

ETA-Danmark A/S Göteborg Plads 1 DK-2150 Nordhavn Tel. +45 72 24 59 00 Internet www.etadanmark.dk Authorised and notified according to Article 29 of the Regulation (EU) No 305/2011 of the European Parliament and of the Council of 9 March 2011

## European Technical Assessment ETA-24/0714 of 2025/04/22

I General Part

Technical Assessment Body issuing the ETA and designated according to Article 29 of the Regulation (EU) No 305/2011: ETA-Danmark A/S

Trade name of the construction product:

fischer bolt anchor FWA Plus

Product family to which the above construction product belongs:

Mechanical fasteners for use in uncracked concrete

Manufacturer:

fischerwerke GmbH & Co. KG Klaus-Fischer-Strasse 1 72178 Waldachtal Germany

**Manufacturing plant:** 

fischerwerke

This European Technical Assessment contains:

14 pages including 8 annexes which form an integral part of the document

This European Technical Assessment is issued in accordance with Regulation (EU) No 305/2011, on the basis of:

EAD 330232-01-0601; Mechanical fasteners for use in concrete

This version replaces:

The ETA with the same number issued on 2024-10-15

Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full (excepted the confidential Annex(es) referred to above). However, partial reproduction may be made, with the written consent of the issuing Technical Assessment Body. Any partial reproduction has to be identified as such.

#### II SPECIFIC PART OF THE EUROPEAN TECHNICAL ASSESSMENT

#### 1 Technical description of product

The FWA Plus is a torque-controlled expansion anchor made of galvanised steel. It is available in the sizes M8, M10, M12 and M16. The expansion is achieved by torque acting on the bolt. As the anchor is prestressed, the cone is pulled into the expansion sleeve and the load applied to the anchor is transferred to the concrete mainly by friction. The anchor body of sizes M8 to M16 is cold-formed. The FWA Plus is suitable for use in uncracked concrete of strength classes C20/25 to C50/60

The product description is given in Annex A and the intended use specifications of the product are detailed in Annex B.

# 2 Specification of the intended use(s) in accordance with the applicable European Assessment Document (hereinafter EAD)

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The provisions made in this European Technical Assessment are based on an assumed intended working life of the anchor of 50 years.

The indications given on the working life cannot be interpreted as a guarantee given by the producer or Assessment Body, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

#### 3 Performance of the product and references to the methods used for its assessment

#### Characteristic

#### **Assessment of characteristic**

#### 3.1 Mechanical resistance and stability (BWR1)

#### Characteristic resistance to tension load (static and quasi-static loading) Method A

Resistance to steel failure Annex C1

Resistance to pull-out failure Annex C1

Resistance to concrete cone failure Annex C1

Robustness Annex B

Minimum edge distance and spacing Annex C2

Edge distance to prevent splitting under load Annex C1

#### Characteristic resistance to shear load (static and quasi-static loading)

Resistance to steel failure under shear load Annex C2

Resistance to pry-out failure Annex C2

#### Characteristic resistance for simplified design

Method B Not relevant

Method C Not relevant

#### **Displacements**

Displacements under static and quasi-static

loading

Annex C2

#### Characteristic resistance and displacements for seismic performance categories C1 and C2

Resistance to tension load, displacements No performance assessed

Resistance to shear load, displacements No performance assessed

Factor for annual gap

No performance assessed

#### Characteristic

#### **Assessment of characteristic**

#### 3.2 Safety in case of fire (BWR2)

The anchors are made from steel classified as performance **class A1** of the characteristic reaction to fire, in accordance with the provisions of EC decision 96/603/EC, amended by EC Decision

2000/605/EC.

#### Resistance to fire

Reaction to fire

Fire resistance to steel failure (tension load) No performance assessed

Fire resistance to pull-out failure (tension load) No performance assessed

Fire resistance to steel failure (shear load)

No performance assessed

#### 3.3 Aspects of durability

Durability Annex B

See additional information in section 3.9

# 3.9 General aspects related to the performance of the product

The European Technical Assessment is issued for the product on the basis of agreed data/information, deposited with ETA-Danmark, which identifies the product that has been assessed and judged. Changes to the product or production process, which could result in this deposited data/information being incorrect, should be notified to ETA-Danmark before the changes are introduced. ETA-Danmark will decide whether or not such changes affect the ETA and consequently the validity of the CE marking on the basis of the ETA and if so whether further assessment or alterations to the ETA, shall be necessary.

