

## DEKLARACJA WŁAŚCIWOŚCI UŻYTKOWYCH

**fischer**   
innovative solutions

Nr 0072 – PL

1. Niepowtarzalny kod identyfikacyjny typu wyrobu: **system iniekcyjny fischer FIS V**

2. Zamierzone zastosowanie

Produkt	Zamierzony cel zastosowania
kotwa wklejana do zastosowania w beton	Do mocowania i/lub osadzania w betonie elementów konstrukcyjnych, zobacz dodatek, w szczególności aneksy B 1 do B 10

3. Producent: **fischerwerke GmbH & Co. KG, Otto-Hahn-Straße 15, 79211 Denzlingen, Niemcy**

4. Upoważniony przedstawiciel: --

5. System(-y) oceny i weryfikacji stałości właściwości użytkowych: **1**

6a. Norma zharmonizowana: ---

Jednostka lub jednostki notyfikowane: ---

6b. Europejski dokument oceny: **ETAG 001; 2013-04**Europejska ocena techniczna: **ETA-02/0024; 2016-06-17**Jednostka dsoceny technicznej: **DIBt**Jednostka lub jednostki notyfikowane: **1343 – MPA Darmstadt**

7. Deklarowane właściwości użytkowe:

**Wytrzymałość mechaniczna i stabilność osadzenia (BWR 1)**

Istotne właściwości wyrobu	Funkcjonowanie
Wartości charakterystyczne dla obciążzeń statycznych i quasi-statycznych w przypadku wymiarowania wg TR 029 lub CEN/TS 1992-4:2009, Przesunięcia	Zobacz dodatek, w szczególności aneksy C 1 do C 10

**Ochrona przeciwpożarowa (BWR 2)**

Istotne właściwości wyrobu	Funkcjonowanie
Reakcja na ogień	Wymagania użytkowe dla klasy A1
Odporność na działanie ognia	Właściwości użytkowe nieustalone (NPD)

8. Odpowiednia dokumentacja techniczna lub specjalna dokumentacja techniczna: ---

Właściwości użytkowe określonego powyżej wyrobu są zgodne z zestawem deklarowanych właściwości użytkowych.

Niniejsza deklaracja właściwości użytkowych wydana zostaje zgodnie z rozporządzeniem (UE) nr 305/2011 na wyjątkową odpowiedzialność producenta określonego powyżej.

W imieniu producenta podpisał(-a):

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

Tumlingen, 2016-06-24

- Niniejsza Deklaracja Właściwości Użytkowych została przygotowana w różnych językach. W razie wątpliwości w interpretacji, wersja angielska jest zawsze miarodajna.
- Dodatek zawierający dobrowolne i uzupełniające informacje w języku angielskim, (neutralne językowo) a wykraczające poza wymagania prawne.

**Specific Part****1 Technical description of the product**

The injection system fischer FIS V is a bonded anchor consisting of a cartridge with injection mortar fischer FIS V and a steel element.

The steel element is placed into a drilled hole filled with injection mortar and is anchored via the bond between metal part, injection mortar and concrete.

The product description is given in Annex A.

**2 Specification of the intended use in accordance with the applicable European Assessment Document**

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

**3 Performance of the product and references to the methods used for its assessment****3.1 Mechanical resistance and stability (BWR 1)**

<b>Essential characteristic</b>	<b>Performance</b>
Characteristic values under static and quasi-static action for design according to TR 029 or CEN/TS 1992-4:2009, Displacements	See Annex C 1 to C 10

**3.2 Safety in case of fire (BWR 2)**

<b>Essential characteristic</b>	<b>Performance</b>
Reaction to fire	Anchorages satisfy requirements for Class A1
Resistance to fire	No performance assessed

**3.3 Hygiene, health and the environment (BWR 3)**

Regarding dangerous substances there may be requirements (e.g. transposed European legislation and national laws, regulations and administrative provisions) applicable to the products falling within the scope of this European Technical Assessment. In order to meet the provisions of Regulation (EU) No 305/2011, these requirements need also to be complied with, when and where they apply.

**3.4 Safety in use (BWR 4)**

The essential characteristics regarding Safety in use are included under the Basic Works Requirement Mechanical resistance and stability.

**4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base**

In accordance with guideline for European technical approval ETAG 001, April 2013 used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

**Installation conditions**

Installation temperature	-10 °C to +40 °C									
In-service temperature	Temperature range I	-40 °C to +80 °C		(max. long term temperature +50 °C and max. short term temperature +80 °C)						
	Temperature range II	-40 °C to +120 °C		(max. long term temperature +72 °C and max. short term temperature +120 °C)						

## Specifications of intended use (part 2)

### **Base materials:**

- Reinforced or unreinforced normal weight concrete according to EN 206:2013
- Strength classes C20/25 to C50/60 according to EN 206:2013

### **Use conditions (Environmental conditions):**

- Structures subject to dry internal conditions (zinc coated steel, stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure, to permanently damp internal conditions or in other particular aggressive conditions (high corrosion resistant steel)

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used)

### **Design:**

- Anchorages have to be designed by a responsible engineer with experience of concrete anchor design
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Anchorages under static or quasi-static actions are designed in accordance with EOTA Technical Report TR 029 "Design of bonded anchors" Edition September 2010 or CEN/TS 1992-4:2009

