

# Angle bracket FMASF 90

The strong connection of FMP massive profiles for frame racks

Profile structures

11

## Applications

- Construction of multidimensional profile structures.
- Constructing variable supporting structures from profiles.
- For indoor and outdoor application.

## Advantages

- The installation heights of the angle bracket FMASF 90 enable a connection matching the installation heights of the FMP 90 massive profile, thus allowing even more versatile constructions.
- The design of the angle bracket FMASF 90 with long slots and grating to match the FMHB hammer-head push connector enables optimum adjustment of the structure and simplifies the assembly process.
- The strong construction of the angle bracket FMASF 90 allows the transmission of high loads in the application as an angle or saddle flange.

## Properties

- Base plate: steel S355 (material no. 1.0976) acc. to DIN EN 10149-2
- Profile mount: steel S235JR (material no. 1.0038) acc. to DIN EN 10025-2
- Zinc plating: hot-dip galvanised acc. to DIN EN ISO 1461
