
Factor ringvormige opening: NPD

Veiligheid in geval van brand (BWR 2)

Reactie op brand: Klasse (A1)

Weerstand tegen vuur:

Weerstand bij brand, staalbreuk (trekbelasting): Bijlage C3
Weerstand bij brand, uittrekken, (trekbelasting): Bijlage C3
Weerstand bij brand, staalbreuk (afschuifbelasting): Bijlage C3

Duurzaamheid:

Duurzaamheid: Bijlages A2, B1

8. Geëigende technische documentatie en/of specifieke technische documentatie: **-**

De prestaties van het hierboven omschreven product zijn conform de aangegeven prestaties. Deze prestatieverklaring wordt in overeenstemming met Verordening (EU) nr. 305/2011 onder de exclusieve verantwoordelijkheid van de hierboven vermelde fabrikant verstrekt.

Ondertekend voor en namens de fabrikant door:

Dr.-Ing. Oliver Geibig, Directeur Business Units & Engineering
Tumlingen, 2023-03-31

Jürgen Grün, Directeur Chemie & Kwaliteit

Deze DoP is opgesteld in meerdere talen. In het geval van geschillen over de interpretatie zal de Engelse tekst altijd prevaleren.

Het aanhangsel bevat vrijwillige en aanvullende informatie in het Engels die de (taal-neutraal gespecificeerde) wettelijke vereisten overschrijdt.

Specific Part

1 Technical description of the product

The fischer Zykon-Hammerset anchor FZEA II is an anchor made of galvanised or stainless or high corrosion resistant steel which is placed in an undercut hole and anchored by mechanical interlock with displacement-controlled installation.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the fastener is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the fastener of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Characteristic resistance to tension load (static and quasi static loading) Method A	See Annex B2 and C1
Characteristic resistance to shear load (static and quasi static loading)	See Annex C2
Displacements	See Annex C4
Characteristic resistance and displacements for seismic performance categories C1 and C2	No performance assessed

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Class A1
Resistance to fire	See Annex C3

3.3 Aspects of durability

Essential characteristic	Performance
Durability	See Annex B1

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with the European Assessment Document EAD 330232-01-0601 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

- ① Expansion sleeve
- ② Expansion pin
- ③ Plastic cap
- ④ Safety disk

FZEA II 12 x 40 M10	M10		12	11,5		6,5
FZEA II 14 x 40 M12	M12		14	13,5		9,5

Table A2.2: Materials

Part	Designation	Material	Material	
		FZEA II	Corrosion resistance class acc. to EN 1993-1-4:2006+A1:2015 CRC III FZEA II R	CRC V FZEA II HCR
1	Expansion sleeve	Steel, EN 10277:2018 EN ISO 4042:2022 $\geq 5 \mu\text{m}$	Stainless steel, EN 10088:2014	High corrosion resistant steel EN 10088:2014
2	Expansion pin	Steel, EN 10277:2018 or EN 10263-1:2017 EN ISO 4042:2022 $\geq 5 \mu\text{m}$	Stainless steel, EN 10088:2014	High corrosion resistant steel EN 10088:2014
3	Plastic cap	Plastic		
4	Safety disk	Foil		
Requirements for the fastening screw / threaded rod ¹⁾		Steel, EN ISO 898-1:2013 EN ISO 4042:2022 $\geq 5 \mu\text{m}$ strength class ≥ 5.8	Stainless steel EN ISO 3506-1:2010 1.4401, 1.4404, 1.4578, 1.4571, 1.4439, 1.4362 strength class ≥ 50	High corrosion resistant steel EN ISO 3506-1:2020 1.4529, 1.4565 strength class ≥ 50

¹⁾ The length of the fastening screw shall be determined depending on the thickness of the fixture t_{fix} , admissible tolerances, existing thread length (= maximum screwing depth) and minimum screwing depth (according to Table B2). Washers and screws or threaded rods with hexagon nuts are not included in the scope of delivery

fischer Zykon-Hammerset anchor FZEA II

Product description
Anchor types and dimensions
Materials

Annex A 2

Appendix 4 / 11

Specifications of intended use

Anchorage subject to:

- Static and quasi-static loads
- Fire exposure

Base materials:

- Compacted reinforced or unreinforced normal weight concrete without fibres (cracked and uncracked) of strength classes C20/25 to C50/60 according to EN 206:2013+A2:2021

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions: **FZEA II**
- For all other conditions according to EN 1993-1-4:2006+A1:2015 corresponding to corrosion resistance class:
 - **CRC III** **FZEA II R**
 - **CRC V** **FZEA II HCR**

Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Design of fastenings according to EN 1992-4:2018 and EOTA Technical Report TR 055, Edition February 2018

Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Correct installation is ensured when front face of sleeve is approximately 1 mm below the concrete surface and the control mark on the sleeve is visible as illustrated in Annex B2

Installation instructions

No.	Description
1	Drill a hole perpendicular ($\pm 5^\circ$) to the surface of the anchor base with a hammer drill, using the corresponding Zykon universal drill bit FZUB. The required drill depth is reached once the FZUB depth stop meets the concrete.
2	Once the FZUB depth stop meets the concrete, create the drill hole undercut by making circular swiveling movements with the hammer drill while the hammer mechanism is engaged. Press the hammer drill firmly against the anchor base: 2-3 swiveling movements are sufficient
3	Clean bore hole
4	Drive in the pin with the setting tool FZED
5	Check if the sleeve is under the concrete surface ($U \approx 1\text{mm}$)
6	Check of the setting notch for correct installation
7	Apply T_{inst}
