

## PRESTANDADEKLARATION

### DoP 0292

för fischer Drop-in Anchor EA II (Metallankare för användning i betong)

SV

1. Produkttypens unika identifikationskod:
2. Avsedd användning/avsedda användningar:

### DoP 0292

Efterinstallerat fästelement för användning i betong i icke-strukturella system, se bilaga, särskilt bilagor B1-B4.

3. Tillverkare: fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Tyskland

4. Tillverkarens representant: -
5. System för bedömning och fortlöpande kontroll av prestanda: 2+

6. Europeiskt bedömningsdokument: EAD 330747-00-0601  
Europeisk teknisk bedömning: ETA-07/0142; 2021-09-24  
Tekniskt bedömningsorgan: DIBt- Deutsches Institut für Bautechnik  
Anmält/anmälta organ: 2873 TU Darmstadt

7. Angiven prestanda:  
**Säkerhet vid användning (BWR 4)**

**Karakteristisk bärformåga för spänning (för statisk och kvari-statisk belastning):**

Stålets motståndskraft:	NPD
Motstånd mot att skruven dras ut:	NPD
Motstånd i betongkonen:	NPD
Kraftighet:	Bilagor C1, C2
Minsta kant- och axelavstånd:	Bilagor B2, C2
Kantavstånd för att slippa sprickor under last:	NPD

**Karakteristisk bärformåga för skjutning (för statisk och kvari-statisk belastning):**

Motstånd i stålet (tvärlast):	Bilagor C1, C2	V <sub>Rk,s</sub> =NPD; k <sub>7</sub> =NPD
Motstånd mot fläckning:	NPD	
Motstånd mot skador i betong:	NPD	

**Karakteristiskt motståndskraft för laster i alla riktningar och motstånd mot fel. En förenklad design:**

Karakteristisk motståndskraft:	Bilagor C1, C2
--------------------------------	----------------

**Hållbarhet:**

Hållbarhet:	Bilagor A3, B1
-------------	----------------

**Säkerhet vid brand (BWR 2)**

Reaktion vid brand:	Klass (A1)
---------------------	------------

**Motståndskraft mot eld:**

Brandmotstånd i stålet (tvärlast):	Bilaga C3
Brandmotstånd mot utdrag (draglast):	Bilaga C3
Brandmotstånd i stålet (tvärlast):	Bilaga C3

8. Lämplig teknisk dokumentation och/eller särskild teknisk dokumentation: -

Prestandan för ovanstående produkt överensstämmer med den angivna prestandan. Denna prestandadeklaration har utfärdats i enlighet med förordning (EU) nr 305/2011 på eget ansvar av den tillverkare som anges ovan.

Undertecknad på tillverkarens vägnar av:

Dr.-Ing. Oliver Geibig, Managing Director Business Units & Engineering  
Tumlingen, 2021-09-30

Jürgen Grün, Managing Director Chemistry & Quality

Denna DoP har förberetts på olika språk. I händelse av tvist om tolkningen ska den engelska versionen alltid råda.

Bilagan innehåller frivilliga och kompletterande information på engelska som överskrider (det specifika språkets) lagkrav.

## **Specific Part**

### **1 Technical description of the product**

The fischer drop-in anchor EA II is an anchor made of galvanised or stainless steel which is placed into a drilled hole and anchored by deformation-controlled expansion.

The fixture shall be anchored with a fastening screw or threaded rod according to Annex B 5.

The product description is given in Annex A.

### **2 Specification of the intended use in accordance with the applicable European Assessment Document**

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

### **3 Performance of the product and references to the methods used for its assessment**

#### **3.1 Safety in case of fire (BWR 2)**

<b>Essential characteristic</b>	<b>Performance</b>
Reaction to fire	Class A1
Resistance to fire	See Annex C 3

