

DÉCLARATION DES PERFORMANCES

DoP: 0134

pour fischer Vis à béton ULTRACUT FBS II A4 (Cheville métallique pour utilisation dans le béton (charges lourdes)) – FR

1. Code d'identification unique du produit type: **DoP: 0134**
2. Usage(s) prévu(s): **Cheville de fixation dans du béton fissuré ou non fissuré, voir annexe, en particulier annexes B 1 - B 4**
3. Fabricant: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Straße 1, 72178 Waldachtal, Allemagne**
4. Mandataire: --
5. Système(s) d'évaluation et de vérification de la constance des performances: **1**
6. Document d'évaluation européen: **EAD 330232-00-0601**
Évaluation technique européenne: **ETA-17/0740; 2018-05-16**
Organisme d'évaluation technique: **ETA-Danmark A/S**
Organisme(s) notifié(s): **1343 – MPA Darmstadt**
7. Performance(s) déclarée(s):

Résistance mécanique et stabilité (BWR 1)

- **Résistance caractéristique pour l'action statique et quasi-statique: Voir annexe, en particulier annexe C 1**
- **Résistance caractéristique pour les catégories de performances sismiques C1 et C2: Voir annexe, en particulier annexe C 2**
- **Déplacements pour des charges statiques et quasi-statiques: Voir annexe, en particulier annexe C 4**
- **Déplacements sous charges sismiques: Voir annexe, en particulier annexe C 4**

Protection contre le feu (BWR 2)

- **Réaction au feu: La cheville remplit les exigences de la classe A 1**
- **Résistance caractéristique au feu: Voir annexe, en particulier annexe C 3**

8. Documentation technique appropriée et/ou documentation technique spécifique: ---

Les performances du produit identifié ci-dessus sont conformes aux performances déclarées. Conformément au règlement (UE) no 305/2011, la présente déclaration des performances est établie sous la seule responsabilité du fabricant mentionné ci-dessus.

Signé pour le fabricant et en son nom par:

Andreas Bucher, Dipl.-Ing.

Wolfgang Hengesbach, Dipl.-Ing., Dipl.-Wirtsch.-Ing.

Tumlingen, 2018-05-23

- Cette déclaration des performances a été émise en différentes langues. En cas de divergences d'interprétation, la version anglaise prévaut toujours.
- L'annexe contient des informations volontaires et complémentaires en langue anglaise dépassant les exigences légales (spécifiées en langage neutre).

Appendix 1 / 15

Authorised and notified according
to Article 29 of the Regulation (EU)
No 305/2011 of the European
Parliament and of the Council of
9 March 2011

MEMBER OF EOTA

European Technical Assessment ETA-17/0740 of 2018/05/16

I General Part

Technical Assessment Body issuing the ETA and designated according to Article 29 of the Regulation (EU) No. 305/2011: ETA-Danmark A/S

Trade name of the construction product:

fischer concrete screw ULTRACUT FBS II A4

Product family to which the above construction product belongs:

Mechanical fasteners for use in cracked and un-cracked concrete

Manufacturer:

fischerwerke GmbH & Co. KG
Klaus-Fischer-Straße 1
D-72178 Waldachtal

Manufacturing plant:

fischerwerke

This European Technical Assessment contains:

15 pages including 3 annexes which form an integral part of the document

This European Technical Assessment is issued in accordance with Regulation (EU) No. 305/2011, on the basis of:

EAD 330232-00-0601; Mechanical fasteners for use in concrete

This version replaces:

-

Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may be made, with the written consent of the issuing Technical Assessment Body. Any partial reproduction has to be identified as such.

II SPECIFIC PART OF THE EUROPEAN TECHNICAL ASSESSMENT

1 Technical description of product and intended use

Technical description of the product

fischer concrete screw ULTRACUT FBS II A4 is a concrete screw made of stainless steel. The anchor is installed in a drilled hole and anchored by mechanical interlock.

An illustration of the product is given in Annex A.

The characteristic material values, dimensions and tolerances of the anchors not indicated in Annexes shall correspond to the respective values laid down in the technical documentation of this European Technical Assessment.

The anchors are intended to be used with embedment depth given in Annex B, Table B2.1. The intended use specifications of the product are detailed in the Annex B1.

2 Specification of the intended use in accordance with the applicable EAD

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The provisions made in this European Technical Assessment are based on an assumed intended working life of the anchor of 50 years.

The indications given on the working life cannot be interpreted as a guarantee given by the producer or Assessment Body, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Characteristics of product

Mechanical resistance and stability (BWR 1):

The essential characteristics are detailed in the Annex C1, C2 and C4.

Safety in case of fire (BWR 2):

The essential characteristics are detailed in the Annex C3.

Other Basic Requirements are not relevant.

3.2 Methods of assessment

The assessment of fitness of the anchor for the intended use in relation to the requirements for mechanical resistance and stability and safety in use in the sense of the Basic Works Requirement 1 has been made in accordance with EAD 330232-00-0601; Mechanical fasteners for use in concrete.

