

DEKLARACJA WŁAŚCIWOŚCI UŻYTKOWYCH

Nr 0005 – PL

1. Niepowtarzalny kod identyfikacyjny typu wyrobu: **kotwa wbijana fischer EA II**

2. Zamierzone zastosowanie

Produkt	Zamierzony cel zastosowania
Kotwy metalowe do stosowania w betonie (typu ciężkiego)	Do mocowania i/lub osadzania w betonie elementów konstrukcyjnych, zobacz dodatek, w szczególności aneksy B 1 do B 4

3. Producent: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Straße 1, 72178 Waldachtal, Niemcy**

4. Upoważniony przedstawiciel: --

5. System(-y) oceny i weryfikacji stałości właściwości użytkowych: **1**

6a. Norma zharmonizowana: ---

Jednostka lub jednostki notyfikowane: ---

6b. Europejski dokument oceny: **ETAG 001; 2013-04**Europejska ocena techniczna: **ETA-07/0135; 2015-01-28**Jednostka ds. oceny technicznej: **DIBt**Jednostka lub jednostki notyfikowane: **1343 – MPA Darmstadt**

7. Deklarowane właściwości użytkowe:

Wytrzymałość mechaniczna i stabilność osadzenia (BWR 1)

Istotne właściwości wyrobu	Funkcjonowanie
Wartości charakterystyczne	Zobacz dodatek, w szczególności aneks C

Ochrona przeciwpożarowa (BWR 2)

Istotne właściwości wyrobu	Funkcjonowanie
Reakcja na ogień	Kotwy spełniają wymagania dla klasy A1
Odporność na działanie ognia	Właściwości użytkowe nieustalone (NPD)

8. Odpowiednia dokumentacja techniczna lub specjalna dokumentacja techniczna: ---

Właściwości użytkowe określonego powyżej wyrobu są zgodne z zestawem deklarowanych właściwości użytkowych.

Niniejsza deklaracja właściwości użytkowych wydana zostaje zgodnie z rozporządzeniem (UE) nr 305/2011 na wyłączną odpowiedzialność producenta określonego powyżej.

W imieniu producenta podpisać(-a):

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

Tumlingen, 2015-02-03

- Niniejsza Deklaracja Właściwości Użytkowych została przygotowana w różnych językach. W razie wątpliwości w interpretacji, wersja angielska jest zawsze miarodajna.

- Dodatek zawierający dobrowolne i uzupełniające informacje w języku angielskim, (neutralne językowo) a wykraczające poza wymagania prawne.

Specific Part**1 Technical description of the product**

The fischer drop-in anchor EA II is an anchor made of galvanized or stainless steel which is placed into a drilled hole and anchored by deformation-controlled expansion.

The fixture shall be anchored with a fastening screw or threaded rod according to Annex 4.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment**3.1 Mechanical resistance and stability (BWR 1)**

Essential characteristic	Performance
Characteristic values	See Annex C

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorage satisfy requirements for Class A1
Resistance to fire	No performance determined (NPD)

3.3 Hygiene, health and the environment (BWR 3)

Not applicable.

3.4 Safety in use (BWR 4)

The essential characteristics regarding Safety in use are included under the Basic Works Requirement Mechanical resistance and stability.

3.5 Protection against noise (BWR 5)

Not applicable.

3.6 Energy economy and heat retention (BWR 6)

Not applicable.

3.7 Sustainable use of natural resources (BWR 7)

The sustainable use of natural resources was not investigated.

3.8 General aspects

The verification of durability is part of testing the essential characteristics. Durability is only ensured if the specifications of intended use according to Annex B are taken into account.

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

According to Decision of the Commission of 24 June 1996 (96/582/EC) (OJ L 254 of 08.10.96 p. 62-65), the system of assessment and verification of constancy of performance (see Annex V and Article 65 Paragraph 2 to Regulation (EU) No 305/2011) given in the following table applies.

Product	Intended use(s)	Level or class	System
Metal anchors for use in concrete (heavy-duty type)	For fixing and/or supporting concrete structural elements or heavy units such as cladding and suspended ceilings	—	1

fischer drop-in anchor EA II

Product description
Material

Annex A 3

Specifications of intended use

Anchorage subject to:

- Static and quasi-static loads.

Base materials:

- Reinforced or unreinforced normal weight concrete according to EN 206-1:2000.
- Strength classes C20/25 to C50/60 according to EN 206-1:2000.
- Non-cracked concrete: all sizes.

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions (zinc coated steel or stainless steel).
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel).

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used).

Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are prepared taking into account the loads to be anchored. The position of the anchor is indicated on the design drawings (e. g. position of the anchor relative to reinforcement or to supports, etc.).
- Anchorages under static or quasi-static actions are designed in accordance with: ETAG 001, Annex C, design method A, Edition August 2010.

Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site.
- In case of aborted hole: new drilling at a minimum distance away of twice the depth of the aborted hole or smaller distance if the aborted drill hole is filled with high strength mortar and if under shear or oblique tension load it is not in the direction of load application.
- Anchor expansion by impact using the setting tools given in Annex B 4. The anchor is properly set if the stop of the setting tool reaches the expansion sleeve. The manual setting tool with installation control leaves a visible mark on the sleeve, as illustrated in Annex B 4.

Minimum edge distance	c _{min}	[mm]	115	115		140	150	200		240	280

Fastening screw or threaded rod:

- Minimum property class and materials according to table A1.
- The length of the fastening screw or threaded rod shall be determined depending on thickness of fixture t_{fix} , admissible tolerances and maximum screw length $l_{s,max}$ as well as minimum screw-in depth $l_{s,min}$.

Installation instructions

No.	Description
1	Create drill hole.
2	Clean from drill-dust.
3	Set anchor till anchor is flush with surface of concrete.
4	Expand the sleeve by driving the pin into the sleeve and control the correct setting.
5	Fixation of fixture with max. $T_{inst.}$
