

DEKLARACJA WŁAŚCIWOŚCI UŻYTKOWYCH

DoP 0253

dla fischer termoz SV II ecotwist (Łączniki tworzywowe do zastosowania w betonie i w murach)

PL

1. Niepowtarzalny kod identyfikacyjny typu wyrobu: DoP 0253
2. Zamierzone zastosowanie: Plastikowa kotwa wkręcana do mocowania zewnętrznych systemów ociepleń (ETICS) z tynkiem w betonie i murze, zobacz załącznik, w szczególności aneksy B1 - B3.
3. Producent: fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Niemcy
4. Upoważniony przedstawiciel: -
5. System(-y) oceny i weryfikacji stałości właściwości użytkowych: 2+
6. Europejski dokument oceny: EAD 330196-01-0604
Europejska ocena techniczna: ETA-12/0208; 2017-12-05
Jednostka ds. oceny technicznej: DIBt- Deutsches Institut für Bautechnik
Jednostka lub jednostki notyfikowane: 2873 TU Darmstadt
7. Deklarowane właściwości użytkowe:
Bezpieczeństwo użytkowania (BWR 4)

Nośność charakterystyczna:	Nośność charakterystyczna na wyrywanie:	Aneks C1
	Minimalna odległość od krawędzi:	Aneks B2
	Minimalna odległość osiowa:	Aneks B2
Przesunięcia:	Nośność na wyrywanie ze współczynnikiem częściowym:	Aneks C2
	Przesunięcia:	Aneks C2
Szttywność talerzyka:	Średnica talerzyka:	NPD
	Obciążenie niszczące talerzyka:	NPD
	Szttywność talerzyka:	NPD

Oszczędność energii i zatrzymywanie ciepła (BWR 6)

Przenikalność cieplna:	Punktowa przenikalność cieplna kotwy:	Aneks C2
	Grubość warstwy izolacyjnej ETICS:	Aneks C2
8. Odpowiednia dokumentacja techniczna lub specjalna dokumentacja techniczna: -

Właściwości użytkowe określonego powyżej wyrobu są zgodne z zestawem deklarowanych właściwości użytkowych. Niniejsza deklaracja właściwości użytkowych wydana zostaje zgodnie z rozporządzeniem (UE) nr 305/2011 na wyłączną odpowiedzialność producenta określonego powyżej.

W imieniu producenta podpisał(-a):

Dr.-Ing. Oliver Geibig, Dyrektor Zarządzający ds. Jednostek Biznesowych i Inżynierii
Tumlingen, 2021-01-15

Jürgen Grün, Dyrektor Zarządzający ds. Chemii i Jakości

Niniejsza Deklaracja Właściwości Użytkowych została przygotowana w różnych językach. W razie wątpliwości w interpretacji, wersja angielska jest zawsze miarodajna.

Załącznik zawiera dobrowolne i uzupełniające informacje w języku angielskim (neutralne językowo), a wykraczające poza wymagania prawne.

Specific Part

1 Technical description of the product

The fischer termoz SV II ecotwist screwed-in anchor consist of an anchor sleeve and a screw plate in different colours, both made of polyamide (virgin material) and an accompanying specific screw of galvanised steel.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verification and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 25 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Characteristic tension resistance	See Annex C1
Edge distances and spacing	See Annex B2
Displacements	See Annex C2

3.2 Energy economy and heat retention (BWR 6)

Essential characteristic	Performance
Point thermal transmittance	See Annex C2

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with EAD No. 330335-00-0604, the applicable European legal act is: [97/463/EC].

The system to be applied is: 2+

Installed anchor : termoz SV II ecotwist

Legend

- h_{nom} = Overall plastic anchor embedment depth in the base material with non-load bearing coating (t_{tol})
- h_1 = Depth of drilled hole to deepest point in the base material
- h = Thickness of base material (wall)
- h_D = Thickness of insulation material
- t_{tol} = Thickness of equalizing layer and / or non-load bearing coating
- h_E = Embedment depth
- h_b = Total bore hole depth
- h_{ef} = Effective anchor embedment depth in the base material

Figures not to scale.

