

IZJAVA O LASTNOSTIH

št. 0028 – SL

1. Enotna identifikacijska oznaka tipa proizvoda: **injekcijski sistem fischer FIS VL**

2. Predvidena uporaba:

Produkt	Uporaba
Kovinski vložek za uporabo v betonu (visoka obremenitev)	Za sidranje in/ali podpiranje nosilnih betonskih elementov ali težkih gradbenih elementov kot so obleke sten in spuščeni stropovi, glej prilogo B 1 - B 6

3. Proizvajalec: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Straße 1, 72178 Waldachtal, Nemčija**

4. Pooblaščen zastopnik: --

5. Sistemi ocenjevanja in preverjanja nespremenljivosti lastnosti: **1**

6a. Harmonizirani standard: ---

Priglašeni organi: ---

6b. Evropski ocenjevalni dokument: **ETAG 001; 2013-04**

Evropska tehnična ocena: **ETA-10/0352; 2015-07-06**

Organ za tehnično ocenjevanje: **DIBt**

Priglašeni organi: **1343 – MPA Darmstadt**

7. Navedene lastnosti:

Mehanska odpornost in stabilnost (BWR 1)

Bistvena značilnost	zmogljivost
karakteristične vrednosti za meritve po TR 029	Glej prilogo C 1 - C 3
karakteristične vrednosti za meritve po CEN/TS 1992-4:2009	Glej prilogo C 4 - C 6
Premiki pri natezni in prečni sili	glej prilogo C 7

Ognjevarnost (BWR 2)

Bistvena značilnost	zmogljivost
Reakcija na ogenj	Zidni vložek zadovoljuje zahteve klase A 1
Ognjeodpornost	zmogljivost ni ocenjena

8. Ustrezna tehnična dokumentacija in/ali specifična tehnična dokumentacija: ---

Lastnosti proizvoda, navedenega zgoraj, so v skladu z navedenimi lastnostmi. Za izdajo te izjave o lastnostih je v skladu z Uredbo (EU) št. 305/2011 odgovoren izključno proizvajalec, naveden zgoraj.

Podpisal za in v imenu proizvajalca:

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

- Ta izjava o lastnostih je bila pripravljena v različnih jezikih.. V primeru nerazumevanja, se vedno upošteva angleška različica..

- Priloga vsebuje informacije v angleškem jeziku, ki presegajo zakonske zahteve.

Specific Part**1 Technical description of the product**

The fischer injection system FIS VL is a bonded anchor consisting of a cartridge with injection mortar fischer FIS VL and a steel element. The steel element consist of

- a fischer threaded rod FIS A or RGM of sizes M6 to M30 or
- a internal threaded anchor RG MI of sizes M8 to M20 or

The steel element is placed into a drilled hole filled with injection mortar and is anchored via the bond between metal part, injection mortar and concrete.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment**3.1 Mechanical resistance and stability (BWR 1)**

Essential characteristic	Performance
Characteristic resistance for design according to TR 029	See Annex C 1 to C 3
Characteristic resistance for design according to CEN/TS 1992-4:2009	See Annex C 4 to C 6
Displacements under tension and shear loads	See Annex C 7

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorage satisfy requirements for Class A1
Resistance to fire	No performance assessed

3.3 Hygiene, health and the environment (BWR 3)

Regarding dangerous substances there may be requirements (e.g. transposed European legislation and national laws, regulations and administrative provisions) applicable to the products falling within the scope of this European Technical Assessment. In order to meet the provisions of Regulation (EU) No 305/2011, these requirements need also to be complied with, when and where they apply.

3.4 Safety in use (BWR 4)

The essential characteristics regarding Safety in use are included under the Basic Works Requirement Mechanical resistance and stability.

3.5 Protection against noise (BWR 5)

Not applicable.

3.6 Energy economy and heat retention (BWR 6)

Not applicable.

3.7 Sustainable use of natural resources (BWR 7)

The sustainable use of natural resources was not investigated.

3.8 General aspects

The verification of durability is part of testing the essential characteristics. Durability is only ensured if the specifications of intended use according to Annex B are taken into account.

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

According to Decision of the Commission of 24 June 1996 (96/582/EC) (OJ L 254 of 08.10.96 p. 62-65), the system of assessment and verification of constancy of performance (see Annex V and Article 65 Paragraph 2 to Regulation (EU) No 305/2011) given in the following table applies.

