 $k_{cr,N} = NPD$ 

Kraftighet:

Bilagor C1

Minsta kant- och axelavstånd:

Bilagor C3

Kantavstånd för att slippa sprickor under last:

Bilagor C1

Karakteristisk bärformåga för skjutning (för statisk och kvasi-statisk belastning), Metod A:

Motstånd i stålet (tvärlast):

Bilagor C2

Motstånd mot fläckning:

Bilagor C2

Karakteristisk motstånd och Förskjutningar för seismiska prestandakategorier C1 och C2:

Motstånd mot draglast, förskjutningar, kategori C1:

NPD

Motstånd mot draglast, förskjutningar, kategori C2:

NPD

Motstånd mot tvärlast, förskjutningar, kategori C1:

NPD

Motstånd mot tvärlast, förskjutningar, kategori C2:

NPD

Faktor cirkulärt hål:

NPD

Karakteristisk motstånd för förenklad design:

Metod B:

NPD

Metod C:

NPD

Förskjutningar och Hållbarhet:

Förskjutningar under statisk och kvasistatisk belastning:

Bilagor C3

Hållbarhet:

Bilagor A4, B1

**Säkerhet vid brand (BWR 2)**

Reaktion vid brand:

Klass (A1)

Motståndskraft mot eld:

Brandmotstånd i stålet (tvärlast):

NPD

Brandmotstånd mot utdrag (draglast):

NPD

Brandmotstånd i stålet (tvärlast):

NPD

8. Lämplig teknisk dokumentation och/eller särskild teknisk dokumentation: -

Prestandan för ovanstående produkt överensstämmer med den angivna prestandan. Denna prestandadeklaration har utfärdats i enlighet med förordning (EU) nr 305/2011 på eget ansvar av den tillverkare som anges ovan.

Undertecknad på tillverkarens vägnar av:

Thilo Pregartner, Dr.-Ing.  
Tumlingen, 2020-07-27

Peter Schillinger, Dipl.-Ing.

Denna DoP har förberetts på olika språk. I händelse av tvist om tolkningen ska den engelska versionen alltid råda.

Bilagan innehåller frivilliga och kompletterande information på engelska som överskrider (det specifika språkets) lagkrav.

## **Specific Part**

### **1 Technical description of the product**

The fischer Bolt anchor FBN II and FBN II R is an anchor made of zinc plated, hot-dip galvanised or stainless steel which is placed into a drilled hole and anchored by torque-controlled expansion.

The product description is given in Annex A.

### **2 Specification of the intended use in accordance with the applicable European Assessment Document**

The performances given in Section 3 are only valid if the fastener is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the fastener of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

### **3 Performance of the product and references to the methods used for its assessment**

#### **3.1 Mechanical resistance and stability (BWR 1)**

| <b>Essential characteristic</b>  | <b>Performance</b>      |
|--|-------------------------|
| Characteristic resistance to tension load<br>(static and quasi-static loading)           | See Annex<br>C 3, C 1   |
| Characteristic resistance to shear load<br>(static and quasi-static loading)             | See Annex<br>C 2        |
| Displacements<br>(static and quasi-static loading)                                       | See Annex<br>C 3        |
| Characteristic resistance and displacements for seismic performance categories C1 and C2 | No performance assessed |
| Durability   | See Annex B 1           |

#### **3.2 Safety in case of fire (BWR 2)**

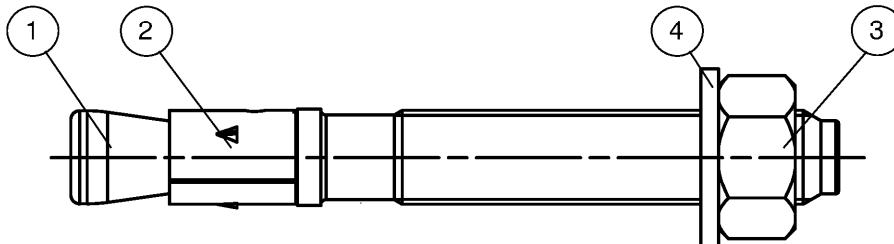

| <b>Essential characteristic</b> | <b>Performance</b>      |
|---------------------------------|-------------------------|
| Reaction to fire                | Class A1                |
| Resistance to fire              | No performance assessed |