4 Assessment and verification of constancy of performance (AVCP)

4.1 AVCP system

According to the decision 1996/582/EC of the European Commission, the system(s) of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No. 305/2011) is 1.

5 Technical details necessary for the implementation of the AVCP system, as foreseen in the applicable EAD

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited at ETA-Danmark prior to CE marking.

Issued in Copenhagen on 2018-05-16 by

Thomas Bruun
Managing Director, ETA-Danmark

fischer concrete screw ULTRACUT FBS II A4	Annex A2 of European Technical Assessment ETA-17/0740
Product description Material and screw types	

Specification of intended use:

Size	FBS II A4		
	8	10	12
Static and quasi-static loads			
Cracked and uncracked concrete		✓	
Fire exposure			
Seismic performance category C1 and C2			

Base materials:

- Reinforced and unreinforced normal weight concrete according to EN 206:2000
- Strength classes C20/25 to C50/60 according to EN 206:2000
- Uncracked or cracked concrete

Use conditions (Environmental conditions):

- Structures subjected to dry internal conditions
- Structures subjected to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist

Note: Particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere or indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where deicing materials are used)

Design:

- Anchorages are to be designed under the responsibility of an engineer experienced in anchorages and concrete work.
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the screw is indicated on the design drawings (e.g. position of the screw relative to reinforcement or to supports, etc.).
- Design of fastenings according to FprEN 1992-4: 2016 and EOTA Technical Report TR 055
- Seismic design according EOTA Technical Report TR 049

Installation:

- Hammer drilling or diamond drilling or hollow drilling with functional suction according to Annex B4
- Screw installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters on site.
- In case of aborted hole: New hole must be drilled at a minimum distance of twice the depth of the aborted hole or closer, if the hole is filled with a high strength mortar and only if the hole is not in the direction of the oblique tensile or shear load.
- Adjustability according to Annex B3
- Cleaning of drill hole is not necessary when using a hollow drill with functional suction or:
 - If drilling vertically upwards
 - If drilling vertical downwards and the drill hole depth has been increased. We recommend to increase the drill depth with additional 3 d_o.
- After correct installation further turning of the screw head should not be possible.
- The head of the screw must be fully engaged on the fixture and show no signs of damage.
- For seismic performance category C2 applications: The gap between screw shaft and fixture must be filled with mortar; mortar compressive strength ≥ 50 N/mm².

fischer concrete screw ULTRACUT FBS II A4	Annex B1 of European Technical Assessment ETA-17/0740
Intended use Specification	

Table B2.1: Installation parameters

FBS II A4			8	10	12
Nominal embedment depth	h_{nom}		65	85	100
Nominal drill hole diameter	d_0		8	10	12
Cutting diameter of drill bits	$d_{cut} \leq$		8,45	10,45	12,50
Cutting diameter for diamond drillers	$d_{cut} \leq$	[mm]	8,10	10,30	12,30
Clearance hole diameter	d_f		10,6 – 12,0	12,8 – 14,0	14,8 – 16,0
Wrench size (US,S)	SW		13	15	17
TX-size	TX	-	40	50	-
Countersunk head diameter	d_h		18	21	-
Countersunk diameter in fixture	d_c		20	23	-
Drill hole depth ¹⁾	$h_1 \geq$		75	95	110
Drill hole depth ¹⁾ (with adjustable setting)	$h_1 \geq$	[mm]	85	105	120
Thickness of fixture	$t_{fix}^{3)} \geq$		0		
	$t_{fix} \leq$		L - h_{nom}		
Length of screw	$L_{min}^{3)} =$		65	85	100
	$L_{max} =$		415	435	450
Torque impact screw driver ²⁾	$T_{imp,max}$	[Nm]	450		650
Torque impact screw driver (with adjustable setting process) ²⁾	$T_{imp,max}$	[Nm]	300		450

1) Cleaning of drill hole is not necessary when using a hollow drill with functional suction or:
if drilling vertical upwards

If drilling vertical downwards and the drill hole depth has been increased. We recommend to increase the drill depth with additional $3 \times d_0$.

2) Installation with any torque impact screw driver up to the maximum mentioned torque moment ($T_{imp,max}$). Alternatively, all other tools without a mentioned torque moment are allowed (e.g. ratchet spanner). In any case it must be secured, that after installation the head of the screw must be tight down on the fixture. An easy further turning of the screw must not be possible and the head of the screw is not damaged. The torque moments $T_{imp,max}$ are not valid for manual installation (e.g. torque wrench).

3) For countersunk screws the height of the head must be added to t_{fix} and L_{min} and L_{max}

Intended use
Installation parameters

Annex B2
of European
Technical Assessment
ETA-17/0740

Adjustment

It is permissible to untighten the screw up to two times for adjustment purposes. Therefore the screw may be untightened to a maximum of $L_{adj} = 20$ mm to the surface of the initial fixture. The total permissible thickness of shims added during the adjustment process is $t_{adj} = 10$ mm.

Table B3.1: Minimum thickness of concrete members, minimum spacing and edge distance