Appendix 4 / 9

Specifications of intended use

Anchorage subject to:

- The anchor may only be used for transmission of wind suction loads and shall not be used for the transmission of dead loads of the external thermal insulation composite system (ETICS).

Base materials:

- Normal weight concrete (use category A), according to Annex C1
- Solid masonry (use category B), according to Annex C1
- Hollow or perforated masonry (use category C), according to Annex C1
- Lightweight aggregate concrete (use category D), according to Annex C1
- Autoclaved aerated concrete (use category E), according to Annex C1
- For other base materials of the use categories A, B, C, D and E the characteristic resistance of the anchor may be determined by job site tests acc. to EOTA Technical Report TR 051 Edition December 2016.

Temperature Range:

- 0°C to +40°C (max. short term temperature +40°C and max. long term temperature +24°C)

Design:

- The anchorages are designed under the responsibility of an engineer experienced in anchorages and masonry work with the partial safety factors $\gamma_M = 2,0$ and $\gamma_F = 1,5$ in absence of other national regulations.
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchors is indicated on the design drawings.
- Fasteners are only to be used for multiple fixings of ETICS.

Installation:

- Drill method according to Annex C1
- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters on the site
- Installation temperature from 0°C to +40°C
- Exposure to UV due to solar radiation of the anchor not protected by rendering ≤ 6 weeks

Intended use
Specifications

Annex B1

Appendix 5 / 9

Table B2.1: Installation parameters				termoz SV II ecotwist
Drill hole diameter	d_0	=	[mm]	8
Cutting diameter of drill bit	d_{cut}	$\leq$		8,45
Depth of drill hole to deepest point	h_1	$\geq$		55/75/105
Total bore hole depth at SV II ecotwist t_{tol} 0-10 mm				$h_D + 55$
Total bore hole depth at SV II ecotwist t_{tol} 0-30 mm	h_b	$\geq$		$h_D + 75$
Total bore hole depth at SV II ecotwist t_{tol} 30-60 mm				$h_D + 105$
Overall plastic anchor embedment depth in the base material (see Annex A1) at SV II ecotwist t_{tol} 0-10 mm				45
Overall plastic anchor embedment depth in the base material (see Annex A1) at SV II ecotwist t_{tol} 0-30 mm	h_{nom}	=		65
Overall plastic anchor embedment depth in the base material (see Annex A1) at SV II ecotwist t_{tol} 30-60 mm				95

Table B2.2: Minimum distances and dimensions				termoz SV II ecotwist
Minimum thickness of member	h_{min}	=	[mm]	100 ¹⁾
Minimum allowable spacing	s_{min}			100
Minimum allowable edge distance	c_{min}			100

¹⁾ For weather resistant external wall panels: $h_{min}=40$ mm

Scheme of distances and spacing

fischer termoz SV II ecotwist	Annex B2 Appendix 6 / 9
Intended use	
Installation parameters Minimum thickness of member, distances and spacing	

Installation instructions

1. Measure insulation thickness h_D
(example: 18 cm = 180 mm).

2. Adjust the setting tool ring corresponding to the insulation material thickness h_D in mm.
Number is legible.
Additionally to the setting tool ring a thin plastic plate (maximum 1 mm thickness) can be used as a stop unit for easier mounting.

3. Drill bore hole.
Total drill hole depth must be at
 $t_{tol} \text{ 0-10 mm} \rightarrow h_D + 55 \text{ mm}$
 $t_{tol} \text{ 0-30 mm} \rightarrow h_D + 75 \text{ mm}$
 $t_{tol} \text{ 30-60 mm} \rightarrow h_D + 105 \text{ mm}.$
Note: Hlz, AAC only with rotary drilling

4. Press the anchor with the screw plate tight against the surface of the insulation material, then start screwing-in the anchor. Setting is finished when the surface of the ring is flush with the surface of the insulation material.

5. When step 4 is completed, press the adjustment tool tight against the installed anchor.
If there is no axial movement of the anchor, remove the setting tool.
In case of axial movement, a new anchor has to be set in a new drill hole.

5. The hole in the insulation material must be filled with a suitable foam (illustrated in Annex A1) or must be closed with an appropriate insulation cylinder.
