8. Odpowiednia dokumentacja techniczna lub specjalna –
dokumentacja techniczna:

Właściwości użytkowe określonego powyżej wyrobu są zgodne z zestawem deklarowanych właściwości użytkowych. Niniejsza deklaracja właściwości użytkowych wydana zostaje zgodnie z rozporządzeniem (UE) nr 305/2011 na wyłączną odpowiedzialność producenta określonego powyżej.

W imieniu producenta podpisał(-a):

Dr. Oliver Geibig, Dyrektor Zarządzający ds. Jednostek Biznesowych i Inżynierii
Tumlingen, 2021-03-16

Jürgen Grün, Dyrektor Zarządzający ds. Chemii i Jakości

Niniejsza Deklaracja Właściwości Użytkowych została przygotowana w różnych językach. W razie wątpliwości w interpretacji, wersja angielska jest zawsze miarodajna.

Załącznik zawiera dobrowolne i uzupełniające informacje w języku angielskim (neutralne językowo), a wykraczające poza wymagania prawne.

Specific Part

1 Technical description of the product

The fischer nail anchor FNA II is an anchor made of galvanised (FNA II) or stainless steel (FNA II R) or high corrosion resistant steel (FNA II HCR). The anchor is pushed into a predrilled cylindrical drill hole and expanded by loading.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Class A1
Resistance to fire	See Annex C 2

3.2 Safety in use (BWR 4)

Essential characteristic	Performance
Characteristic resistance to tension and shear load (static and quasi-static loading)	See Annex B 2 and C 1
Durability	See Annex B 1

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with European Assessment Document EAD No. 330747-00-0601, the applicable European legal act is: [97/161/EC].

The system to be applied is: 2+

**Only for multiple use for non-structural applications according to
EAD 330747-00-0601**

Design types:

FNA II 6x25/..
FNA II 6x30/..

FNA II 6x25/.. RB
FNA II 6x30/.. RB

FNA II 6x25 M6/..
FNA II 6x30 M6/..

FNA II 6x25 M8/..
FNA II 6x30 M8/..

FNA II 6x25 OE
FNA II 6x30 OE

Intended use:

Additional marking only galvanised steel for $h_{ef} = 25$ mm (centring, bar or points)

(Fig. not to scale)

fischer nail anchor FNA II

Product description
Product and intended use

Annex A 1

Appendix 2 / 8

Marking:

Nail head

Marking at **X**: "O" for $h_{ef} = 25$ mm
and "I" for $h_{ef} = 30$ mm;

Marking at **Y**: t_{fix}

Marking at **Z**: "R" or "HCR" (stainless steel)

Expansion sleeve (or bolt)

e.g.:

For stainless steel additional marking "R" or "HCR"

Marking-Codes for Y:

	A	Q	T	N	P	B	L	H	U
t_{fix}	5	10	15	20	25	30	35	40	45
	D	V	S	W	X	E	M	Z	K
t_{fix}	50	55	60	65	70	75	80	85	90
	(A)	F	(B)	(D)	(E)	G	J		
t_{fix}	95	100	105	110	115	120	125		

At $t_{fix} > 125$ mm the corresponding figure is marked.

Shaft (threaded bolt)

Marking e.g.: 6/10
thread size/thickness of the fixture

Marking e.g.: 8/10
thread size /thickness of the fixture
Exception: 8/5 no marking

Product description
Marking and materials

Annex A 2

Specifications of intended use

Fastenings subject to:

Size	FNA II, FNA II R, FNA II HCR
Hammer drilling with standard drill bit 	All types
Static and quasi-static loads	✓
Cracked and uncracked concrete	
Fire exposure	

Base materials:

- Compacted reinforced and unreinforced normal weight concrete without fibres (cracked and uncracked) according to EN 206:2013+A1:2016
- Strength classes C12/15 to C50/60 according to EN 206:2013+A1:2016

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions (FNA II, FNA II R, FNA II HCR) with $h_{ef} \geq 25$ mm
- For all other conditions according to EN 1993-1-4:2006 + A1:2015 corresponding to corrosion resistance class
 - CRC III: for FNA II R with $h_{ef} \geq 30$ mm
 - CRC V: for FNA II HCR with $h_{ef} \geq 30$ mm

Design:

- Fastenings are to be designed under the responsibility of an engineer experienced in fastenings and concrete work
- Verifiable calculation notes and drawings have to be prepared taking account of the loads to be anchored. The position of the fastener is indicated on the design drawings (e.g. position of the fastener relative to reinforcement or to supports, etc.)
- Simplified design method C according to EN 1992-4:2018 Annex G

Installation:

- Fastener installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters on site
- Use of the fastener only as supplied by the manufacturer without exchanging the components of the fastener
- Checking before placing the fastener to ensure that the strength class of the concrete in which the fastener is to be placed, is in the range given and is not lower than that of the concrete to which the characteristic loads apply
- Check of concrete being well compacted, e.g. without significant voids
- Drill hole created perpendicular +/- 5° to concrete surface, positioning without damaging the reinforcement
- In case of aborted hole: new drilling at a minimum distance twice the depth of the aborted drill hole or smaller distance if the aborted drill hole is filled with high strength mortar (e.g. FIS HB, FIS SB, FIS EM Plus, FIS V Plus) and if under shear or oblique tension load it is not in the direction of load application

¹⁾ The effective anchorage depth $h_{ef} = 30 + 5$ mm is reached by setting the anchor FNA II 6x30/... 5 mm deeper with an anchor that is 5 mm longer than required for the actual thickness of the fixture.

²⁾ A fixing point is defined as a single anchor or a group of 2 or 4 anchors

In case of fire attack from more than one side, the edge distance shall be $c_{fi,min} \geq 300$ mm
