

## DEKLARACJA WŁAŚCIWOŚCI UŻYTKOWYCH

DoP: 0107

dla System iniekcynny FIS VL (Łączniki wklejane do zastosowania w betonie) – PL

1. Niepowtarzalny kod identyfikacyjny typu wyrobu: **DoP: 0107**
2. Zamierzone zastosowanie: **Mocowanie w betonie zarysowanym lub niezarysowanym, zobacz dodatek, w szczególności aneksy B 1 do B 8**
3. Producent: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Straße 1, 72178 Waldachtal, Niemcy**
4. Upoważniony przedstawiciel: --
5. System(-y) oceny i weryfikacji stałości właściwości użytkowych: **1**
6. Europejski dokument oceny: **ETAG 001; 2013-04**  
Europejska ocena techniczna: **ETA-10/0352; 2017-08-10**  
Jednostka dsoceny technicznej: **DIBt**  
Jednostka lub jednostki notyfikowane: **1343 – MPA Darmstadt**
7. Deklarowane właściwości użytkowe:

### Wytrzymałość mechaniczna i stabilność osadzenia (BWR 1), Bezpieczeństwo użytkowania (BWR 4)

- **Wartości charakterystyczne przy obciążeniu statycznym i quasi-statycznym, Przemieszczenia: Zobacz dodatek, w szczególności aneksy C 1 do C 6**

### Ochrona przeciwpożarowa (BWR 2)

- **Reakcja na ogień: spełniają wymagania dla klasy A1**
- **Odporność na działanie ognia: NPd (Właściwości użytkowe nieustalone)**

8. Odpowiednia dokumentacja techniczna lub specjalna dokumentacja techniczna: ---

Właściwości użytkowe określonego powyżej wyrobu są zgodne z zestawem deklarowanych właściwości użytkowych. Niniejsza deklaracja właściwości użytkowych wydana zostaje zgodnie z rozporządzeniem (UE) nr 305/2011 na wyłączną odpowiedzialność producenta określonego powyżej.

W imieniu producenta podpisał(-a):

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

Tumlingen, 2017-08-17

- Niniejsza Deklaracja Właściwości Użytkowych została przygotowana w różnych językach. W razie wątpliwości w interpretacji, wersja angielska jest zawsze miarodajna.
- Dodatek zawierający dobrowolne i uzupełniające informacje w języku angielskim, (neutralne językowo) a wykraczające poza wymagania prawne.

**Specific Part**

**1 Technical description of the product**

The fischer injection system FIS VL is a bonded anchor consisting of a cartridge with injection mortar fischer FIS VL, FIS VL High Speed or FIS VL Low Speed and a steel element.

The steel element is placed into a drilled hole filled with injection mortar and is anchored via the bond between metal part, injection mortar and concrete.

The product description is given in Annex A.

**2 Specification of the intended use in accordance with the applicable European Assessment Document**

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

**3 Performance of the product and references to the methods used for its assessment**

**3.1 Mechanical resistance and stability (BWR 1)**

Essential characteristic	Performance
Characteristic values for static and quasi-static action, displacements	See Annex C 1 to C 6

**3.2 Safety in case of fire (BWR 2)**

Essential characteristic	Performance
Reaction to fire	Anchorage satisfy requirements for Class A1
Resistance to fire	No performance assessed

**3.3 Hygiene, health and the environment (BWR 3)**

Regarding dangerous substances there may be requirements (e.g. transposed European legislation and national laws, regulations and administrative provisions) applicable to the products falling within the scope of this European Technical Assessment. In order to meet the provisions of Regulation (EU) No 305/2011, these requirements need also to be complied with, when and where they apply.