### **4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base**

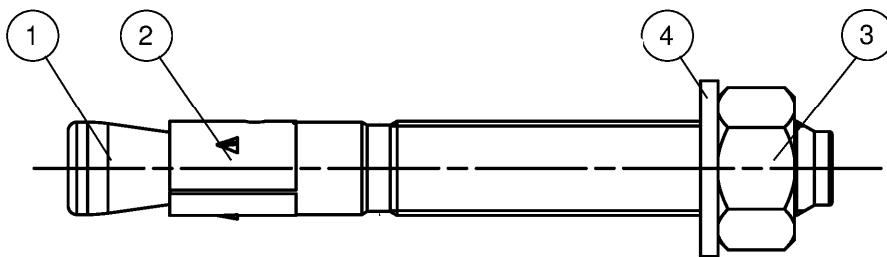

In accordance with the European Assessment Document EAD 330232-01-0601 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

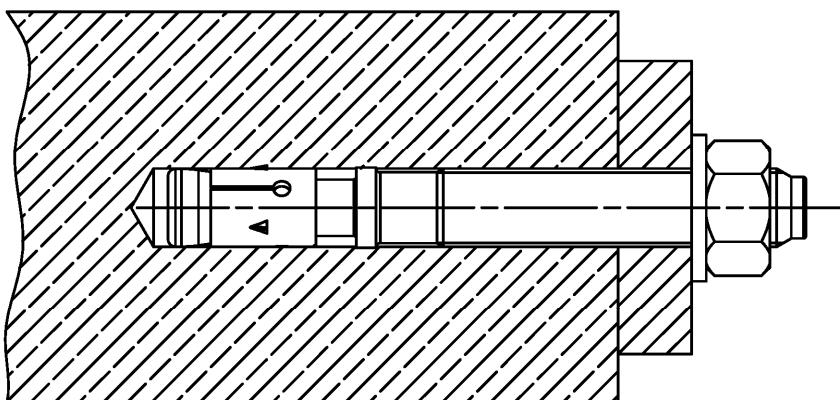

Cone bolt manufactured by cold - forming:

Cone bolt manufactured by turning:

- ① Cone bolt (cold – formed or turned)
- ② Expansion sleeve
- ③ Hexagon nut
- ④ Washer

<sup>1)</sup> Use of FBN II 6 (gvz/R) and FBN II 8 (gvz/HDG/R) with  $h_{ef} = 30\text{mm}$  restricted to anchoring of structural components which are statically indeterminate

<sup>2)</sup> Anchor type not part of the assessment

### Base materials:

- Reinforced or unreinforced normal concrete without fibres of strength classes C20/25 to C50/60 according to EN 206:2013+A1:2016

### Use conditions (Environmental conditions):

- Structures subject to dry internal conditions: **FBN II, FBN II HDG**
- For all other conditions according to EN 1993-1-4:2015-10 corresponding to corrosion resistance class CRC III **FBN II R**

### Design:

- Anchorages are to be designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Design of fastenings according to EN 1992-4:2018 and TR 055

## Installation instructions

- Fastener installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Use of the fastener only as supplied by the manufacturer without exchanging the components of the fastener
- Checking before placing the fastener to ensure that the strength class of the concrete in which the fastener is to be placed is in the range given and is not lower than that of the concrete to which the characteristic loads apply
- Check of concrete being well compacted, e.g. without significant voids
- Hammer or hollow drilling
- Drill hole created perpendicular +/- 5° to concrete surface, positioning without damaging the reinforcement
- In case of aborted hole: new drilling at a minimum distance twice the depth of the aborted drill hole or smaller distance if the aborted drill hole is filled with high strength mortar and if under shear or oblique tension load it is not in the direction of load application

<sup>1)</sup> In absence of other national regulations

<sup>2)</sup> Based on concrete strength as cylinder strength

3)  $N_{Rk,0}^0$  according to EN 1992-4:2018

4) Use restricted to anchoring of structural components which are statically indeterminate.

5) No performance assessed
