Bautechnisches Prüfamt

An institution established by the Federal and Laender Governments

European Technical Assessment

ETA-07/0135 of 20 October 2021

English translation prepared by DIBt - Original version in German language

General Part

Technical Assessment Body issuing the Deutsches Institut für Bautechnik **European Technical Assessment:** Trade name of the construction product fischer drop-in anchor EA II Product family Mechanical fasteners for use in concrete to which the construction product belongs fischerwerke GmbH & Co. KG Manufacturer Klaus-Fischer-Straße 1 72178 Waldachtal DEUTSCHLAND fischerwerke Manufacturing plant This European Technical Assessment 14 pages including 3 annexes which form an integral part contains of this assessment This European Technical Assessment is EAD 330232-01-0601, Edition 05/2021 issued in accordance with Regulation (EU) No 305/2011, on the basis of This version replaces ETA-07/0135 issued on 9 December 2016

European Technical Assessment ETA-07/0135 English translation prepared by DIBt

Page 2 of 14 | 20 October 2021

The European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and shall be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may only be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction shall be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission in accordance with Article 25(3) of Regulation (EU) No 305/2011.

Specific Part

1 Technical description of the product

The fischer drop-in anchor EA II is an anchor made of galvanized or stainless steel which is placed into a drilled hole and anchored by deformation-controlled expansion.

The fixture shall be anchored with a fastening screw or threaded rod.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance				
Characteristic resistance to tension load (static and quasi static action) Method A	See Annex B2 and C1				
Characteristic resistance to shear load (static and quasi static action)	See Annex C2				
Displacements and Durability	See Annex C3 and B1				
Characteristic resistance and displacements for seismic performance categories C1 and C2	No performance assessed				

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Class A1
Resistance to fire	No performance assessed

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with the European Assessment Document EAD 330232-01-0601 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

European Technical Assessment ETA-07/0135 English translation prepared by DIBt

Page 4 of 14 | 20 October 2021

5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable European Assessment Document

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited with Deutsches Institut für Bautechnik.

Issued in Berlin on 20 October 2021 by Deutsches Institut für Bautechnik

Dipl.-Ing. Beatrix Wittstock Head of Section *beglaubigt:* Baderschneider
