

Technical Datasheet

FRS-L-H Externally Bonded CFRP Laminate

Characteristics

- CFRP laminate for structural strengthening of concrete elements with externally bonded reinforcements
- High young's modulus ($\geq 200\,000\text{ N/mm}^2$) and high tensile strength ($\geq 3400\text{ N/mm}^2$)
- Component of European Technical Assessment ETA-24/0281
- Component of ICC Evaluation Service Report 4774
- Very high alkaline resistance and high environmental and chemical durability
- Low density

General Information

Composition	Precured unidirectional carbon fiber reinforced composite with epoxy matrix
Appearance	Black strip with periodically printed product name and batch number
Delivery Unit	Coil of 100 – 150 m, Inner coil diameter $\varnothing \geq 800\text{ mm}$
Shelf life	Infinite if stored appropriately in original packaging
Storage conditions	Storage under dry conditions, below + 50 °C temperature The product must be protected from direct sun light.
Transport conditions	Only in original packaging or in adequate packaging protected against mechanical impact and aggressive environments.
Packaging	Coil in sealed plastic foil and carton overpack

Product Geometries

Art.-No.	Width [mm]	Thickness [mm]	Cross section [mm ²]	Coil length [m]
562436	50	1,2	60	150
562437	75	1,2	90	150
562438	100	1,2	120	100
562442	50	1,4	70	150
562443	75	1,4	105	150
562444	100	1,4	140	100

Approvals and Assessments

ETA 24/0281	According to EAD 160086-01-0301
ESR-4774 (ICC-ES Evaluation Report)	According to AC 125

Technical Data

Property	Performance	
Tensile strength (EN 2561) ¹	Mean value	3400 N/mm ²
	Characteristic 5 % fractile value	3000 N/mm ²
Young's modulus (EN 2561) ¹	Mean value	200 000 N/mm ²
Elongation at break (EN 2561) ¹	Mean value	1,68 %
Tensile strength (ASTM D3039) ¹	Mean value	3300 N/mm ²
	Guaranteed strength	2700 N/mm ²
Young's modulus (ASTM D3039) ¹	Mean value	190 000 N/mm ²
Elongation at break (ASTM D3039) ¹	Mean value (ultimate strain)	1,63 %
Fiber volume content (EN 2564)	≥ 67 %	
Density of laminate	1,60 g/cm ³	
Glass transition temperature (EN 12614 & ASTM E1640)	≥ 100 °C	

¹Values determined in 0° longitudinal fiber direction

Note that the technical parameters included in the technical assessments (ETA, ICC-ES Evaluation Report) are decisive for structural design. In case of questions regarding the structural design, please contact our national technical team.

Consumption of FRS-CS Epoxy Mortar for externally bonded FRS-L-H CFRP laminates

Width of the laminate [mm]	Required amount of FRS-CS [kg/m]
50	0,3 – 0,4
75	0,4 – 0,5
100	0,6 – 0,7

The required amount of FRS-CS Epoxy Mortar may strongly depend on the concrete surface condition, roughness, layout of laminate crossings and layer thickness. The values given above may be considered as upper bound consumptions.

System components of ETA-24/0281

CFRP laminates	fischer FRS-L-H / FRS-L-S / FRS-L-S NSM
Cleaning agent for the laminate	fischer FRS-CA
Epoxy mortar for the application of the CFRP laminate	fischer FRS-CS
Epoxy repair mortar	fischer FRS-PC 11
Bonding agent	fischer FRS-BA

System components of ESR-4774 (ICC-ES Evaluation Report)

Externally bonded unidirectional CF fabrics	fischer FRS-W U300 / FRS-W U600
Saturating resin for CF Fabric application	fischer FRS-CF
Fire protection coating against flame spread and smoke development	fischer FRS-FP
CFRP Laminates	fischer FRS-L-H / FRS-L-S
Epoxy mortar for the application of the CFRP laminate	fischer FRS-CS

Measurement data

The technical data given in this datasheet are based on laboratory testing according to given EN or ASTM norms. Actual measured data may deviate depending on the measurement procedures, devices and norms used.

Further information

- The structural design must be carried out by an experienced structural engineer.
- Applications out of the scope of the product approvals is out of the responsibility of the fischer group.
- The application of the FRS-L-H CFRP laminates using epoxy resins from other manufacturers is out of the responsibility range of the fischer group.
- Well trained and experienced contractors are to be commissioned to carry out the installation works.
- Wear protective clothing, gloves, goggles, and a face mask when cutting the laminates. Laminates can be cut with angle grinders (FCD-FP, FCD-CP, FCD-FHP) or a suitable saw. It is recommended to tape the spot where the CFRP is cut to prevent longitudinal splitting and fiber fly.
- For further information, please refer to your national fischer technical team or the Installation Manual "C-Fiber Force Strengthening System with FRS-L-S and FRS-L-H Externally Bonded CFRP Laminates"

Please note that the data and information provided above are guidelines from laboratory and real-life experience and are not binding. This general information describes our products and their use, but due to varied working conditions, not every case can be covered. We recommend conducting tests or consulting the fischer technical team if in doubt. We provide information to outline our products and services, without guaranteeing specific properties or suitability for a particular purpose. Please always refer to the latest Technical Data Sheet as well as any national and international regulations. Upon publication of a new version, the previous Technical Data Sheet becomes invalid. Product users must retrieve the latest product data sheet at www.fischer-international.com. Our current general terms and conditions apply.
