Authorised and notified according to Article 29 of the Regulation (EU) No 305/2011 of the European Parliament and of the Council of 9 March 2011

MEMBER OF EOTA

European Technical Assessment ETA-24/0973 of 2025/01/08

I General Part

Technical Assessment Body issuing the ETA and designated according to Article 29 of the Regulation (EU) No. 305/2011: ETA-Danmark A/S

Trade name of the construction product:	fischer concrete screw UltraCut FBS II R
Product family to which the above construction product belongs:	Mechanical fasteners for use in cracked and un-cracked concrete
Manufacturer:	fischerwerke GmbH & Co. KG Klaus-Fischer-Straße 1 D-72178 Waldachtal
Manufacturing plant:	fischerwerke
This European Technical Assessment contains:	13 pages including 8 annexes which form an integral part of the document
This European Technical Assessment is issued in accordance with Regulation (EU) No. 305/2011, on the basis of:	EAD 330747-00-0601 - Fasteners for use in concrete in redundant for non-structural systems
This version replaces:	

II SPECIFIC PART OF THE EUROPEAN TECHNICAL ASSESSMENT

1 Technical description of product and intended use

Technical description of the product
fischer concrete screw UltraCut FBS II R is a concrete screw made of stainless steel. The anchor is installed in a drilled hole and anchored by mechanical interlock.

An illustration of the product is given in Annex A.

The characteristic material values, dimensions and tolerances of the anchors not indicated in Annexes shall correspond to the respective values laid down in the technical documentation of this European Technical Assessment.

The anchors are intended to be used with embedment depth given in Annex B, Table B2.1. The intended use specifications of the product are detailed in the Annex B1.

2 Specification of the intended use in accordance with the applicable European Assessment Document (hereinafter EAD)

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The provisions made in this European Technical Assessment are based on an assumed intended working life of the anchor of 50 years.

The indications given on the working life cannot be interpreted as a guarantee given by the producer or Assessment Body, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Characteristics of product

Safety in case of fire (BWR 2):
The essential characteristics are detailed in the Annex C2.

Hygiene, health and the environment (BWR3)
No performance assessed

Safety and accessibility in use (BWR4)
The essential characteristics are detailed in the Annex C1 and C2.

Durability:
See annex B1.

3.2 Methods of assessment

The assessment of fitness of the anchor for the intended use in relation to the requirements for mechanical resistance and stability and safety in use in the sense of the Basic Works Requirement 2, 3 and 4 has been made in accordance with EAD 330747-00-0601 - Fasteners for use in concrete in redundant for non-structural systems.

4 Assessment and verification of constancy of performance (hereinafter AVCP) system applied, with reference to its legal base.

4.1 AVCP system

According to the decision 97/161/EC of the European Commission, the system(s) of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No. 305/2011) is 2+.

5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable EAD

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited at ETA-Danmark prior to CE marking.

Issued in Copenhagen on 2025-01-08 by

Thomas Bruun
Managing Director, ETA-Danmark

Product in the installed condition

Installed condition in normal weight concrete

(Figure not to scale)

Specification of intended use:

Size	FBS II 6 R
Hammer drilling	✓
Static and quasi-static loads	
Cracked and uncracked concrete	
Fire exposure	

Base materials:

- Compacted reinforced and unreinforced normal weight concrete without fibres (cracked or uncracked) according to EN 206:2013+A2:2021
- Strength classes C20/25 to C50/60 according to EN 206:2013+A2:2021

Use conditions (Environmental conditions):

- Structures subjected to dry internal conditions (FBS II 6 R)
- For all other conditions according to EN 1993-1-4:2006 +A1:2015 corresponding to corrosion resistance class
  - CRC III: for FBS II 6 R

Design:

- The structural design according to EN 1992-4:2018 are conducted under responsibility of a designer experienced in the field of anchorages and concrete works.
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the fastener is indicated on the design drawings (e.g. position of the fastener relative to reinforcement or to supports, etc.)
- Design of fastenings according to EN 1992-4: 2018 and EOTA Technical Report TR 055:2018

Table B2.1: Installation parameters – drilling bore hole and setting tools

FBS II 6 R			**All head shapes**	
Nominal embedment depth	h_{nom}	[mm]	45	60
Nominal drill hole diameter	d_0 =		6	
Cutting diameter of drill bits	d_{cut} ≤		6,4	
Diameter of clearance hole in the fixture	d_f ≤		8	
Drill hole depth	h_1 ≥		55	70
Drill hole depth (with adjustable setting)			65	80
Torque impact screw driver	$T_{imp,max}$	[Nm]	240	

Table B2.2: Installation parameters – drive and fixture

FBS II 6 R			**US**	**SK**	**P**
Wrench size	SW	[mm]	10 / 13	-	
TX size	TX	[-]	-	30	
Head diameter	d_h	[mm]	15 / 17	13,3	14,4
Thickness of fixture	t_{fix} ≤		$L - h_{nom}$		
Length of screw	L_{min} =		50		
	L_{max} =		400

Intended use
Installation parameters

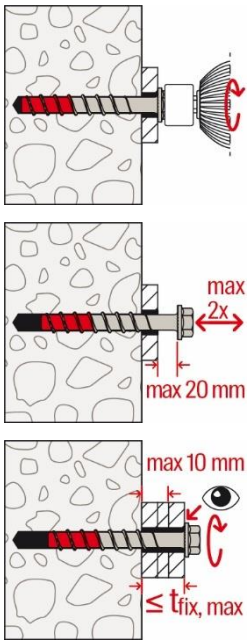
Annex B 2

Installation instruction part 1

	**Step 1: Drilling of the drill hole:** Drill the hole using hammer drill Drill hole diameter d_0 and drill hole depth h_1 according to table B2.1
	**Step 2: Cleaning of the drill hole:** Clean the drill hole.
	**Step 3: Installation:** Turn in until the head is in contact with the fixture. Installation with any torque impact screw driver up to the maximum mentioned torque moment ($T_{imp,max}$ according to table B2.1).
	**Step 4: Checking of the correct installation:** After installation a further turning of the screw must not be possible. The head of the screw must be in contact with the fixture and is not damaged

fischer concrete screw UltraCut FBS II 6 R	**Annex B 3**
Intended use Installation instruction	

Installation instruction part 2



Adjustment

Optional:
It is permissible to adjust the screw twice.
Therefore, the screw may be untightened to a maximum of L_{adj} = 20 mm off the surface of the initial fixture. The total permissible thickness of shims added during the adjustment process is t_{adj} = 10 mm.
The required nominal anchoring depth h_{nom} must be kept after the adjustment process. (see also annex B 3)

Table C1.1: Characteristic values for static and quasi-static action					
FBS II 6 R					
Nominal embedment depth		h_{nom}	[mm]	45	60
Steel failure for tension load and shear load