**3.4 Safety in use (BWR 4)**

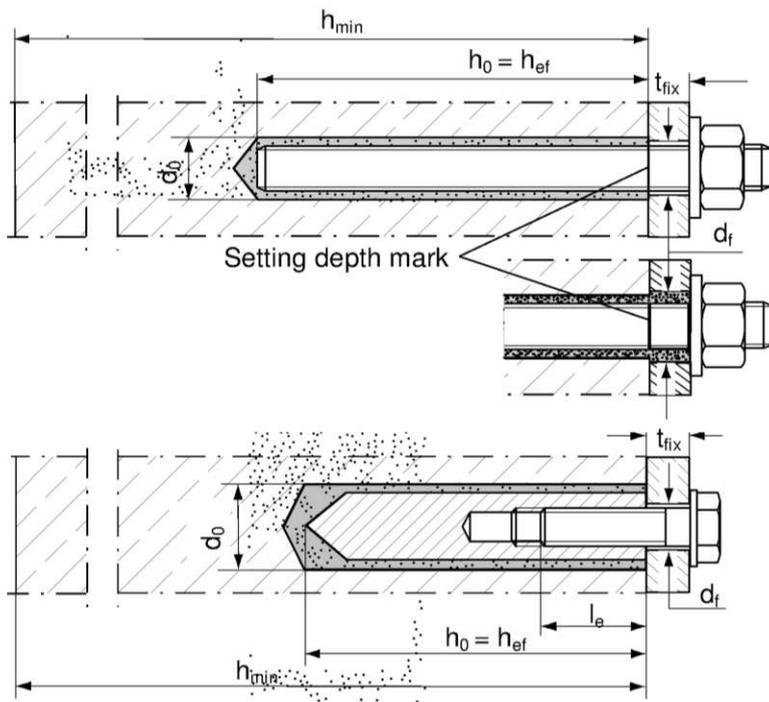

The essential characteristics regarding Safety in use are included under the Basic Works Requirement Mechanical resistance and stability.

**4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base**

In accordance with guideline for European technical approval ETAG 001, April 2013 used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

