

Bracket PFUF

Construction elements - Bracket PFUF

Cross connection on channel

Cross connection on channel

Applications

- Connecting element for the production of multi-dimensional constructions with FUS channels using push-through connector PFCN.
- For use in dry interior areas.

Advantages

- The various shapes of the connecting elements offer flexibility during the installation of channel constructions.
- The holes in the connecting elements make them compatible with the push-through channel nut PFCN.
- Simple creation of channel constructions in connection with FUS channels and PFCN 41.
- Quick assembly by 90° rotation of the push-through connector PFCN 41 in the channel.

Properties

- Material: steel DD11 (material no. 1.0332) acc. to DIN EN 10111
- Zinc plating: electro zinc-plated

PFUF 41

Technical data

	Item no.		Sales unit
Item			[pcs]
PFUF 41	533738		25

See push-through connector PFCN for loads.

Bracket PFUF zl

Construction elements - Brackets PFUF zl

Cross connection on channel

Cross connection on channel

10

Applications

- Connecting element for the production of multi-dimensional constructions with FUS channels using push-through connector PFCN zl.
- For indoor and outdoor application.

Advantages

- The various shapes of the construction elements offer flexibility during the installation of channel constructions.
- The perforation of the construction elements ensures the system fit with the push-through channel nut PFCN 41 zl.
- Simple creation of channel structures in conjunction with FUS channels and PFCN 41 zl.
- Quick installation by rotating the PFCN 41 zl in the channel by 90° clockwise.

Properties

- Material: steel DD11 (material no. 1.0332) acc. to DIN EN 10111
- Coating: zinc lamella coating

Bracket PFUF 41 A4

Construction elements - Bracket PFUF A4

Cross connection on channel

Cross connection on channel

Applications

- Connecting element for the production of multi-dimensional constructions with FUS channels using push-through connector PFCN.
- For indoor and outdoor applications and in environments with high stress to components due to corrosion.

Advantages

- The various shapes of the connecting elements offer flexibility during the installation of channel constructions.
- The holes in the connecting elements make them compatible with the push-through channel nut PFCN.
- Simple creation of channel structures in conjunction with FUS channels and PFCN 41.
- Quick installation by rotating the PFCN 41 in the channel by 90° clockwise.

Properties

- Material: stainless steel A4 (material no. 1.4401)