Product	Intended use	Level or class	System
Metal anchors for use in concrete (heavy-duty type)	For fixing and/or supporting concrete structural elements or heavy units such as cladding and suspended ceilings	—	1

Installation condition

fischer threaded rod
pre-positioned anchorage

fischer threaded rod
push through anchorage
(annular gap filled with mortar)

**fischer internal threaded
anchor RG MI**
only pre-positioned anchorage

fischer injection system FIS VL**Product description**
Materials**Annex A 3**

Specifications of intended use**Table B1: Overview use categories and performance categories**

Anchorages subject to		FIS VL with ...			
		Threaded rod 		Internal threaded anchor RG MI 	
Hammer drilling		all sizes			
Static and quasi static load, in	un-cracked concrete	M6 to M30	Tables: C1, C3 ,C5, C7, C9, C10	M8 to M20	Tables: C2, C4, C6, C8, C11, C12
	cracked concrete	M10 to M20			
Use category	Dry or wet concrete	M6 to M30		M8 to M20	
	Flooded hole ¹⁾	M12 to M30		M8 to M20	
Installation temperature		-10°C to +40°C			
In-service temperature	Temperature range I	-40°C to +80°C		(max. long term temperature +50°C and max. short term temperature +80°C)	
	Temperature range II	-40°C to +120°C		(max. long term temperature +72°C and max. short term temperature +120°C)	

¹⁾ Only coaxial cartridges: 380 ml, 400 ml and 410 ml

Base materials:

- Reinforced or unreinforced normal weight concrete according to EN 206-1:2013
- Strength classes C20/25 to C50/60 according to EN 206-1:2013

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions exists (zinc coated steel, stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist (stainless steel or high corrosion resistant steel)
- Structures subject to external atmospheric exposure and to permanently damp internal condition, if other particular aggressive conditions exist (high corrosion resistant steel)
Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used)

Design:

- Anchorages have to be designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Anchorages under static or quasi-static actions are designed in accordance with TR 029 "Design of bonded anchors", Edition September 2010 or CEN/TS 1992-4:2009

Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Overhead installation allowed

	Push through anchorage d_f [mm]	9	11	14	16	20	26	30	32	40
Minimum thickness of concrete member	h_{min} [mm]	$h_{ef} + 30 (\geq 100)$				$h_{ef} + 2d_0$				

¹⁾ For larger clearance holes in the fixture see TR 029, 4.2.2.1 or CEN/TS 1992-4-1:2009, 5.2.3.1

fischer threaded rods FIS A and RGM

Marking:

Property class 8.8 or high corrosion-resistant steel C, property class 80: •
Stainless steel A4, property class 50 or high corrosion-resistant steel C, property class 50:••

Commercial standard threaded rods, washers and hexagon nuts may also be used if the following requirements are fulfilled:

- Materials, dimensions and mechanical properties according Annex A 3, Table A1
- Inspection certificate 3.1 according to EN 10204:2004, the documents should be stored
- Marking of embedment depth

fischer injection system FIS VL

Intended Use
 Cleaning tools / Processing - and curing times

Annex B 4

Installation instructions part 1 Drilling and cleaning the hole

1		Drill the hole. Drill hole diameter d_0 and drill hole depth h_0 see Tables B2 , B3 .
2		$h_{ef} \leq 12d$ and $d_0 < 18$ mm: Blow out the drill hole four times by hand.
		$h_{ef} > 12d$ and/or $d_0 \geq 18$ mm: Blow out the drill hole four times, using oil-free compressed air ($p > 6$ bar).
3		Brush the drill hole four times using an adequate steel brush (see Table B4).
4		$h_{ef} \leq 12d$ and $d_0 < 18$ mm: Blow out the drill hole four times by hand.
		$h_{ef} > 12d$ and/or $d_0 \geq 18$ mm: Blow out the drill hole four times, using oil-free compressed air ($p > 6$ bar).

Preparing the cartridge

5		Twist off the sealing cap.
6		Twist on the static mixer (the spiral in the static mixer must be clearly visible).
7		Place the cartridge into the suitable dispenser.
8		Press out approximately 10 cm of mortar until the resin is permanently grey in colour. mortar which is not grey in colour will not cure and must be disposed of.

fischer injection system FIS VL

Intended Use
Installation instructions part 1

Annex B 5

Installation instructions part 2

Injection of the mortar

9		Fill approximately 2/3 of the drill hole with mortar. Always begin from the bottom of the hole to eliminate voids.	 For drill hole depth ≥ 150 mm use an extension tube.
---	---	--	--

Installation fischer threaded rods or internal threaded anchors RG MI

10			Only use clean and oil-free anchor elements. Press the anchor rod or internal threaded anchor RG MI down to the bottom of the hole, turning it slightly while doing so. After inserting the anchor element, excess mortar must emerge around the anchor element.	
		For overhead installation support the anchor element with wedges.		For push-through installation fill the annular gap also with mortar.
11		Wait for the specified curing time t_{cure} see Table B5.		
12		Mounting the fixture $T_{\text{inst,max}}$ see Tables B2 or B3		

fischer injection system FIS VL

Intended Use