**Installation conditions**

**Anchor rod**  
Pre-positioned anchor

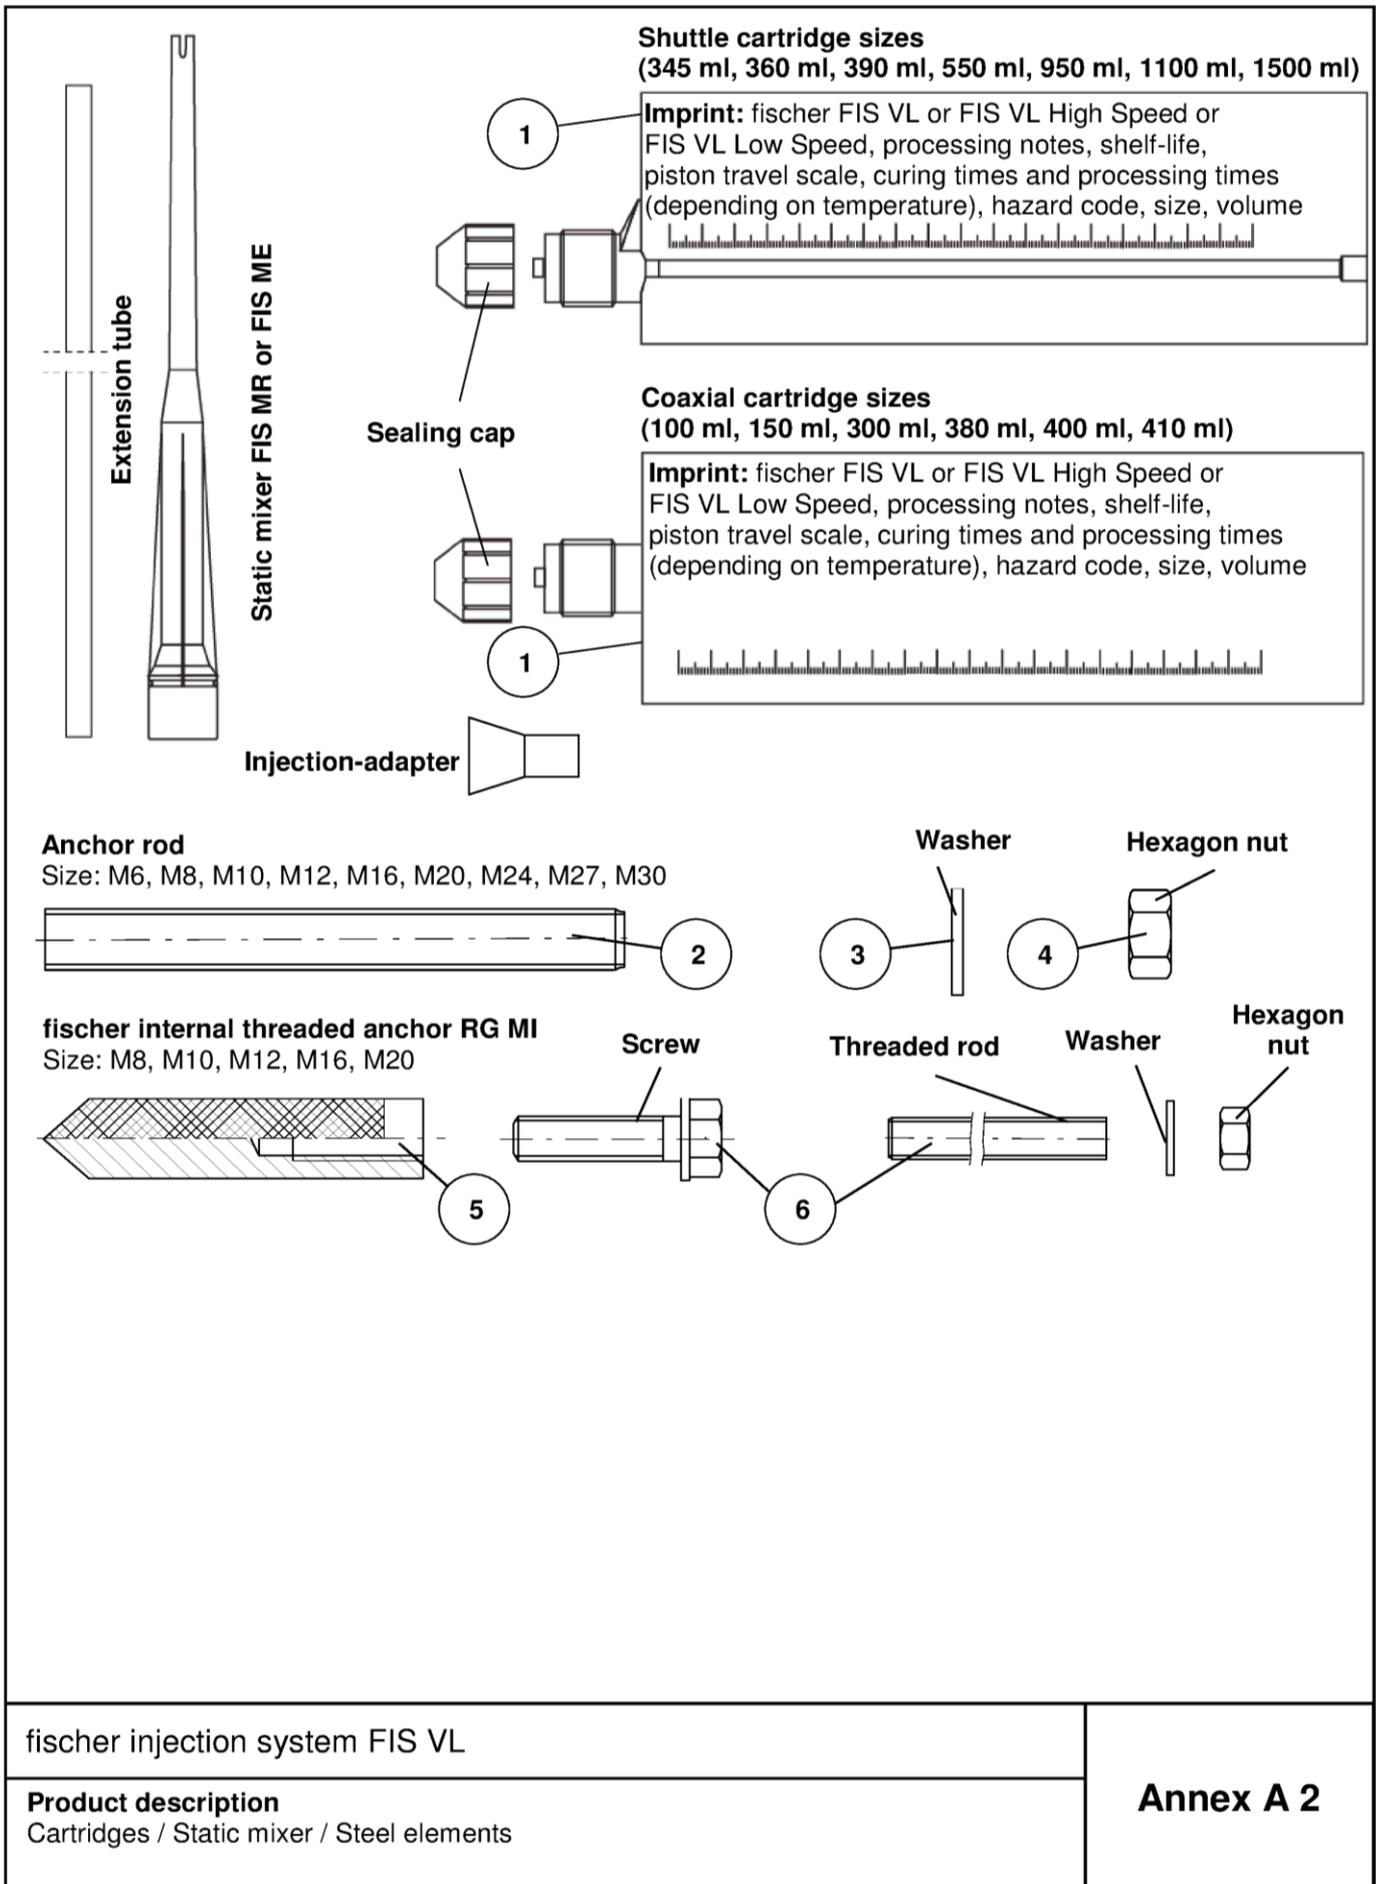

**Anchor rod**  
Push through anchor  
(annular gap filled with mortar)

**fischer**  
**internal threaded anchor RG MI**  
Pre-positioned anchor only

	Temperature range II	-40 °C to +120 °C (max. long term temperature +72 °C and max. short term temperature +120 °C)			
<sup>1)</sup> Only with coaxial cartridges: 380 ml, 400 ml, 410 ml					
fischer injection system FIS VL					<b>Annex B 1</b>
<b>Intended Use</b> Specifications (part 1)					

**Specifications of intended use (part 2)**

**Base materials:**

- Reinforced or unreinforced normal weight concrete Strength classes C20/25 to C50/60 according to EN 206-1:2000

**Use conditions (Environmental conditions):**

- Structures subject to dry internal conditions (zinc coated steel, stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure, to permanently damp internal conditions or in other particular aggressive conditions (high corrosion resistant steel)

Note: Particular aggressive conditions are e. g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e. g. in desulphurization plants or road tunnels where de-icing materials are used)

**Design:**

- Anchorages have to be designed by a responsible engineer with experience of concrete anchor design
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e. g. position of the anchor relative to reinforcement or to supports, etc.)
