

Power Drive F35 Stud Driver Warranty Guidelines & Process:

Limited warranty of 6 months is against the manufacturing defects only.

The fischer Power Drive F35 Stud Driver is type-approved and system-tested. The tool therefore bears the approval symbol of the PTB. If there is any abnormality in the tool or any defect observed while using the tool, bring the tool to the nearest fischer experience center or service center for inspection. if there is any defect due to workmanship or manufacturing defect, the tool will be serviced at company's cost in the warranty period provided the tool is used as mentioned in the operating manual. Failure of maintenance or the fault due to wrong application, warranty will be void. Follow the operating manual carefully for the safety and productivity of the tool.

Service and maintenance of the tool entails dismantling and cleaning the moving parts at regular intervals. Use commercially available weapon oil and the cleaning brushes supplied with the tool. If the tool is used every day, it must also be serviced and maintained every day. Even when it is not in use, the service and maintenance steps described in operating manual should be carried out at least every 6 months.
