

DECLARAȚIA DE PERFORMANȚĂ

DoP 0292

pentru fischer Drop-in Anchor EA II (Ancore din metal pentru utilizare în beton)

RO

1. Cod unic de identificare al produsului-tip:

2. Utilizare (utilizări) preconizată (preconizate):

DoP 0292

Element de fixare post-instalat pentru utilizare în beton pentru sisteme nestructurale redundante, consultați suplimentul, în special anexele B1-B4.

3. Fabricant:

fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Germany

4. Reprezentant autorizat:

—

5. Sistemul (sistemele) de evaluare și de verificare a constantei performantei:

2+

6. Documentul de evaluare european:

EAD 330747-00-0601

Evaluarea tehnică europeană:

ETA-07/0142; 2021-09-24

Organismul de evaluare tehnică:

DIBt- Deutsches Institut für Bautechnik

Organism (organisme) notificat(e):

2873 TU Darmstadt

7. Performanța (performante) declarată (declarate):

Siguranță în utilizare (BWR 4)

Rezistență caracteristică la întindere (pentru încărcări statice și cvasistatiche):

Rezistență la cedarea oțelului:

NPD

Rezistență la smulgere:

NPD

Rezistență la cedarea conului de beton:

NPD

Robustete:

Anexe C1, C2

Distanță minimă față de margine și între ancore:

Anexe B2, C2

Distanță față de margine pentru a preveni fisuri sub încărcare:

NPD

Rezistență caracteristică la forfecare (pentru încărcări statice și cvasistatiche):

Rezistență la cedarea oțelului (rezistență la forfecare):

Anexe C1, C2

$V_{Rk,s}=NPD$; $k_7=NPD$

Rezistență la cedarea cu braț de levier:

NPD

Rezistență la cedarea muchiei betonului:

NPD

Rezistență caracteristică pentru toate direcțiile de încărcare și modurile de cedare pentru o proiectare simplificată:

Rezistență caracteristică:

Anexe C1, C2

Durabilitate:

Durabilitate:

Anexe A3, B1

Siguranță în caz de incendiu (BWR 2)

Reacție la foc:

Clasa (A1)

Rezistență la incendiu:

Rezistență la foc în ipoteza cedării oțelului (rezistență la întindere):

Anexa C3

Rezistență la foc în ipoteza cedării prin smulgere (rezistență la întindere):

Anexa C3

Rezistență la foc în ipoteza cedării oțelului (rezistență la forfecare):

Anexa C3

8. Documentație tehnică adecvată și/sau documentație tehnică specifică: —

Performanța produsului identificat mai sus este în conformitate cu setul de performanțe declarate. Această declarație de performanță este eliberată în conformitate cu Regulamentul (UE) nr. 305/2011, pe răspunderea exclusivă a fabricantului identificat mai sus.

Semnată pentru și în numele fabricantului de către:

Dr.-Ing. Oliver Geibig, Director Executiv Departament Business & Inginerie
Tumlingen, 2021-09-30

Jürgen Grün, Director Executiv Departament Chimic & Calitate

Această declarație de performanță a fost întocmită în mai multe limbi. În cazul unei divergențe de interpretare, versiunea în limba engleză prevalează întotdeauna.

Suplimentul include informații voluntare și complementare în limba engleză, în afara cerințelor legale (specificate neutru din punct de vedere al limbii).

Specific Part

1 Technical description of the product

The fischer drop-in anchor EA II is an anchor made of galvanised or stainless steel which is placed into a drilled hole and anchored by deformation-controlled expansion.

The fixture shall be anchored with a fastening screw or threaded rod according to Annex B 5.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Class A1
Resistance to fire	See Annex C 3