- Anchorages under static or quasi-static actions are designed in accordance with EOTA Technical Report TR 029 "Design of bonded anchors" Edition September 2010 or CEN/TS 1992-4: 2009

**Installation:**

- Anchor installation is to be carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- In case of aborted hole: The hole shall be filled with mortar
- Anchorage depth should be marked and adhered to on installation
- Overhead installation is allowed

fischer injection system FIS VL

Minimum thickness of concrete member	$h_{min}$	$h_{ef} + 30$ ( $\geq 100$ )				$h_{ef} + 2d_0$					
Maximum installation torque	$T_{inst,max}$	[Nm]	5	10	20	40	60	120	150	200	300

<sup>1)</sup> For larger clearance holes in the fixture see TR 029, 4.2.2.1 or CEN/TS 1992-4-1:2009, 5.2.3.1

**Anchor rods:**

**fischer FIS A**

**Marking (on random place) fischer anchor rod:**

Property class 8.8, stainless steel A4 property class 80 and high corrosion resistant steel C property class 80: •

Stainless steel A4 property class 50 and high corrosion resistant steel C property class 50: ••

Or colour coding according to DIN 976-1

**Commercial standard threaded rods, washers and hexagon nuts may also be used if the following requirements are fulfilled:**

- Materials, dimensions and mechanical properties according Annex A 3, Table A1
- Inspection certificate 3.1 according to EN 10204:2004, the documents have to be stored
- Setting depth is marked