#### **3.2 Safety and accessibility in use (BWR 4)**

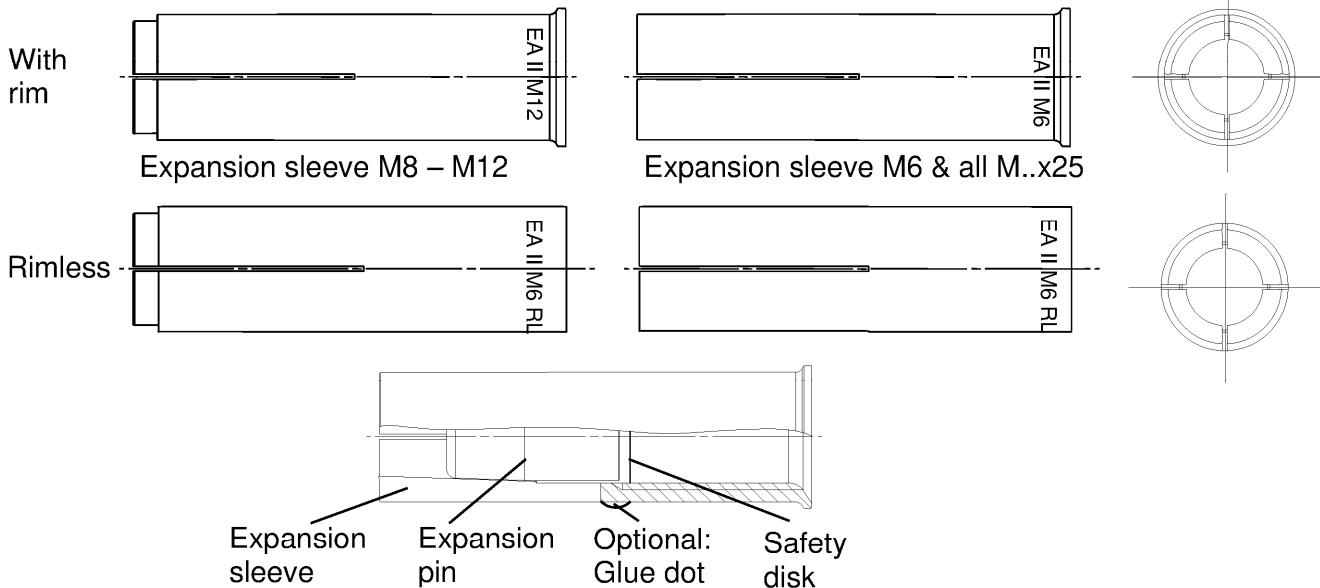

<b>Essential characteristic</b>	<b>Performance</b>
Characteristic resistance for all load directions and modes of failure for simplified design	See Annex C 1 and C 2
Durability	See Annex B 1

### **4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base**

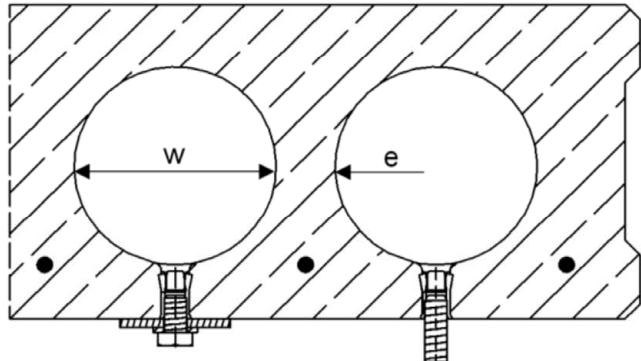

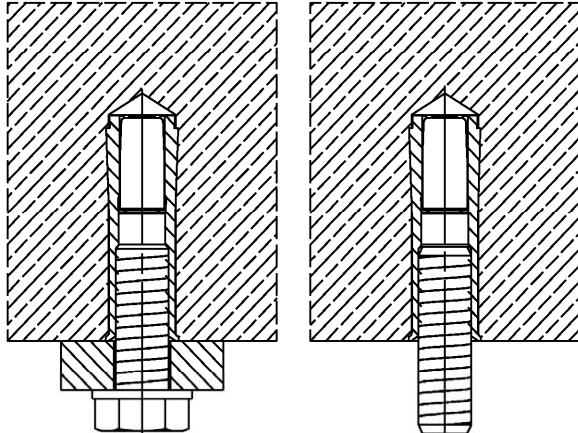

In accordance with European Assessment Document EAD No. 330747-00-0601, the applicable European legal act is: [97/161/EC].

The system to be applied is: 2+

**Only for use for redundant non-structural systems according to EN 1992-4:2018**

### Intended use in concrete

**Intended use in precast pre-stressed hollow concrete slabs ( $w/e \leq 4,2$ ) with a flange thickness  $d_b \geq 35 \text{ mm}$  (or 30 mm → see Annex C2) and only for  $h_{ef} = 25 \text{ mm}$**

## fischer drop-in anchor EA II

## Specifications of intended use

### **Anchorage subject to:**

fischer drop-in anchor EA II (all versions)	M6	M8	M10	M12
Hammer drilling with standard drill bit				
Hammer drilling with hollow drill bit with automatic cleaning		All types		
Material	Steel Stainless steel	Zinc plated R		
Static and quasi-static loads			✓	
Cracked and uncracked concrete				
Fire exposure in concrete C12/15 to C50/60				
Fire exposure in prestressed hollow concrete slabs			No performance assessed	

### **Base materials:**

- Compacted reinforced and unreinforced normal weight concrete without fibres (cracked and uncracked) according to EN 206:2013+A1:2016
- Strength classes C12/15 to C50/60 according to EN 206:2013+A1:2016
- Precast prestressed hollow concrete slabs with w/e ≤ 4,2 and strength classes C30/37 to C50/60: M6x25, M8x25, M10x25 and M12x25

### **Use conditions (Environmental conditions):**

- Structures subject to dry internal conditions: **EA II, EA II R**
- For all other conditions according to EN 1993-1-4:2006 + A1:2015 corresponding to corrosion resistance class CRC III **EA II R with  $h_{ef} \geq 30$  mm**

### **Design:**

- Anchorage are designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e. g. position of the anchor relative to reinforcement or to supports, etc.)
- Only for use for redundant non-structural system according to EN 1992-4:2018, Chapter 7.3. Design Method B according to EN 1992-4:2018.
- Anchorage under fire exposure are designed according to EN 1992-4:2018 Annex D

### **Installation:**

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Create drill hole with hammer drill or with hollow drill and vacuum cleaner
- The anchor may only be used once
- In case of aborted hole: New hole must be drilled at a minimum distance of twice the depth of the aborted hole or closer, if the hole is filled with a high strength mortar (e.g. FIS EM Plus, FIS SB or FIS V Plus) and only if the hole is not in the direction of the oblique tensile or shear load
- Anchor expansion by impact using the setting tools given in Annex A 4. The anchor is properly set, if the stop of the setting tool reaches the expansion sleeve. The manual setting tool with installation control leaves a visible mark on the sleeve, as illustrated in Annex A 4 and B 4

## Installation instructions

No.	Description
1	Create drill hole with hammer drill or stop drill or with hollow drill and vacuum cleaner
2	Clean from drill-dust
3	Set anchor till anchor is flush with surface of concrete
4	Expand the sleeve by driving the pin with the corresponding setting tool into the sleeve and control the correct setting
5	Fixation of fixture. Maximum installation torque $T_{\text{inst,max}}$ must not be exceeded