### **Installation:**

- Anchor installation is to be carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- In case of aborted hole: The hole shall be filled with mortar
- Anchorage depth should be marked and adhered to on installation
- Overhead installation is allowed

	push through anchorage		9	11	14	16	20	26	30	32	40	
Minimum thickness of concrete member	$h_{\text{min}}$		$h_{\text{ef}} + 30$ ( $\geq 100$ )					$h_{\text{ef}} + 2d_0$				
Maximum installation torque	$T_{\text{inst,max}}$	[Nm]	5	10	20	40	60	120	150	200	300	

<sup>1)</sup> For larger clearance holes in the fixture see TR 029, 4.2.2.1 or CEN/TS 1992-4-1:2009, 5.2.3.1

### Anchor rod:

### Marking (on random place) fischer anchor rod:

Property class 8.8, stainless steel, property class 80 or high corrosion resistant steel, property class 80: •  
Stainless steel A4, property class 50 and high corrosion resistant steel, property class 50: ••  
Or colour coding according to DIN 976-1

### Commercial standard threaded rods, washers and hexagon nuts may also be used if the following requirements are fulfilled:

- Materials, dimensions and mechanical properties according Annex A 3, Table A1
- Inspection certificate 3.1 according to EN 10204:2004, the documents have to be stored
- Setting depth is marked

fischer injection system FIS V

**Intended Use**  
Installation parameters anchor rods

**Annex B 3**

**Table B3:** Installation parameters for fischer internal threaded anchors RG MI

Size		M8	M10	M12	M16	M20

## Installation instructions part 1

Drilling and cleaning the hole (hammer drilling with standard drill bit)

1		Drill the hole. Drill hole diameter $d_0$ and drill hole depth $h_0$ see <b>Tables B2, B3, B4, B5</b>		
2		Clean the drill hole: For $h_{ef} \leq 12d$ and $d_0 < 18 \text{ mm}$ blow out the hole four times by hand		For $h_{ef} > 12d$ and / or $d_0 \geq 18 \text{ mm}$ blow out the hole four times with oil-free compressed air ( $p \geq 6 \text{ bar}$ )
3		Brush the drill hole four times. For deep holes use an extension. Corresponding brushes see <b>Table B6</b>		
4		Clean the drill hole: For $h_{ef} \leq 12d$ and $d_0 < 18 \text{ mm}$ blow out the hole four times by hand		For $h_{ef} > 12d$ and / or $d_0 \geq 18 \text{ mm}$ blow out the hole four times with oil-free compressed air ( $p \geq 6 \text{ bar}$ )

Go to step 5

Drilling and cleaning the hole (hammer drilling with hollow drill bit)

1		Check a suitable hollow drill (see <b>Table B1</b> ) for correct operation of the dust extraction
2		Use a suitable dust extraction system, e.g. Bosch GAS 35 M AFC or a comparable dust extraction system with equivalent performance data  Drill the hole with hollow drill bit. The dust extraction system has to extract the drill dust nonstop during the drilling process. Diameter of drill hole $d_0$ and drill hole depth $h_0$ see <b>Tables B2, B3, B4, B5</b>

Go to step 5

fischer injection system FIS V

**Intended use**  
Installation instructions part 1

**Annex B 8**

**Installation instructions part 2**

## Preparing the cartridge

5		Remove the sealing cap Screw on the static mixer (the spiral in the static mixer must be clearly visible)
6		Place the cartridge into the dispenser
7		Extrude approximately 10 cm of material until the resin is evenly grey in colour. Do not use mortar that is not uniformly grey

Go to step 8

## Mörtelinjektion

8		Fill approximately 2/3 of the drill hole with mortar. Always begin from the bottom of the hole and avoid bubbles		For drill hole depth $\geq 150$ mm use an extension tube		For overhead installation, deep holes $h_0 > 250$ mm or drill hole diameter $d_0 \geq 40$ mm use an injection-adapter
---	--	--	--	--	--	---

Go to step 9

fischer injection system FIS V

**Intended use**  
Installation instructions part 2

**Annex B 9**

### Installation instructions part 3

#### Installation of anchor rods or fischer internal threaded anchors RG MI

9		<p>Only use clean and oil-free anchor elements. Mark the setting depth of the anchor. Push the threaded rod or fischer internal threaded RG MI anchor down to the bottom of the hole, turning it slightly while doing so. After inserting the anchor element, excess mortar must be emerged around the anchor element. If not, pull out the anchor element immediately and reinject mortar.</p>
10	 <p>For overhead installations support the anchor rod with wedges. (e.g. fischer centering wedges)</p>	 <p>For push through installation fill the annular gap with mortar</p>
10	 <p>Wait for the specified curing time <math>t_{cure}</math> see <b>Table B7</b></p>	 <p>Mounting the fixture <math>T_{inst,max}</math> see <b>Tables B2 and B3</b></p>

#### Installation reinforcing bars and fischer rebar anchor FRA

9		<p>Only use clean and oil-free reinforcing bars or fischer FRA. Mark the setting depth. Turn while using force to push the reinforcement bar or the fischer FRA into the filled hole up to the setting depth mark</p>
10		<p>When the setting depth mark is reached, excess mortar must be emerged from the mouth of the drill hole. If not, pull out the anchor element immediately and reinject mortar</p>
10	 <p>Wait for the specified curing time <math>t_{cure}</math> see <b>Table B7</b></p>	 <p>Mounting the fixture <math>T_{inst,max}</math> see <b>Table B5</b></p>