fischer injection system FIS VL

**Intended Use**  
Installation parameters anchor rods

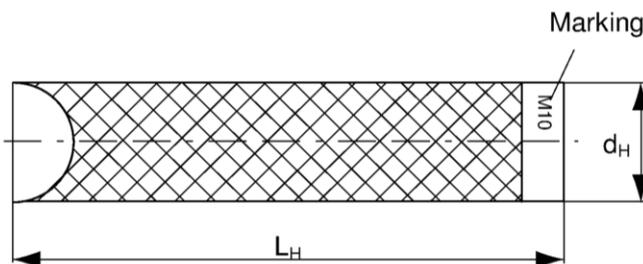

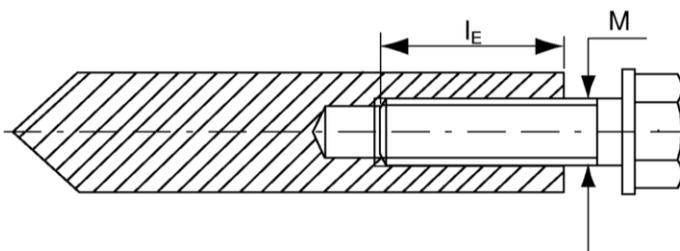

**Annex B 3**

**Table B3:** Installation parameters for fischer internal threaded anchors RG MI

Size		M8	M10	M12	M16	M20
Diameter of anchor	$d_H$	12	16	18	22	28
Nominal drill bit diameter	$d_0$	14	18	20	24	32
Drill hole depth	$h_0$	$h_0 = h_{ef} = L_H$				
Effective anchorage depth ( $h_{ef} = L_H$ )	$h_{ef}$	90	90	125	160	200
Minimum spacing and minimum edge distance	$s_{min} = c_{min}$	55	65	75	95	125

<sup>1)</sup> In wet concrete or flooded holes the curing times must be doubled

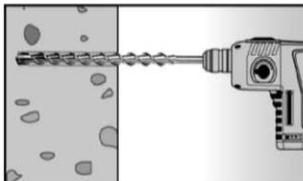

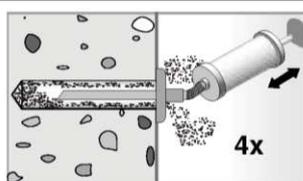

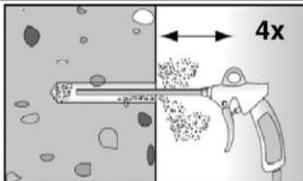

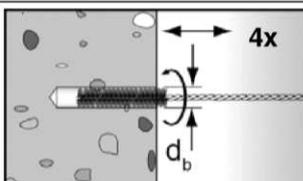

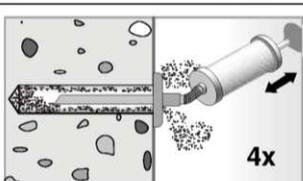

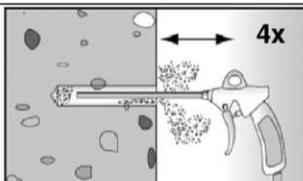

fischer injection system FIS VL

**Intended Use**  
Cleaning tools  
Processing times and curing times

**Annex B 5**

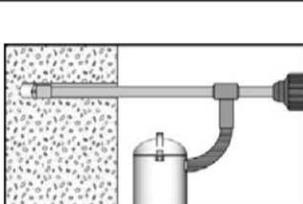

**Installation instructions part 1**

Drilling and cleaning the hole (hammer drilling with standard drill bit)

1		<p>Drill the hole. Drill hole diameter <math>d_0</math> and drill hole depth <math>h_0</math> see <b>Tables B2, B3</b></p>		
2		<p>Clean the drill hole: For <math>h_{ef} \leq 12d</math> and <math>d_0 &lt; 18</math> mm blow out the hole four times by hand</p>		<p>For <math>h_{ef} &gt; 12d</math> and / or <math>d_0 \geq 18</math> mm blow out the hole four times with oil-free compressed air (<math>p \geq 6</math> bar)</p>
3		<p>Brush the drill hole four times. For deep holes use an extension. Corresponding brushes see <b>Table B4</b></p>		
4		<p>Clean the drill hole: For <math>h_{ef} \leq 12d</math> and <math>d_0 &lt; 18</math> mm blow out the hole four times by hand</p>		<p>For <math>h_{ef} &gt; 12d</math> and / or <math>d_0 \geq 18</math> mm blow out the hole four times with oil-free compressed air (<math>p \geq 6</math> bar)</p>

Go to step 5

Drilling and cleaning the hole (hammer drilling with hollow drill bit)