3.2 Safety and accessibility in use (BWR 4)

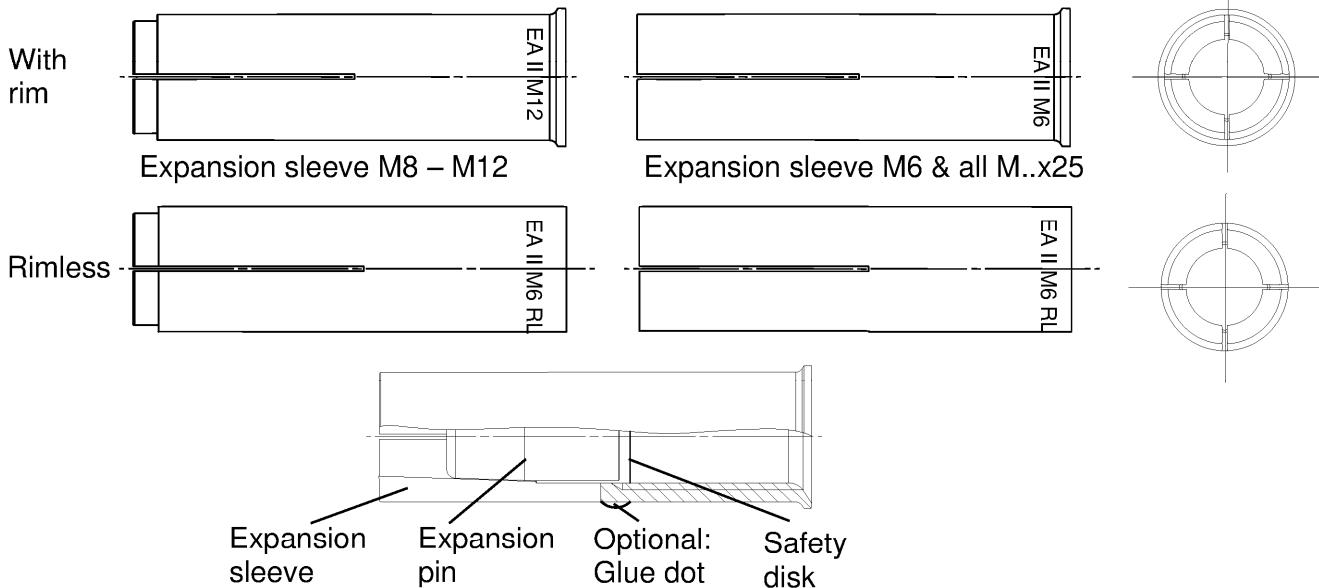

Essential characteristic	Performance
Characteristic resistance for all load directions and modes of failure for simplified design	See Annex C 1 and C 2
Durability	See Annex B 1

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

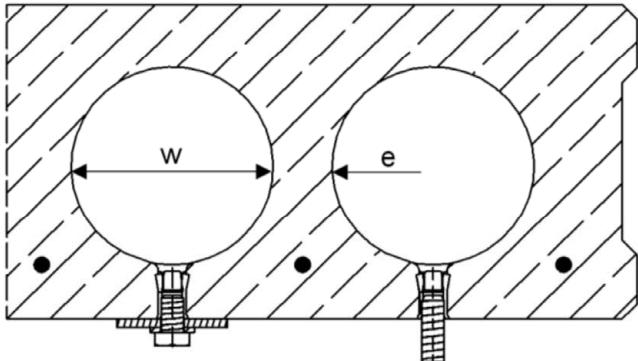

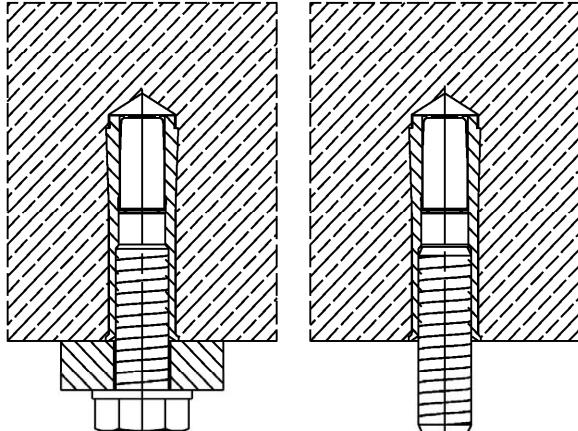

In accordance with European Assessment Document EAD No. 330747-00-0601, the applicable European legal act is: [97/161/EC].

The system to be applied is: 2+

Only for use for redundant non-structural systems according to EN 1992-4:2018

Intended use in concrete

Intended use in precast pre-stressed hollow concrete slabs ($w/e \leq 4,2$) with a flange thickness $d_b \geq 35 \text{ mm}$ (or 30 mm → see Annex C2) and only for $h_{ef} = 25 \text{ mm}$

Specifications of intended use

Anchorage subject to:

fischer drop-in anchor EA II (all versions)	M6	M8	M10	M12
Hammer drilling with standard drill bit				
Hammer drilling with hollow drill bit with automatic cleaning		All types		
Material	Steel Stainless steel	Zinc plated R		
Static and quasi-static loads			✓	
Cracked and uncracked concrete				
Fire exposure in concrete C12/15 to C50/60				
Fire exposure in prestressed hollow concrete slabs			No performance assessed	

Base materials:

- Compacted reinforced and unreinforced normal weight concrete without fibres (cracked and uncracked) according to EN 206:2013+A1:2016
- Strength classes C12/15 to C50/60 according to EN 206:2013+A1:2016
- Precast prestressed hollow concrete slabs with w/e ≤ 4,2 and strength classes C30/37 to C50/60: M6x25, M8x25, M10x25 and M12x25

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions: **EA II, EA II R**
- For all other conditions according to EN 1993-1-4:2006 + A1:2015 corresponding to corrosion resistance class CRC III **EA II R with $h_{ef} \geq 30$ mm**

Design:

- Anchorage are designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e. g. position of the anchor relative to reinforcement or to supports, etc.)
- Only for use for redundant non-structural system according to EN 1992-4:2018, Chapter 7.3. Design Method B according to EN 1992-4:2018.
- Anchorage under fire exposure are designed according to EN 1992-4:2018 Annex D

Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Create drill hole with hammer drill or with hollow drill and vacuum cleaner
- The anchor may only be used once
- In case of aborted hole: New hole must be drilled at a minimum distance of twice the depth of the aborted hole or closer, if the hole is filled with a high strength mortar (e.g. FIS EM Plus, FIS SB or FIS V Plus) and only if the hole is not in the direction of the oblique tensile or shear load
- Anchor expansion by impact using the setting tools given in Annex A 4. The anchor is properly set, if the stop of the setting tool reaches the expansion sleeve. The manual setting tool with installation control leaves a visible mark on the sleeve, as illustrated in Annex A 4 and B 4

Installation instructions

No.	Description
1	Create drill hole with hammer drill or stop drill or with hollow drill and vacuum cleaner
2	Clean from drill-dust
3	Set anchor till anchor is flush with surface of concrete
4	Expand the sleeve by driving the pin with the corresponding setting tool into the sleeve and control the correct setting
5	Fixation of fixture. Maximum installation torque $T_{\text{inst,max}}$ must not be exceeded