4 Assessment and verification of constancy of performance (AVCP) (hereinafter AVCP) system applied, with reference to its legal base.

#### 4.1 AVCP system

According to the decision 1996/582/EC of the European Commission, the system(s) of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No. 305/2011) is 1.

5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable EAD

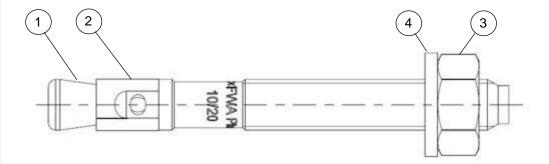

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited at ETA-Danmark prior to CE marking

Issued in Copenhagen on 2025-04-22 by

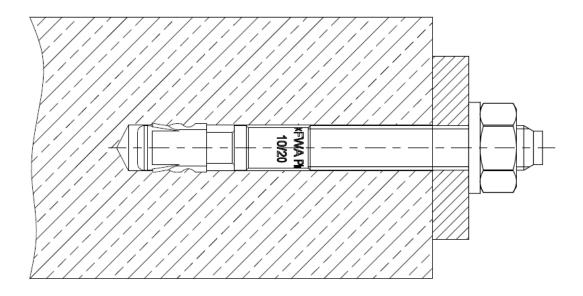

Thomas Bruun

Managing Director, ETA-Danmark

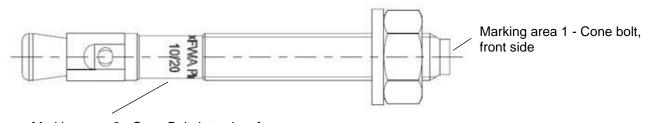

## Cone bolt manufactured by cold - forming:

- ① Cone bolt (cold formed)
- ② Expansion sleeve
- 3 Hexagon nut
- Washer

#### Base materials:

 Reinforced or unreinforced normal concrete without fibres of strength classes C20/25 to C50/60 according to EN 206:2013+A2:2021

#### **Use conditions (Environmental conditions):**

· Structures subject to dry internal conditions.

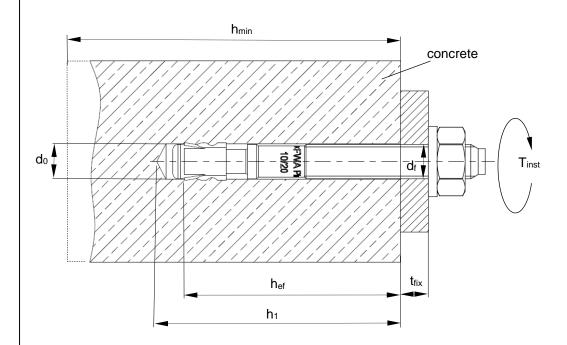

#### Design:

- The structural design is conducted under responsibility of a designer experienced in the field of fastenings and concrete works.
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The
  position of the fastener is indicated on the design drawings (e.g. position of the fastener relative to
  reinforcement or to supports, etc.)
- Design of fastenings according to EN 1992-4:2018 and TR 055:2018.

|---|----------|
| Intended Use<br>Installation parameters | Annex B2 |

#### **Installation instructions**

- Fastener installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Use of the fastener only as supplied by the manufacturer without exchanging the components of the fastener
- · Hammer drilling
- Drill hole created perpendicular +/- 5° to concrete surface, positioning without damaging the reinforcement
- In case of aborted hole: new drilling at a minimum distance twice the depth of the aborted drill hole or smaller distance if the aborted drill hole is filled with high strength mortar and if under shear or combined shear/tension load it is not in the direction of load application

| No. | Description                                     |
|-----|---|
| 1   | Drill the hole by hammer drilling.              |
| 2   | Clean the hole.                                 |
| 3   | Set the fastener.                               |
| 4   | Apply required setting torque T <sub>inst</sub> |
| 5   | Installed fastener                              |