1		<p>Check a suitable hollow drill (see <b>Table B1</b>) for correct operation of the dust extraction</p>
2		<p>Use a suitable dust extraction system, e. g. Bosch GAS 35 M AFC or a comparable dust extraction system with equivalent performance data</p> <p>Drill the hole with hollow drill bit. The dust extraction system has to extract the drill dust nonstop during the drilling process and must be adjusted to maximum power. Diameter of drill hole <math>d_0</math> and drill hole depth <math>h_0</math> see <b>Tables B2, B3</b></p>

Go to step 5

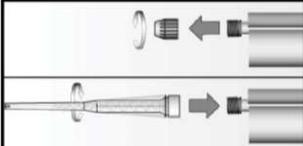

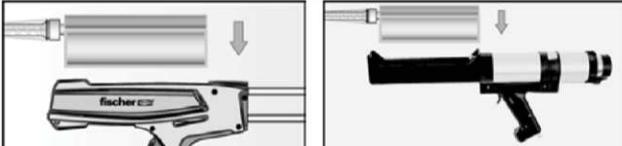

fischer injection system FIS VL

**Intended use**  
Installation instructions part 1

**Annex B 6**

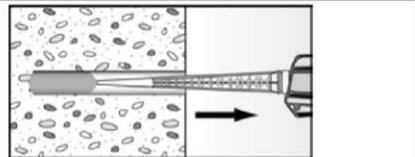

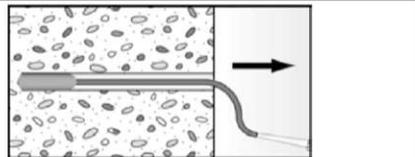

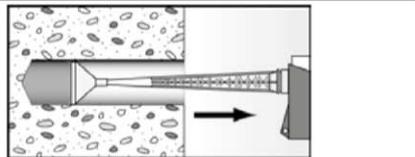

**Installation instructions part 2**

Preparing the cartridge

5		<p>Remove the sealing cap</p> <p>Screw on the static mixer (the spiral in the static mixer must be clearly visible)</p>
6		<p>Place the cartridge into the dispenser</p>
7		<p>Extrude approximately 10 cm of material until the resin is evenly grey in colour. Do not use mortar that is not uniformly grey</p>

Go to step 8

**Mörtelinjektion**

8	 <p>Fill approximately 2/3 of the drill hole with mortar. Always begin from the bottom of the hole and avoid bubbles</p>	 <p>For drill hole depth <math>\geq 150</math> mm use an extension tube</p>	 <p>For overhead installation, deep holes (<math>h_0 &gt; 250</math> mm) or drill hole diameter (<math>d_0 \geq 40</math> mm) use an injection-adapter</p>
---	--	--	--

Go to step 9

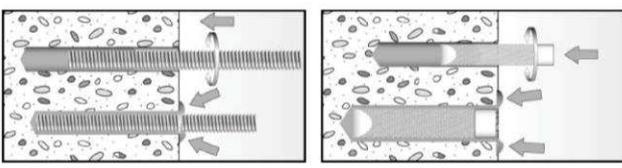

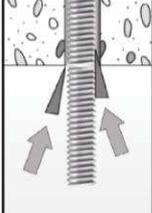

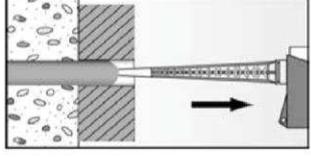

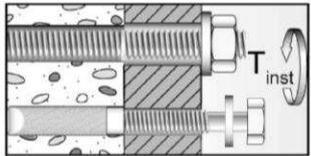

fischer injection system FIS VL

**Intended use**  
Installation instructions part 2

**Annex B 7**

**Installation instructions part 3**

Installation of anchor rods or fischer internal threaded anchors RG MI

<p>9</p>		<p>Only use clean and oil-free anchor elements. Mark the setting depth of the anchor. Push the anchor rod or fischer internal threaded RG MI anchor down to the bottom of the hole, turning it slightly while doing so. After inserting the anchor element, excess mortar must be emerged around the anchor element.</p>
	 <p>For overhead installations support the anchor rod with wedges. (e. g. fischer centering wedges)</p>	 <p>For push through installation fill the annular gap with mortar</p>
<p>10</p>	 <p>Wait for the specified curing time <math>t_{cure}</math> see <b>Table B5</b></p>	<p>11</p>  <p>Mounting the fixture <math>T_{inst,max}</math> see <b>Tables B2 and B3</b></p>

<p>fischer injection system FIS VL</p>	<p><b>Annex B 8</b></p>
